AKSHAT SURI

+91-9811991059 ◆ suriakshat2001@gmail.com ◆ Noida, UP ◆ LinkedIn

PROFILE SUMMARY

Innovative AI/ML Engineer with experience in developing intelligent solutions across generative AI, machine learning, NLP, fine tuning, and predictive analytics. Delivered production-grade systems including a LangChain-based enterprise chatbot, a resource utilization forecasting dashboard and an NLP-driven job-matching platform. Expertise in integrating LLM agents, fine tuning ML models and deploying them using Docker and MLOps practices. Adept at translating requirements into scalable AI applications. Ability to enhance decision-making, automate workflows, and improve end-user experiences.

KEY SKILLSET

AI Agent Development | Agentic AI | Azure Open AI | Fine Tuning | RAG | NLP | Neural Networks | Prompt Engineering | Time-Series Forecasting | Image Preprocessing | Data Analysis and Visualization | Git | SQL | API Development Integration | ML Model Deployment | Model Versioning and Control | Docker | Azure DevOps | MLOps Implementation | Vector Databases | ML Pipeline Construction | Model Training

TECHNICAL SKILLS

Programming Languages and Libraries: Python, Pandas, NumPy, Matplotlib, Scikit-learn
Frameworks and Libraries (AI/ML and DL): TensorFlow, PyTorch, Keras, Transformers
Generative AI and LLM Ecosystem: LangChain, LangGraph, Azure Open AI, LLM Agents, Gen AI Tools, Prompt Engineering, RAG, Vector Databases, Fine Tuning
Machine Learning / Data Science: Machine Learning Pipelines, NLP (Natural Language Processing)
MLOps and DevOps Tools: Git, Docker, MLOps, Azure DevOps
Web Frameworks: FastAPI, Django, Flask, React, JavaScript

EDUCATION

B. Tech. in Computer Science and Engineering | JSS Academy of Technical Education, Noida, UP | 80% | 2019 – 2023

Senior Secondary | Bal Bharti Public School, Noida, UP | 88% | 2018 - 2019

Certifications: Python for Data Science – IBM || Data Science Methodology – IBM || Data Analytics Specialization – Google || Master's in Data Science – Croma Campus

PROFESSIONAL EXPERIENCE

AI/ML Developer | In2IT Technologies Pvt. Ltd., Noida | May 2024 – Present

- Developed and deployed an AI chatbot for automated, multi agent support across various service families such as HR, IT, and Infrastructure domains.
- Built a system resource utilization forecasting system using time-series ML pipelines, improving infrastructure resource planning and predictive accuracy.
- Designed a productivity analysis pipeline that correlated user activity logs and system interaction signals with task data from Azure DevOps, enabling data-driven productivity scoring and behavioural insights.

Python Developer | Brain Technosys Pvt. Ltd., Noida | Jan. 2024 – Apr. 2024

- Developed an NLP-driven feature using SpaCy to connect blue-collar suppliers and clients based on skills, tools, and language parameters.
- Engineered precision algorithms for job-candidate alignment to significantly boost platform match accuracy.
- Utilized Git for source control and Docker for replicable local environments, ensuring stable development and streamlined deployments.

Data Science Intern | Xapotech Systems Pvt. Ltd., Noida | Jun. 2023 – Dec. 2023

- Designed and trained a neural network in TensorFlow for accurate animal classification based on visual features.
- Optimized image inputs through advanced preprocessing and deep learning techniques, resulting in improved classification accuracy and enhanced model robustness.
- Implemented MLOps practices for versioning and testing, ensuring reliable deployment and continuous model improvement.

PROJECTS HANDLED

ProServeBot | *In2IT Technologies Pvt. Ltd.*
AI-Powered Service Bot for HR, IT and Infrastructure Support

- Developed a multi agent AI chatbot using frameworks such as LangChain and LangGraph to deliver multi-domain support across different service families in an organization.
- Integrated vector databases to enable semantic search and contextual response generation (RAG) for enhanced user interactions and issue resolution.
- Implemented fine tuning to improve performance and accuracy.

ProWatch | *In2IT Technologies Pvt. Ltd.*
Rescource Utilization Forecasting and productivity Analysis

- Developed a resource utilization prediction system using time series forecasting models to forecast resource utilization based on app usage to improve system performance.
- Integrated scalable time-series models such as XGB Regressor, AutoTS for real-time forecasting of resource consumption across CPUs, GPUs and better memory management to enhance infrastructure optimization.
- Built a productivity tracking system that mapped user activity and user status to tasks in Azure DevOps to provide clear, data-driven performance insights.

SkillConnect | *Brain Technosys Pvt. Ltd.*
NLP-Driven Job Portal for Blue-Collar Workforce

- Engineered a job-matching engine using NLP (Spacy) to pair clients and workers based on key criteria such as skills, age, language, and work type.
- Developed custom matching algorithms, improving match accuracy and platform efficiency.

Animind | *Xapotech Systems Pvt. Ltd.*
Animal Classification Platform Using Deep Learning

- Built a neural network model using TensorFlow for image-based animal classification, applying advanced image preprocessing techniques.
- Leveraged MLOps tools for model versioning, testing, and continuous improvements.
