SUMMARY

A self-driven Software Engineer with **3 years** of experience in developing high-performance web applications using **PHP, SQL**. Skilled in building scalable **backend systems**, implementing secure **role-based access control**, and contributing across the full **SDLC**. Strong team collaborator with a focus on clean code, performance optimization, and delivering reliable, impactful software solutions.

EDUCATION

Galgotias University, B.Tech in Computer Science : 7.3 CGPA — August 2019 – May 2023

N A S Inter College, Senior Secondary : 68% — April 2017 – March 2018

S D Inter College, Secondary : 73% — April 2015 – March 2016

EXPERIENCE

Software Developer, Globohub Slx – Meerut — August 2025 – Present

- Developed **core backend features** including order processing, currency handling, coupons, and pricing rules
- Built and integrated **admin panel functionalities** such as product, category, order, user, and coupon management.
- Implemented **end-to-end e-commerce workflows**, covering the entire user journey from cart management and checkout processing to secure order confirmation and **system-level order handling**.
- Created a **custom coupon/discount engine** supporting percentage, fixed-amount, and product-level rules using **Laravel framework**.
- Worked on **Laravel projects**, developing scalable backend systems, RESTful APIs, and implementing business logic using MVC architecture.

Software Developer, Samarth Egov – New Delhi — July 2024 – May 2025

- Developed and maintained web applications using **PHP (Yii2 Framework)** and **SQL**, contributing across the full software development lifecycle.
- Designed and implemented **Role-Based Access Control (RBAC)** and **Approval Hierarchy systems**, enhancing workflow efficiency and permission security.
- Optimized application performance and page speed using caching, query optimization.
- Built full-stack features by designing and integrating **front-end (HTML, CSS, JavaScript)**, **back-end logic (PHP)**, and **database schemas SQL**.
- Explored and implemented advanced features like **Job Queues** and **Dynamic PDF generation** for large-scale reporting.
- Worked in agile teams, collaborating with designers, testers, and backend engineers to deliver **high-quality**, **scalable software** within deadlines.

Software Engineer, Thinkway Industries Pvt Ltd – New Delhi — Jan 2023 – July 2024

- Collaborated in a team to build a healthcare web application allowing patients to book appointments and doctors to manage medical records, using **PHP** with **SQL** for the backend.
- Took ownership of the **frontend development**, implementing of **role-based authentication**.
- Integrated **RESTful PHP APIs** with the frontend using **Axios**, enabling secure data exchange and efficient real-time appointment handling.
- Ensured seamless performance and stability across modules with multithreading and unit testing.
- Participated in testing and debugging to ensure smooth functionality across different user roles.

TECHNOLOGIES

Programming Languages: JAVA, PHP, JavaScript, SQL
Web Technologies: HTML, CSS, Bootstrap, JQuery, Markdown , WordPress
Frameworks: Yii2, Laravel, Tailwind Css
Tools: Git, GitLab, CI/CD

CERTIFICATES

Core Java July 2022 – August 2022

- Completed 6 weeks of Core JAVA training by submitting the capstone project on JAVA.

Projects

My Portfolio

- Built an online portfolio to showcase the digital profile.
- Learned and used HTML/CSS and Javascript technology to create an interactive website.
- Showcased technical skills and personal projects, optimizing the site for performance and usability.

Tic-Tac-Toe Game

- Developed a console-based Tic-Tac-Toe game in JAVA, implementing game logic for two players, win conditions,and error handling.
- The player who succeeds in placing three of their marks in a row,either horizontally, vertically, or diagonally, wins the game.
- Applied object-oriented principles to build a modular and extensible codebase.
