OBJECTIVE

Seeking a challenging role in a forward-thinking organization where I can leverage my **1+ year of hands-on experience** in web development to contribute effectively to organizational growth. I am committed to continuously enhancing my skills while evolving professionally in a collaborative and goal-oriented environment. With dedication, adaptability, and strong technical knowledge, I aim to add value to a team that fosters innovation and growth.

TRAINING-
PHPWEBDEVELOPMENT

(CodingClaveDevelopmentLLP)

PHP is particularly well-suited for creating dynamic websites and web applications.
It allows developers to embed PHP code within **HTML, CSS, JavaScript, and Bootstrap**, enabling them to mix logic with presentation. This makes PHP relatively easy to learn and use. In web development, PHP is commonly used to interact with databases, manage sessions, handle form submissions, and perform various server-side tasks.

Position : Web Developer
Company : Webvoom Pvt Ltd.

- **Website Development:** Designed, developed, and maintained dynamic, responsive websites using WordPress and other development tools.
- **Team Collaboration:** Worked closely with cross-functional teams to create web applications that meet business objectives.
- **Content Optimization:** Managed and optimized website content to enhance user experience and improve performance.

SKILLS

- Strong understanding of **Web Analytics, user behavior tracking, and website performance analysis** using Google Analytics and Search Console.
- Experience in **SEO optimization, keyword analysis, and website ranking improvement** with a data-driven approach.
- Skilled in **HTML, CSS, JavaScript, Bootstrap, PHP & MySQL** for implementing and supporting analytics-friendly website structures.
- Hands-on experience with **WordPress and Shopify**, including responsive design, performance optimization, and conversion-focused layouts.
