+91-8507041736 ASHISH KUMAR ashish.kumar19097@gmail.com
Sr. Software Engineer

Summary

Full Stack Developer with 5+ years of experience worked in cross business domains like EdTech, Ecommerce, Insurance. Expertise in building web applications using Spring Boot, React.js, and Node.js. Skilled in developing RESTful APIs, working with microservices, CI/CD, and cloud technologies.

Technical Skills

Languages: Java, JavaScript, Typescript, HTML, CSS
Frameworks: Spring Boot, Spring JPA, Spring Security, NodeJs, ExpressJs, Mongoose, ReactJs, NextJs, Redux, Junit, Jest, RTL, SCSS.
Familiar: AWS(S3, CloudWatch, ECS, EKS), CI/CD Pipeline, Docker, Datadog, Kafka, Microservices
Databases: PostgreSQL, MongoDB, Redis, SDLC
Tools: IntelliJ, GIT, Postman, VS Code, JIRA, Maven, Webpack, babel

Experience

Aspire Systems Private Limited **May 2024 – Present**
Sr. Software Engineer

- Developed microservice based RESTful APIs using Spring Boot, Java, Node.js and ExpressJs.
- Developed front-end using React.js, Redux, and Redux, ensuring cross-browser compatibility, accessibility and seamless user experience.
- Developed unit tests with JUnit to validate business logic and ensure code stability.
- Implemented testing of UI components using Jest and RTL to ensure frontend stability.
- Collaborated with DevOps teams for deployment support.
- Optimized application performance and conducted code reviews.
- Participated in agile ceremonies like daily stand-ups, sprint planning, sprint demo and retrospective.

Amiti Software Technology Private Limited **Mar 2020 – May 2024**
Software Engineer

- Developed microservice based RESTful APIs using Spring Boot, Java, Node.js and ExpressJs.
- Developed front-end using React.js, Redux, and Redux, ensuring cross-browser compatibility, accessibility and seamless user experience.
- Integrated front-end applications with backend APIs to provide dynamic, real-time functionality.
- Developed unit tests with JUnit to validate business logic and ensure code stability.
- Implemented testing of UI components using Jest and RTL to ensure frontend stability.
- Participated in agile ceremonies like daily stand-ups, sprint planning, sprint demo and retrospective.

Projects

Insurance Management Portal (Full Stack Developer**)**
Tech Stack: React.js, Nextjs, Node.js, Express.js, Jest, Spring Boot, PostgreSQL, JPA, Redis, Junit, AWS Splunk

- Developed RESTful APIs using Spring Boot and Java and created Frontend UI with microservice architecture.
- Implemented a claim application feature allowing users to submit insurance claims without requiring login, enhancing accessibility.
- Created functionality to add and manage portal users, including user role assignments.
- Designed and developed an admin dashboard to monitor policies, users, and claims with key metrics and controls.
- Utilized tools like Postman and Swagger for API testing and documentation, and worked with Splunk for monitoring and analysis.
- Ensured secure form handling, input validation, and a user-friendly interface for both end-users and admins.

Reward Management System
Role: Full Stack Developer **(**Backend Developer**)**
Tech Stack: Java, Spring Boot, PostgreSQL, JPA, Kafka, Redis, Junit, AWS Splunk, Microservices

- Designed and developed RESTful APIs using Spring Boot and Java.
- Implemented data persistence using JPA and PostgreSQL databases.
- Ensured application reliability with unit testing (JUnit).
- Developed Customer and Reward services, and participated in code reviews to maintain code quality.
- Utilized tools like Postman and Swagger, and worked with Splunk for debugging, monitoring and analysis.

Automotive Ecommerce (Full Stack Developer**)**
Tech Stack: React.js, Nextjs, Node.js, Express.js, Jest, Spring Boot, PostgreSQL, Redis, Junit, Microservices

- Designed and developed RESTful APIs using Spring Boot and Java.
- Implemented data persistence using JPA and PostgreSQL databases.
- Developed the frontend using React.js, delivering responsive and user-friendly interfaces
- Ensured application reliability and maintainability by writing unit tests using JUnit..
- Developed and integrated the Different services including business logic, API endpoints, and data models and conducted code reviews.
- Utilized tools like Postman and Datadog for debugging, monitoring and analysis.

Online Classroom (Full Stack Developer**)**
Tech Stack: React.js, Nextjs, Node.js, Express.js, Jest, Spring Boot, PostgreSQL, Redis, Junit, Microservices

- Designed and developed RESTful APIs using Spring Boot and Java.
- Implemented data persistence using JPA and PostgreSQL databases.
- Worked on Spring Security for authentication and authorization.
- Ensured application reliability with unit testing (JUnit).
- Developed user management, course enrolment, real-time notifications and other functionalities, and conducted code reviews for quality assurance.
- Utilized tools like Postman and Swagger for API testing and documentation, and worked with Splunk for monitoring and analysis.

Analytics Dashboard (Full Stack Developer**)**
Tech Stack: JavaScript, React.js, Node.js, Express.js, Jest, MongoDB

- Developed a responsive and interactive analytics dashboard using React.js, enabling users to view, filter, and explore key business metrics.
- Built RESTful APIs with Node.js and Express.js to fetch, aggregate, and serve analytical data from multiple sources.
- Used MongoDB for data storage and efficient querying of historical analytics.
- Ensured application reliability with unit testing (Jest).
- Involved in end-to-end process in all phase of SDLC.

Education

Bachelor of Computer Science and Engineering.
Don Bosco Institute of Technology, VTU University (2014 - 2018)

Declaration

I hereby declare that the above information is true to the best of my Knowledge. If given a chance, I will try my best to come true to your aspirations and will prove my mettle in most trying situations.
