ASHISH KUMAR YADAV

Senior Data Scientist | Supply Chain & MLOps Specialist | New Delhi

8077586754 | ashish854380@gmail.com | ashish-kumar-yadav-8199a2142

1. PROFESSIONAL SUMMARY

Strategic Data & Machine Learning Professional with 6+ years of experience driving business transformation through advanced analytics across **Supply Chain & Logistics (3PL), Banking/BFSI, and E-commerce ecosystems**. Possess 5+ years of hands-on expertise in predictive modeling, regression analysis, credit risk scoring, loan eligibility modeling, customer segmentation, and demand forecasting.

Experienced in architecting scalable ML solutions using Python, MLOps frameworks, and Cloud Platforms (GCP/Azure), enabling data-driven decision-making across financial risk management, supply chain optimization, and digital commerce growth strategies. Proven ability to convert complex data landscapes into structured, automated, and governance-aligned analytical systems delivering tangible ROI.

2. CORE SKILLS & EXPERTISE

Programming & MLOps	**Data & Cloud Technologies**	**Methodologies & Soft Skills**
Python (Pandas, NumPy, Scikit-learn)	**SQL** (MySQL, Oracle SQL, BigQuery)	**Leadership & Mentorship**
Machine Learning, Deep Learning (RAG)	**Cloud Platforms** (GCP, Azure L1, AWS L1)	**Data-driven Problem Solving**
Automation, Web Scrapping, MLOps	**Data Visualization** (Power BI)	**System Design & Architecture**
Project Management (Jira), Git/GitHub	**Big Data** (Conceptual knowledge)	Stakeholder Management

---

3. PROFESSIONAL EXPERIENCE

DATA SCIENTIST (Assistant Manager)

Drona Logitech | *Dec 2024 – Present*

- Engineered and deployed an **end-to-end ML-driven automation system** using Python to process complex Uniecomrce, Eshopbox, P&L,YMS, TMS and SAP data

files, resulting in an estimated **30% reduction in manual data processing time** and boosting system efficiency.
- Designed and implemented a **centralized data management system** for 3PL supply chain and warehouse operations, providing a single source of truth for all projects and IT teams.
- Led the monitoring of e-commerce website order statuses, SLA breaches, and order pendency, applying data analytics to ensure **optimal logistics efficiency and service delivery**.

DATA SCIENTIST

TATA Consultancy Services (TCS) - Client: Lloyds Banking Group | *Feb 2022 – Dec 2024*

- Developed and deployed multiple high-impact regression and predictive modeling solutions using Python (Scikit-learn, XGBoost) to generate actionable financial risk insights and improve client-level decision-making accuracy.
- Designed and implemented a **Credit Score Prediction Model** using customer transaction behavior, repayment history, utilization ratio, and income patterns, achieving improved risk segmentation and default prediction accuracy.
- Built an intelligent **Loan Offer Recommendation System** that analyzed customer credit score, credit card usage patterns, repayment capacity, and transaction volume to recommend personalized loan products (e.g., personal loan, credit line enhancement, business loan), increasing targeted offer efficiency
- **Automated daily, weekly, and monthly data collection and reporting processes** using Python and SQL, leading to an estimated **15 hours of saved weekly manual effort** and ensuring high data accuracy.
- Applied advanced data mining algorithms and statistical analysis to solve complex business problems, directly contributing to departmental efficiency goals.
- Collaborated with cross-functional teams (risk, finance, product, and business stakeholders) to define analytical requirements, identify high-value data sources, and design scalable data architectures for mission-critical financial reporting systems.

DATA SCIENTIST

Seabird Logisolution – Data & Automation | *Apl 2021 – Feb 2022*

- Engineered and deployed an **end-to-end ML-driven automation system using Python** to process complex datasets sourced from **SAP systems and Operations teams**, significantly reducing manual data processing efforts by **~30%** and improving overall system efficiency.

- Designed and implemented a **centralized data management framework** for **3PL supply chain and warehouse operations**, establishing a **single source of truth** across finance, operations, and IT teams for accurate and consistent reporting.

- Automated ingestion, validation, and transformation of **SAP operational data, warehouse reports, and field-level operational inputs**, enabling faster decision-making and minimizing data discrepancies across logistics workflows.

- Led monitoring and analysis of **e-commerce and logistics order lifecycles**, including **order status tracking, SLA adherence, breach identification, and pendency analysis**, to ensure smooth service delivery and operational excellence.

DATA ANALYST/SUPPORT ENGINEER

NIIT LIMITED | *May 2019 – Apl 2021*

- Provided L1 level working support to the Hosting team, managing network and server health (e.g., Sys. Logs, Event Logs, Hardware Health).
- AWS and Azure cloud infra support of some services.
- Monitored IT infrastructure and services using tools like **Pingdom and Op-Manager** to ensure high uptime and proactively address potential issues.
- Gained foundational experience in data handling and processing while assisting in basic data analysis tasks.

4. EDUCATION & TRAINING

Degree / Certification	**Institution**
Master of Technology (M.Tech), Computer Science & Engineering	AKTU, Lucknow, U.P.
Bachelor of Technology (B.Tech)	Institute of Engineering & Technology, Agra, U.P.
Python Language Training (20 Aug 2019 – 10 Dec 2019)	ABC for TECHNOLOGY TRAINING
SQL Language Training (10 Jun – 20 Jul 2018)	B2ECODER TRAINING INSTITUTE
Core Java Language Training (10 Jun – 05 Aug 2018)	B2ECODER TRAINING INSTITUTE

5. PERSONAL INTERESTS

- Music, Photography, Traveling, Organizing Events (Showing personality and work-life balance)
