Senior Program & Delivery Lead with 19+ years' experience driving enterprise digital transformation and RPA programs. Expert in governance, cross-functional leadership, and delivering strategic, high-impact initiatives.

PROFILE SUMMARY

- Extensive experience in Digital Transformation, Intelligent Automation / Robotics Process Automation working with leading Automation tools- Automation Anywhere, Blue Prism, UiPath, PowerAutomate, OCR, and Gen AI & Agentic AI etc.
- Owned full project lifecycle including scope definition, planning, scheduling, resourcing, budgeting, execution, risk management, and closeout.
- Managed requirements gathering, solution design, development, testing, deployment, and transition to operations.
- Accountable for end-to-end delivery of strategic programs, overseeing governance, execution, benefits realization, and long-term value creation.
- Led RPA presales engagements from discovery to deal closure for enterprise clients.
- Led and supported creation of reusable GBS transformation assets and accelerators, including maturity models, benchmarks, and strategic POVs for enterprise transformation programs.
- Led end-to-end GBS digital transformation programs across Finance, HR, and Supply Chain functions, driving shift from transactional services to value-driven operations.
- Led and comprehension of Finance (P2P, O2C, R2R), HR (H2R), IT (Service Desk), Customer Ops (Order Management), Master Data Management, and IT Ops.
- Led technology selection and vendor evaluation for RPA, AI, BPM, and reporting tools.
- Designed and implemented GBS Target Operating Model (TOM) covering service scope, governance, delivery model, and technology roadmap.
- Defined automation roadmaps and phased adoption strategies during presales.
- Led client discovery sessions to uncover automation pain points, success criteria, and buying drivers.
- Created tailored RPA demos and PoCs mapped to client use cases, significantly improving deal conversion.
- Delivered executive-level presentations articulating automation ROI, business outcomes (Quality, Effort & FTE Optimization), and implementation approach.
- Owned effort estimation, pricing inputs, and licensing guidance in coordination with sales and product teams.
- Responded to RFPs/RFIs with compelling solution narratives, architecture diagrams, and commercial assumptions.
- Addressed security, compliance, scalability, and governance concerns during customer evaluations.
- Supported deal closure activities, including technical clarifications, scope finalization, and risk mitigation.
- Led enterprise-level programs and projects, consistently delivering within scope, schedule, and budget.
- Directed cross-functional team members across operations, engineering, product, finance, and external vendors.
- Established program governance frameworks, reporting cadences, and KPIs to improve visibility, accountability, and decision-making.
- Developed and maintained integrated program roadmaps, managing interdependencies across multiple concurrent initiatives
- Partnered with executive stakeholders to align project outcomes with strategic business objectives and long-term growth plans.
- Implemented risk management strategies that reduced delivery delays.
- Led Agile and hybrid delivery models, improving team velocity, transparency, and stakeholder satisfaction.
- Managed budgets, forecasts, and resource allocation, optimizing spend while maintaining delivery quality.
- Led change management efforts to ensure smooth adoption of new systems, processes, and operating models.
- Negotiated and managed vendor contracts, SLAs, and performance reviews to ensure service quality and cost efficiency.
- Mentored and coached project managers, improving team capability, consistency, and delivery maturity.
- Established RPA best practices, coding standards, and reusable frameworks to improve development quality and speed to market.
- Led solution design reviews, ensuring automations met performance, security, and compliance requirements.
- Integrated RPA solutions with enterprise systems (ERP, CRM, legacy applications, APIs, databases, and web applications).
- Partnered with infrastructure, security, and platform teams to design resilient, scalable RPA environments.

LAST 5 CAREER TIMELINE

Oct-2023	-	Nov-2025		Manager		KPMG
Jul-2021	-	Sep-2023		Senior Manager		HCL Tech
Jul-2019	-	Jul-2021		Senior Consultant		EY
Apr-2016	-	Jul-2019		Solution Architect		Sailfin Technologies
Jul-2008	-	Apr-2016		Technical Manager		MobiQuest Mobile Technologies (Paytm)

PROFESSIONAL SUMMARY

KPMG (Oct 2023 – Nov 2025)

Client: Leading Public Sector Bank

Project 1: Enterprise Digital Transformation and Automation Program

Project Description: Led a large-scale digital transformation initiative for a leading Public Sector Bank (PSB) aimed at modernizing legacy operations, improving customer experience, and enhancing operational efficiency through automation and digital platforms. The program focused on transforming end-to-end banking processes across Retail Banking, Corporate Banking, and Back-Office Operations using digital technologies such as workflow automation, data analytics, AI-driven decisioning, and omni-channel platforms.

Client: Leading Telecom Company

Project 2: Enterprise Digital Transformation and Automation Program

Project Description: Delivered a large-scale digital transformation and intelligent automation program for a leading telecom operator to modernize operations, enhance customer experience, and drive cost efficiency across Customer Service, Network Operations, Sales, and Finance. The initiative focused on digitizing legacy, manual, and siloed processes by implementing workflow automation, AI-driven decisioning, analytics, and RPA, enabling faster service delivery, improved SLA adherence, and scalable digital operations.

Client: Major Indian Airport

Project 3: Digital Transformation & Intelligent Automation on Newgen Software Platform

Project Description: Executed an enterprise-wide digital transformation and process automation program for a leading airport operator in India, aimed at modernizing operational workflows, improving passenger experience, and ensuring regulatory compliance using the Newgen BPM, ECM, and OmniDocs platform.

Overall Roles and Responsibility in KPMG

- **Led Design and Architecture Sessions:** Directed and participated in design and architecture sessions with clients, gathering and documenting business processes and requirements to develop effective automation solutions.
- **Captured and Delivered Business Requirements:** Identified and translated stated and unstated business requirements into actionable deliverables, ensuring alignment with client objectives and project goals.

- Coordinating with various specialist teams to deliver complex solutions, facilitating collaboration and ensuring all project components were effectively integrated.
- Conducting in-depth feasibility analyses of processes from an Intelligent Automation perspective, recommending improvements and technology interventions to enhance client operations and drive efficiency.
- Led enterprise-wide GBS transformation and solutioning initiatives, designing target operating models across Finance, HR, Procurement, and IT services to drive cost optimization and service excellence.
- Defined multi-year GBS roadmap aligned with business strategy, delivering productivity improvement through process re-engineering, automation, and digital enablement.
- Partnered with CXOs and business leaders to shape GBS vision, governance, and operating framework.
- Led Automation & Transformation and comprehension of processes related to -
 - AP (Vendor master and configuration, Purchase Order creation, Invoice reconciliation), AR (Customer master and configuration, Payment processing, receivable reporting), FinOps (Reconciliations, Manual Journal entries, Master Data Management, Fixed Asset management), HR (hire to retire, Chatbot), ITOps (operations monitoring, IT Tickets, system health, user account setup, asset requests, license management, software audits, migration and validation, anomaly detection and audit logs, etc.)

HCL Technologies (Sep 2021 – Oct 2023)

Client: Leading Private Sector Bank

Project 1: Enterprise Digital Transformation and Automation Program

Project Description: Delivered an enterprise-wide digital transformation and automation program for a leading private sector bank in India to modernize core banking operations, improve customer experience, and enhance operational efficiency across Retail Banking, and Corporate Banking. The initiative focused on digitizing high-volume, manual, and compliance-heavy processes by implementing workflow automation, RPA, AI-based decisioning, and analytics, enabling straight-through processing (STP), faster turnaround time (TAT), and improved risk control..

Overall Roles and Responsibility in HCL

- Project governance including day-to-day management like delivery and resolution of risks and issues.
- Actively involved in identifying business opportunities for potential automaton and Digital Transformation engagements with clients.
- Identify customer requirements, analyze, and provide solutions or recommendations.
- Analyze the process plan, helping team to design the Automation and Digital solution as per the standard design principles.
- Developed comprehensive GBS solution architectures that incorporate shared services, automation (RPA/AI), and analytics to improve scalability and enhance customer experience.
- Created business cases and value hypotheses for GBS initiatives, resulting in quantifiable advantages in cost savings, cycle time, and quality.
- Directed the solutioning process for transitions and migrations from decentralized operations to GBS hubs.
- Managed project to ensure all risk and issues are identified and mitigated.

Ernst & Young LLP (July 2019 – Sep 2021)

Position: Sr. Consultant

- Assisted clients in setting up an automation CoE with robust governance and framework for the entire life cycle of automation projects.
- Created solution design documents and technical specifications for automation projects functions across Banking and Finance, HR, logistics, sales & marketing, IT Ops.

- Developed test plans and implemented IT security solutions on UAT servers.
- Lead design and architecture sessions with the clients.
- Managed client stakeholders' expectations and escalations.
- Incorporated digital transformation technologies (RPA, workflow, GenAI, analytics) into GBS processes to facilitate seamless operations and enhance service delivery.
- Developed reusable GBS transformation resources, accelerators, and benchmarks to standardize solutions and minimize time-to-value.
- Promoted the use of process mining and value stream mapping to uncover opportunities for automation and simplification.
- Created tool for audit, transaction & error log.

Sailfin Technologies Pvt Ltd (Apr 2016 – Jul 2019)

Position: Solution Architect

- Establish the GBS governance framework, service management structure, and performance dashboards utilizing SLAs, KPIs, and experience metrics.
- Directed cross-functional teams across various regions to implement GBS transformation programs from the design phase to stabilization.
- Oversaw risk management, change processes, and stakeholder alignment for extensive transformation initiatives.
- Reviewed the project estimates and assumptions, project timelines and schedules.
- Provided technical expertise and issue resolution.
- Designing reusable components to save cost and time.
- Created BOT monitoring tool.
- Project Lead and worked as a focal for RPA projects.

MobiQuest Mobile Technologies (Jul 2008 – Apr 2016)

Position: Technical Manager

- Spearheaded end-to-end GBS solution design enabling global standardization, cost efficiency, and superior service experience.
- Mentor team members & take up technical issues raised by team.
- Handled End to End deliverables.
- Responsible for PoC of Sales & Marketing product. (Loyalty program)
- Created Loyalty platform & customer acquisition engine.

TECHNICAL SKILLS

- **Automation Tools:** Automation Anywhere, UiPath, Blue Prism, PowerAutomate and Agentic AI
- **Programming & Development:** .NET, SharePoint and Microsoft Dynamics CRM
- **Project and Program Management:** Agile Methodologies, Risk and Issue Management, Project Governance, JIRA, Confluence and DevOps
- **Process Documents:** Project Charter, Solution Design Documents (SDD), Technical Specifications (TDD), Test Plans, SOP, PDD and BRD etc.
- **Others:** ABBYY and SQL etc.

EDUCATION DETAILS

MBA (Finance) from IASE University in 2012 (Part Time)

MCA from Uttar Pradesh Technical University in 2004 (Full Time)

B.Sc. Maths from Dr. RML Awadh University in 2001 (Full Time)

CERTIFICATIONS

- Agentic Process Automation Leader Masterclass
- Agentic Process Automation Developer Masterclass
- Professional Scrum Master (PSM)
- ServiceNow - Fundamental
- Data Science Fundamentals with Python
- ABBYY – Advanced Professional (OCR)
- Automation Anywhere – Master RPA Professional
- Microsoft Dynamics CRM
- MCTS Certified Professional - SharePoint
- MCTS Certified Professional - .NET
