To Whom It May Concern,

I am pleased to recommend **Mr. Anirudh Dimri** for professional opportunities in software development.

Anirudh worked under my supervision at **Data Hat Technologies Pvt. Ltd.** as an **AI Engineer** from **March 1, 2025, to October 30, 2025**. During this period, he contributed significantly to backend development, API integration, the creation of AI agents, and the implementation of solutions using vector databases. He was also responsible for debugging code, performing unit testing, and executing data preprocessing tasks.

Throughout his tenure, Anirudh demonstrated strong problem-solving abilities, clean and maintainable coding practices, and a solid understanding of backend logic and database systems. He collaborated effectively within the team, adhered to Agile development methodologies, and handled project responsibilities with sincerity and professionalism. His ability to learn quickly and adapt to new technologies was particularly noteworthy. He consistently met deadlines and maintained a disciplined, reliable work ethic.

I am confident that Anirudh will be a valuable asset to any organization, and I strongly recommend him for future opportunities in software development. Should you require any additional information, please feel free to contact me.
