SUMMARY

Results-driven Data Analyst with 4+ years of experience in SQL, Python, Power BI, and enterprise analytics, delivering data-driven insights and scalable reporting solutions across retail, telecom, and enterprise BI environments. Proven expertise in dashboard development, KPI reporting, exploratory data analysis, data transformation, and workflow automation. Experienced in analyzing large datasets, optimizing reporting processes, and building interactive dashboards that improved operational efficiency and business decision-making. Strong background in SQL analytics, Python-based analysis, Power BI reporting, and stakeholder management.

EXPERIENCE

Data Analyst

Impetus Via Advayan Technologies

September 2025 - March 2026, Gurugram

- Led migration of enterprise Tableau and MicroStrategy reports to Power BI, improving reporting consistency, dashboard usability, and KPI standardization.
- Built scalable reporting datasets supporting self-service analytics and standardized business reporting across multiple teams.
- Developed interactive Power BI dashboards enabling business stakeholders to monitor operational and performance KPIs in real time.
- Created advanced DAX calculations and optimized reporting logic, improving dashboard responsiveness and reducing refresh delays.
- Performed data validation, reconciliation, and quality checks ensuring high reporting accuracy across enterprise datasets.
- Collaborated with cross-functional stakeholders to gather business requirements and deliver data-driven analytical solutions.
- Collaborated with reporting teams to maintain secure and accurate access to business reporting datasets.
- Supported reporting documentation and data validation initiatives to improve reporting reliability and consistency.

Data Analyst

Infinite Analytics

March 2025 - August 2025, Mumbai

- Developed and maintained 10+ interactive Power BI dashboards delivering automated insights for retail and real-estate clients.
- Built centralized reporting datasets integrating 500k+ rows/month from marketing platforms using automated ETL workflows.
- Performed exploratory data analysis, statistical analysis, and trend analysis using Python to identify customer behavior patterns, campaign effectiveness, and revenue growth opportunities.
- Reduced manual reporting effort by 40% through automation and optimized data preparation workflows.
- Designed KPI reporting layers enabling standardized business reporting and performance tracking across multiple clients.
- Ensured data accuracy and consistency across multiple sources including Meta Ads, Google Ads, and HubSpot.
- Created executive dashboards and visual reports supporting strategic decision-making and operational planning.

Associate Software Engineer

Tech Mahindra Ltd

November 2021 - February 2025, Gurugram

- Developed ETL workflows using SQL and Python to prepare analytical datasets for reporting and dashboard development.
- Automated recurring reporting processes improving operational efficiency and data availability.
- Supported enterprise data migration projects ensuring data validation and reconciliation across systems.
- Built datasets supporting business intelligence reporting and dashboard visualization.
- Applied data quality checks and validation rules to maintain reporting reliability.
- Collaborated with cross-functional stakeholders to translate business requirements into analytical solutions.

SKILLS

- **BI & Visualization:** Power BI, DAX, Power Query, Tableau, Apache Superset, KPI Reporting, Dashboard Development, Data Storytelling, Drill-through Analysis, Row-Level Security (RLS), Semantic Modeling, Data Modeling
- **Cloud & Tools:** AWS (S3, Athena), Snowflake (Basic Exposure), Excel, PowerPoint, JIRA, Git, Alteryx, Power Automate, Chatgpt & claude(analytics workflows)
- **Data Analytics & Programming:** SQL (Joins, CTEs, Window Functions, Aggregations), Python (Pandas, NumPy, Matplotlib), Exploratory Data Analysis (EDA), Statistical Analysis, Trend Analysis, Data Wrangling, Data Cleaning & Transformation, Predictive Analytics, ETL & Data Transformation, Data Validation & Profiling

PROJECT

BI Reporting Modernization

Impetus • September 2025 - March 2026

- Migrated 50+ legacy reports from Tableau and MicroStrategy to Power BI.

- Reduced dashboard refresh time by ~30% through optimized data models and DAX calculations.
- Improved reporting consistency and KPI standardization across business teams.
- **Tech Stack** : Power BI, SQL, DAX, Tableau, MicroStrategy

Customer Footfall & Marketing Analytics

Infinite Analytics • March 2025 – September 2025

- Built a multi-touch attribution dashboard analyzing customer engagement across marketing funnel stages.
- Developed clustering models on visitation datasets to identify high-performing Points of Interest (POIs).
- Improved marketing optimization and reduced ineffective campaign spend by 22%.
- Applied statistical analysis and trend analysis using Python libraries.
- **Tech Stack**: Python, Pandas, NumPy, Power BI, SQL

Telecom Customer Churn Analysis

Tech MahindraLtd • January 2023 – September 2024

- Performed exploratory data analysis on telecom customer datasets to identify churn behavior and customer retention patterns.
- Built Power BI dashboards visualizing churn trends, customer segments, and usage behavior.
- Applied SQL and Python analysis techniques to generate actionable business insights supporting proactive customer retention strategies.
- **Tech Stack**: Python, SQL, Power BI

CERTIFICATIONS

Power BI & Data Analytics Certifications

Bosscoder Academy • 2025

SQL & Python

Tech Mahindra • 2022

AWS Cloud Practitioner

AWS • 2022

EDUCATION

Bachelor's Of Engineering

National Power Training Institute • Nagpur • 2020 • 8.07
