

ABHAY TYAGI

AI/ML Developer

✉ 14abhay2003@gmail.com
🌐 Abhay14tyagi

☎ 8447402098

📍 Vasundhara, Ghaziabad, Uttar Pradesh, India

🌐 abhay-tyagi-561b22207

PROFESSIONAL SUMMARY

- AI/ML Developer with expertise in Generative AI, RAG-based systems, and machine learning applications
- Skilled in developing AI-powered solutions including chatbots, recommendation systems, and intelligent data processing pipelines
- Proficient in implementing deep learning architectures and natural language processing solutions

PROFESSIONAL EXPERIENCE

Associate Software Developer

Inzint Private Limited

📅 February 2024 – Present

📍 Noida

- Developed and deployed AI agents for automated task execution and decision-making processes
- Engineered robust AI-based web scraping solutions for efficient data collection and analysis
- Successfully delivered multiple client projects involving custom AI solutions and implementations
- Collaborated with cross-functional teams to integrate AI solutions into existing systems

KEY PROJECTS

Third Eye – Smart CCTV Monitoring

📅 2025

- Integrated Roboflow API to fetch and deploy custom computer vision (CV) models for real-time video analysis.
- Processed live CCTV streams to detect events based on use-case specific models (e.g., PPE detection).
- Automated event notifications via email to alert stakeholders about detected incidents.

AI-Powered Job Portal

GmSolution

📅 2025

- Engineered an AI-based resume parsing system using natural language processing
- Implemented RAG (Retrieval-Augmented Generation) for intelligent candidate matching
- Enhanced recruiter experience with context-aware search capabilities

AI Calling Voice Assistant

ViraAi

📅 2025

- Built an AI-powered voice assistant using Gemini Live API integrated with Twilio for real-time calling.
- Implemented tools for web search, Google Calendar integration, and call transfer functionalities.
- Designed conversational flows enabling seamless task execution and intelligent response handling.

Shopify AI Chatbot

📅 2024

- Built a RAG-based architecture for intelligent product recommendations
- Integrated Langchain for enhanced conversational capabilities
- Implemented store API integration for real-time data processing

TECHNICAL SKILLS

AI/ML Technologies

- Machine Learning Deep Learning
- Neural Networks GANs
- Transformer Models
- RAG Architecture
- Natural Language Processing
- Semantic Search
- Large Language Models(LLM)
- Agentic Ai

Frameworks,Tools and Programming Language

- Python
- Javascript
- TensorFlow Pandas
- Langchain
- LangGraph
- FastAPI Flask
- Docker
- Git/GitHub
- MongoDB

Core Competencies

- Statistical Analysis
- Hyperparameter Tuning
- Model Optimization
- System Architecture
- API Integration
- Agile Development

EDUCATION

B.Tech. Information Technology

Dr. A.P.J. Abdul Kalam Technical University

📅 2020 - 2024

- Cumulative Score: 74
- Focused on AI/ML coursework

Higher Secondary Education

Nutan Vidya Mandir School

📅 2019 - 2020

- Score: 92

LANGUAGES

- English (Professional Working Proficiency)
- Hindi (Native Proficiency)
