

ABHINAV KUMAR

Full Stack Software Developer | .NET Core | Angular | SQL Server

Email: abhij2906@gmail.com | Mobile: 7905412360 | Location: Gurugram, India | LinkedIn: linkedin.com/in/abhinav-mishra-44b46a1ba

PROFESSIONAL SUMMARY

Full Stack Software Developer with 4+ years of experience working as an Individual Contributor on enterprise and manufacturing domain applications. Strong expertise in ASP.NET Core, C#, Angular, and SQL Server with hands-on experience in REST API development, database design, and end-to-end project delivery including requirement analysis, development, testing, and deployment.

TECHNICAL SKILLS

- 1 Backend: ASP.NET Core, ASP.NET MVC, C#, Web API
- 2 Frontend: Angular, HTML, CSS, JavaScript, jQuery
- 3 Database: SQL Server (Joins, Subqueries, Performance Optimization)
- 4 Tools: Visual Studio, Git, Postman
- 5 Cloud Exposure: Azure App Service (Deployment), Azure SQL (Basic)

WORK EXPERIENCE

Executive Software Development – Bry-Air Asia Pvt Ltd (May 2023 – Oct 2025)

- 1 Worked as a sole developer and individual contributor for internal manufacturing applications.
- 2 Designed and developed REST APIs using ASP.NET Core and C# for industrial calculation systems.
- 3 Developed Angular-based frontend modules including forms, validations, and result visualization.
- 4 Designed and maintained SQL Server databases including complex joins and subqueries.
- 5 Handled end-to-end development lifecycle: requirement gathering, development, testing, deployment, and support.

Software Engineer – Comvision India Pvt Ltd (Aug 2022 – May 2023)

- 1 Worked on toll management web applications for Bahrain and Saudi Arabia.
- 2 Developed backend modules using ASP.NET Core and SQL Server.
- 3 Implemented role-based access control and transaction management features.
- 4 Collaborated with cross-functional teams to deliver production-ready solutions.

ASP.NET Software Developer – Matrix Processing House (Jan 2021 – Aug 2022)

- 1 Developed procurement and gate entry pass applications using ASP.NET Core.
- 2 Designed SQL Server database schemas and optimized queries.
- 3 Worked directly with clients for requirement understanding, testing, and delivery.

KEY PROJECTS

Industrial Calculator Application – Manufacturing Domain

- 1 Developed a web-based calculator to recommend dehumidifier models based on industry, location, and environmental inputs.
- 2 Built backend calculation logic using ASP.NET Core and exposed REST APIs.
- 3 Integrated Angular frontend with APIs and managed SQL Server data operations.
- 4 Delivered the project independently as an individual contributor.

Eco Dri Selection Tool

- 1 Developed a rotor selection system based on temperature, airflow, and moisture conditions.
- 2 Implemented backend services using .NET Core Web API.
- 3 Designed frontend components using Angular and managed SQL Server database.

KFCA Toll Management System

- 1 Worked on toll-based web application for user, transaction, and pass management.
- 2 Developed backend modules using ASP.NET Core and SQL Server.
- 3 Implemented role-based access control and transaction workflows.

EDUCATION

B.Tech – Tulas Institute, Dehradun (2020)
