Anirudh Dimri

Ai ML Engineer

+91-9068504081 | anirudhdimri926@gmail.com | Noida, INDIA | Experience: 1 Year 0 Month

AI Engineer at Data-Hat AI with expertise in Python and hands-on experience with frameworks such as LangChain, LangGraph, and TensorFlow. Skilled in working with vector databases, Retrieval-Augmented Generation (RAG), large language model (LLM) fine-tuning, and developing robust backend APIs. Demonstrated ability to design and implement scalable AI solutions, leveraging advanced machine learning techniques to drive innovation and optimize performance. Adept at collaborating cross-functionally to deliver impactful AI products in dynamic environments.

SKILLS

- Machine Learning
- Deep Learning
- Natural Language Processing
- Artificial Intelligence
- Python
- Neural Networks
- Data Science

WORK EXPERIENCE

Ai ML Engineer - Data-Hat AI **Mar 2025 - Oct 2025**

- Developed and implemented Agentic AI solutions leveraging Retrieval-Augmented Generation (RAG) techniques to enhance model accuracy and performance.

- Executed fine-tuning of machine learning models to optimize results for specific business applications.

- Designed and built robust APIs to support seamless integration of AI functionalities into existing systems.

- Utilized advanced frameworks including LangGraph, LangChain, and TensorFlow to develop scalable AI workflows.

- Managed and optimized Vector Databases to improve data retrieval speed by up to 30%.

- Led the end-to-end development of SaaS platforms, resulting in improved user engagement and a 20% increase in platform adoption.

INTERNSHIPS

Content generation, Varahe analytics **4 Months**

- Fine-tuned Large Language Models (LLMs) to enhance performance and accuracy in NLP tasks.

- Conducted comprehensive data analysis to extract actionable insights and optimize model outcomes.

- Utilized Google Cloud Platform (GCP) services to deploy, manage, and scale machine learning workflows efficiently.

PROJECTS

Fine tuning LLM **4 Months**

Fine tuned different large language models on custom data in order to build an efficient Ai Agent. Apart from this, through my internship journey I've worked with google cloud platform, prepared whatsapp bot for large scale analysis and promotions.

Movie Recommender System **30 Days**

I created a movie recommender System which suggests the user Similar content to the user search. It uses various tools and principles of machine learning.

Whatsapp chat Analyzer **61 Days**

This is a whatsapp chat analyzer tool, that takes the exported group chat as the input and provides a detailed analytics on the whatsapp group. Including metrics such as most active user, most active months of the group, most active user and etc. This project includes principles of Machine Learning, data analytics and web development.

EDUCATION

2024 **BCA | Computers**
Graphic Era University,
Dehradun
Pass
