

Anil Sharma

Sr Manager - Infrastructure, Enterprise Security & Cybersecurity

(+91) 9870670907
Mumbai, INDIA
anil.sharma1144@outlook.com
16 Years 0 Month of experience

PROFILE SUMMARY

Senior Infrastructure and Information Security Leader with 16+ years of experience in enterprise vulnerability management, regulatory compliance, and resilient IT operations. Expert in leveraging AI and Generative AI for risk-based remediation, audit automation, and predictive security. Proven CXO-level stakeholder engagement as primary SPOC for RBI and ISO audits, ISMS governance, and strategic vendor management. Holds an MBA in IT Operations and certifications including AWS Certified Security — Specialty (SCS-C02) and Certified Information Security Manager (CISM). Skilled in cloud security architecture, governance, risk management, and aligning security strategy with business goals to enhance cyber resilience and compliance maturity across hybrid and cloud environments.

KEY SKILLS

- IT Infrastructure Management
- Information Security
- Cism
- Application Development
- Infrastructure Management
- Cissp
- Ceh
- Leadership
- IT Management
- IT Security Management
- IT Risk Management
- SIEM
- IT Infrastructure Operations
- SOC
- Data Management
- Arficial intelligence
- Amazon Web Services Ec2
- Cloud Security
- Data Security
- Identity Access Management
- Security Engineering
- Security Controls
- Security Management

WORK EXPERIENCE

Sr Manager - Infrastructure, Enterprise Security & Cybersecurity

Equifax Inc

12-2022 - Present

Equifax Inc. is a leading financial services provider in India, delivering credit reports and scores to banks, BFSI institutions, and MFIs, operating under the regulatory framework of the Reserve Bank of India.

• **Enterprise Security & Vulnerability Management**

• Directed enterprise-wide Vulnerability Management Program across Windows, Linux, Unix, databases, on-prem data centers, and cloud platforms.

• Implemented AI-driven risk-based remediation frameworks leveraging predictive analytics, reducing false positives by 30% and improving

CERTIFICATION

- MCITP Issued by Microsoft
- Digisol cabling management certificate Issued by Digisol
- Policy and Vulnerability management Issued by Qualys
- ITIL Issued by AXELOS
- CEH (V10) Issued by EC Council
- ISO/IEC 27001-2022 Lead Auditor Issued by Exemplar Global
- AWS Certified Security Specialty Issued by Amazon Web Services

patch SLA compliance by 25%.
• Established automated patch orchestration and compliance tracking, increasing deployment success rate by 20%.
• **Security Operations Center (SOC) & Threat Management**
• Built and matured 24x7 SOC operations, enabling real-time threat detection, incident response, and threat hunting.
• Designed detection engineering use cases aligned with MITRE ATT&CK framework, integrating threat intelligence and behavioral analytics.
• Led implementation of SIEM & SOAR platforms including Splunk Enterprise Security, IBM QRadar, Microsoft Sentinel, ArcSight, LogRhythm, Palo Alto Cortex XSOAR, and Splunk SOAR to automate incident response and improve SOC efficiency.
• **Cloud Security & Governance (AWS)**
• Architected and governed enterprise cloud security framework on AWS, implementing services such as AWS Security Hub, GuardDuty, WAF, Shield, IAM, CloudWatch, and AWS Config.
• Ensured secure cloud adoption aligned with Zero Trust principles, CIS benchmarks, and regulatory requirements.
• **Data Center & Infrastructure Leadership**
• Led design and operations of highly available, fully redundant Tier III/IV data centers, supporting IaaS and PaaS environments with 24x7 uptime.
• Delivered Disaster Recovery (DR) and Business Continuity Planning (BCP) strategies ensuring minimal downtime and operational resilience.
• Drove capacity planning, performance optimization, and AI-driven operational insights, improving infrastructure efficiency by 15%.
• **Regulatory Compliance & ISMS Governance**
• Served as Primary SPOC for RBI and ISO/IEC 27001:2022 audits, managing end-to-end audit lifecycle including governance, risk assessment, evidence management, and remediation.
• Architected and governed Information Security Management System (ISMS), defining policies, controls, and enterprise security frameworks.
• Leveraged Generative AI for compliance automation, reducing audit response time by 40%.
• **IT Strategy, Financial Planning & Vendor Management**
• Defined and executed enterprise IT infrastructure strategy and roadmap, aligning with

- Certified Information Security Manager (CISM) Issued by ISACA
- Diploma in computer

PROJECTS

Data Center Revamp, DR Site Setup & Cloud Transformation

662 Days

- Assess existing legacy DC infrastructure and applications. - Redesign DC architecture to align with hybrid and cloud-ready standards. - Develop robust DR strategy aligned with compliance requirements. - Define RTO/RPO objectives for critical applications and conduct DR simulations.

Cybersecurity Implementation Program — Axis Trustee

181 Days

- Led an end-to-end cybersecurity project to enhance security posture and ensure compliance. - Conducted comprehensive risk assessments and defined remediation roadmaps. - Implemented key security controls including SIEM and EDR tools.

Transformation on Cloud

304 Days

- Migrated applications from on-premises data centers to AWS. - Designed target cloud architecture for high availability and fault tolerance. - Implemented secure networking and performed cutover validations.

Enterprise Information Security Implementation Program — Axis Trustee

184 Days

- Conducted enterprise-wide information security risk assessments and defined security frameworks. - Established IAM policies with role-based access controls and managed implementation.

Data Center & Central Command Center Implementation

214 Days

business goals.
• Managed IT budgeting, cost optimization, and financial planning, ensuring ROI-driven investments.
• Led vendor governance, OEM partnerships, and techno-commercial negotiations, ensuring alignment with cybersecurity and infrastructure strategy.
• **Enterprise IT Operations & Workplace Services**
• Managed end-user computing, workplace services, and unified communication (UC) infrastructure, including AV systems.
• Oversaw enterprise data platforms and analytics ecosystems such as Azure Synapse, AWS Redshift, and Google BigQuery.

Key Achievements
• Reduced vulnerability false positives by 30% using AI-driven analytics
• Improved enterprise patch SLA compliance by 25%
• Increased patch deployment success rate by 20% through automation
• Reduced audit response cycles by 40% using Generative AI

Sr. Manager - Head of Information Security (InfoSec) & IT

Axis Trustees service limited
11-2019 - 12-2022

- Worked with Axis Trustee Services Limited, a subsidiary of Axis Bank, supporting finance domain platforms across debentures (NCDs), securitization, AIFs, REITs/InvITs, and escrow-based structured lending solutions.
- Defined and executed enterprise IT strategy and technology roadmap, aligning infrastructure, security, and application initiatives with business objectives in a regulated financial environment.
- Led end-to-end data center operations and cloud transformation, ensuring high availability, scalability, and resilience across critical systems with focus on IaaS/PaaS adoption and hybrid cloud architecture.
- Directed infrastructure and application delivery teams, driving secure software development, system integration, and cross-functional collaboration for high-quality and reliable platform delivery.
- Designed and implemented enterprise

- Implemented a large-scale control room with 3500+ CCTV cameras. - Managed system integrations for real-time monitoring and surveillance. - Enhanced physical security measures and operational efficiency.

cybersecurity strategy, covering network security, endpoint protection, vulnerability management, and SOC operations, strengthening overall security posture.

- Ensured regulatory compliance and governance aligned with Securities and Exchange Board of India guidelines and industry standards, including audit readiness, risk management, and control implementation.
- Established and operationalized incident response and crisis management frameworks, improving response time and minimizing business impact of security incidents.
- Led information security awareness and training programs, enhancing organizational security culture and reducing human risk factors.

Manager - Information Security & Cybersecurity

Secure Credentials Ltd

02-2017 - 02-2019

Led enterprise-wide information security governance, risk management, and compliance initiatives, ensuring alignment with industry standards and protection of critical business assets.

Key Responsibilities

Spearheaded the development and implementation of Information Security policies, standards, and procedures aligned with ISO/IEC 27001:2012 framework, ensuring organizational compliance and audit readiness.

- Acted as primary SPOC for client and regulatory audits, managing end-to-end audit lifecycle including gap assessment, evidence management, control validation, and remediation closure.
- Conducted comprehensive risk assessments, vulnerability assessments, and security reviews to proactively identify and mitigate cyber threats.
- Led and mentored a team of security professionals, driving capability enhancement and ensuring effective protection of sensitive and critical information assets.
- Integrated security controls into the Software

Development Life Cycle (SDLC), enabling secure application development and reducing vulnerabilities at early stages.

- Designed and delivered security awareness and training programs across the organization to strengthen security culture and compliance.
- Collaborated with cross-functional teams to implement risk mitigation strategies, security controls, and continuous monitoring mechanisms.

IT Executive

Bharat Diamond bourse

05-2012 - 02-2017

Led end-to-end delivery of large-scale IT infrastructure, data center, and integrated security projects for a high-security enterprise environment.

- Designed and implemented Primary Data Center and Disaster Recovery (DR) site, ensuring high availability and business continuity.
- Deployed 3500+ IP-based CCTV systems, 10,000+ device Fire Alarm System (Siemens panels), and 5000+ speaker PA system (Bose).
- Architected and implemented segmented network architecture across 14 towers, covering core, aggregation, and access layers for CCTV and enterprise security systems.
- Implemented physical security solutions including boom barriers, flap barriers, and access control systems.
- Delivered business center IT infrastructure and managed end-to-end project execution, ensuring on-time delivery.

Technical Support Engineer at Banking & ATM Operations

Tata Communications Transformation Services

01-2011 - 08-2011

Provided end-to-end technical support and maintenance for ATM networks across major public and private sector banks including State Bank of India, Bank of Baroda, Bank of India, IDBI bank, and other leading banks.

Key Responsibilities

Delivered L1/L2 technical support for ATM

machines including software installation, OS/image download, patch updates, and configuration management.

- Provided cash loading support and coordination with cash management teams, ensuring ATM uptime and operational continuity.
- Performed troubleshooting of hardware, network, and application issues, minimizing downtime and improving service availability.
- Managed incident handling, service reporting, and SLA tracking, ensuring timely resolution and compliance with banking standards.
- Coordinated with cross-functional teams (field engineers, vendors, and bank stakeholders) for issue resolution and preventive maintenance.
- Maintained strong client relationships with banking partners, ensuring high service quality and operational efficiency.

Technical Support Engineer at Banking & ATM Operations

Diebold Innovation

02-2010 - 01-2011

Provided end-to-end technical support and maintenance for ATM networks across major public and private sector banks including State Bank of India, Bank of Baroda, Bank of India, IDBI bank, and other leading banks.

Key Responsibilities

Delivered L1/L2 technical support for ATM machines including software installation, OS/image download, patch updates, and configuration management.

- Provided cash loading support and coordination with cash management teams, ensuring ATM uptime and operational continuity.
- Performed troubleshooting of hardware, network, and application issues, minimizing downtime and improving service availability.
- Managed incident handling, service reporting, and SLA tracking, ensuring timely resolution and compliance with banking standards.
- Coordinated with cross-functional teams (field engineers, vendors, and bank stakeholders) for issue resolution and preventive maintenance.

- Maintained strong client relationships with banking partners, ensuring high service quality and operational efficiency.

Senior Engineer

Digiphoto Entertainment Imaging (DEI)
02-2019 - 11-2019

- Planned and executed new projects, designing scalable network architectures to enhance system performance and reliability.
- Provided third-level technical support, resolving escalated issues promptly to minimize downtime and improve user satisfaction.
- Managed IT installations, ensuring strict compliance with regulatory frameworks and quality management standards.
- Implemented proactive issue management strategies to identify and mitigate potential risks before escalation.
- Coordinated vendor relationships to optimize service delivery and negotiate cost-effective contracts.
- Finalized project budgets, ensuring alignment with financial goals and efficient resource allocation.

Application Support Engineer - Banking & ATM Switch Operations

Opus software solution
08-2011 - 05-2012

Provided critical application and production support for leading banking clients including Allahabad Bank, State Bank of India, and RAKBANK Dubai, ensuring seamless operations of ATM switch and card management systems.

Key Responsibilities

- Delivered L2/L3 application support for ATM switch platforms, ensuring high availability and minimal downtime in production environments.
- Managed ATM card lifecycle operations including card/PIN generation, card activation, unblock requests, and transaction issue resolution.
- Investigated and resolved failed, incomplete, or incorrect financial transactions, ensuring customer satisfaction and compliance.
- Generated banking MIS and regulatory reports

from backend systems to support operational and audit requirements.

- Performed application monitoring, incident management, and root cause analysis (RCA) to proactively address system issues.
- Executed regular data backup (hot & cold backups) on tape drives, maintaining secure backup records and ensuring Disaster Recovery (DR) readiness.
- Coordinated data center operations, including deployment support, system health checks, and environment stability.
- Collaborated with cross-functional teams (network, database, and infrastructure) for issue resolution and system optimization.
- Managed database transaction validation and reconciliation for banking applications.
