AMAN CHAUHAN

Senior Data Scientist | AI/ML Engineer | GenAI Specialist

Sector 62, Noida | +91 6387852088 | amanchauhan63515@gmail.com | Linkedin

PROFESSIONAL SUMMARY

Results-driven Senior Data Scientist with 3+ years of experience delivering end-to-end AI/ML solutions. Proven track record of architecting and deploying production-grade machine learning systems that deliver measurable business impact — including a 92% accurate sales forecasting engine, a GenAI-powered student query system that cut manual support workload by 48%, and an AI-driven LMS that boosted student engagement by 35%. Adept at leading cross-functional teams, translating complex data into actionable insights, and scaling AI products from prototype to production.

KEY SKILLS

Languages & Libraries: Python, SQL, Pandas, NumPy, SciPy, Scikit-learn, TensorFlow, Keras, NLTK
ML / DL Frameworks: XGBoost, LightGBM, GBM, ANN, CNN, RNN, LSTM, Transformers (NLP)
GenAI & LLMs: LangChain, OpenAI GPT, Google Gemini, Vertex AI, GitHub Copilot
Data Visualization: Power BI, Matplotlib, Seaborn, Plotly
Deployment & APIs: FastAPI, REST APIs, React.js (frontend integration)
Databases & Cloud: RDBMS, Pinecone (Vector DB), AWS, GCP
Version Control: Git, GitHub
Core Competencies: Predictive Modeling, Feature Engineering, NLP, Clustering, Dimensionality Reduction, A/B Testing, EDA

WORK EXPERIENCE

Senior Data Scientist | skilledUp Technology | *Aug 2025 – Present*

- Lead a cross-functional team of 4 (2 SDEs + 2 Data Scientists) to deliver end-to-end AI/ML solutions — from ideation and data analysis through to production deployment.
- Architect predictive sales forecasting models by mining user behavioral patterns and seasonal trends, achieving 92% accuracy using XGBoost and LightGBM.
- Oversee model development lifecycle including API integration and scalable deployment of AI products within LMS platforms.
- Engineered a GenAI-powered Student Query Resolution System using LangChain and OpenAI GPT that reduced manual support workload by 48% and improved real-time response efficiency by 60%+.
- Drove a 25%+ improvement in operational decision-making efficiency through AI-driven analytics dashboards and automated reporting pipelines.

Data Scientist | skilledUp Technology | *Jan 2024 – Jul 2025 (1 yr 7 mos)*

- Delivered production-ready ML models for Sales Forecasting, HR Analytics, Student Churn Prediction, and Course Recommendation, achieving up to 88%+ prediction accuracy using GBM and XGBoost.
- Designed and deployed an AI-Powered Adaptive LMS integrating Transformer-based NLP, ANN architectures, and LangChain — increasing student engagement by 35% and learner completion rates by 32%+.
- Built and optimized deep learning models (ANN, CNN, RNN, LSTM) on structured and unstructured datasets, yielding a 27%+ uplift in model performance.
- Applied K-Means and Hierarchical Clustering for student and course segmentation, improving targeted engagement strategies and boosting retention rates by 18%+.
- Reduced model training time by 33%+ and improved clustering efficiency by 24%+ through PCA-based feature optimization and dimensionality reduction.
- Delivered 50+ live training sessions on Python, Data Science, ML, and AI using project-based learning methodologies.

Data Science Trainee | skilledUp Technology | *Jan 2023 – Dec 2023 (1 yr)*

- Performed end-to-end data preparation — cleaning, transforming, and structuring educational datasets — improving data quality for student performance and course completion analysis.
- Conducted exploratory data analysis (EDA) on student engagement and performance datasets to uncover learning patterns, dropout risks, and progress trends.
- Supported development of ML models for student performance prediction and personalized course recommendations.
- Collaborated cross-functionally with instructors and product teams to align data insights with curriculum design and learning outcomes.
- Documented analytical findings and delivered weekly insight reports to senior management, enhancing data-driven decision-making.

KEY PROJECTS

AI-Driven Quarterly Sales Forecasting & Revenue Optimization System

- Built an end-to-end sales forecasting pipeline using Python, XGBoost, and LightGBM with advanced feature engineering and seasonal decomposition — achieving 92% forecasting accuracy.
- Deployed the model via FastAPI REST API and integrated with a React.js dashboard for real-time revenue insights and business intelligence support.
- Stack: Python · Pandas · Scikit-learn · XGBoost · LightGBM · FastAPI · React.js

AI-Powered Adaptive Learning Management System (LMS)

- Designed a full-stack intelligent LMS leveraging Transformer-based NLP, ANN models, LangChain orchestration, and OpenAI API for context-aware query resolution and adaptive content delivery.
- Exposed model inference via FastAPI RESTful endpoints connected to a React.js frontend — enabling real-time, production-ready AI assistance at scale.
- Stack: Python · LangChain · OpenAI GPT · TensorFlow · FastAPI · React.js

EDUCATION

Bachelor of Technology (B.Tech) | APJ Abdul Kalam Technical University, Lucknow, UP | *2019 – 2023*

Open to Senior Data Scientist, ML Engineer, and AI/GenAI Engineering roles — Available for immediate joining
