SUMMARY

I am a Full Stack Web Developer with over 6+ years of experience in building and maintaining scalable web applications using modern technologies. I specialize in .NET, React, and Azure-based development, with a strong foundation in both front-end and back-end systems. I have led teams using Agile methodologies and delivered projects involving booking systems, API integrations, and cloud migrations.

Recently, I joined LTIMindtree, where I am contributing to enterprise-grade cloud migration projects on Azure. My focus is on enhancing application performance, ensuring security compliance, and supporting infrastructure modernization. I thrive in solving complex problems, improving system architecture, and continuously upskilling with emerging technologies.

EXPERIENCE

01/2025 - Present
Noida-62

Specialist - Product Engineering

LTIMindtree

LTIMindtree is a global technology consulting and digital solutions company.

- Working on **DL-TNM-MMA-McGriff App Migration** project, migrating enterprise apps from **on-premises Azure** to **Azure Bubble**.
- Analyzing application documentation to prepare **runbooks, Smartsheet trackers**, and architecture workflows
- Reviewing and auditing Azure resource groups and infrastructure details to ensure deployment readiness
- Addressing **security vulnerabilities** flagged by tools such as **GitGuardian, Snyk, and Black Duck**, ensuring compliance with secure coding practices.

.Supporting applications like **OUNet** and **CCDM**, both built on .NET and SQL Server, by working on new client requirements, enhancements, and bug fixes.

09/2019 - 01/2025
Noida-63

Full Stack Developer & Team Lead

IT4T Solutions Pvt Ltd.

A company specializing in technology solutions for the travel industry.

- **Project Enhancement**: Played a crucial role in enhancing and developing various web applications, leading to improved functionality and user experience.
- **Flight & Hotel Booking System**: Successfully revamped the flight booking system, resulting in a smoother booking process and higher user satisfaction.
- **Admin Module Development**: Designed, developed, and maintained robust admin modules for various web applications, ensuring efficient user management.
- **Payment Gateway Integration**: Integrated multiple secure payment gateways, offering users convenient payment options and improving transaction security.
- **API Integration Expertise**: Proficient in integrating various APIs for flights, hotels, and local attractions, expanding the range of services offered on the platform.
- **System Design**: Applied knowledge of system design principles to create scalable and efficient web applications that meet user needs.
- **Project Management**: Demonstrated effective project management skills, ensuring timely delivery of projects while coordinating tasks across development teams.
- **Team Leadership**: Led a team of developers, providing guidance and support to ensure high-quality code and project success.
- **Technical Skills**: Familiar with AWS services, CAPTCHA integration for enhanced security, and solid understanding of Data Structures and Algorithms (DSA).

SKILLS

Front-End Development

HTML5 **CSS** **Bootstrap** **JavaScript** **jQuery** **AJAX** **React.js** **Angular** **Responsive Web Design** **Cross-Browser Compatibility**

Back-End Development:

.NET MVC **.NET Core Framework** **Node.js** **Laravel** **PHP** **RESTful API Development** **Microservices Architecture** **Python3**

Databases

MySQL **PostgreSQL** **MongoDB** **SQL Server** **Database Design and Management**

Server & Domain Management

Web Server Configuration (Apache, Nginx) **AWS** **Microsoft Azure** **Domain Management and DNS Configuration** **Azure Resource Management** **Cloud Migration**

Other Skills:

Agile Methodologies **Project Management and Coordination** **Payment Gateway Integration** **API Integration and Development** **CAPTCHA Implementation for Security** **System Design Principles**

PROJECTS

DL-TNM-MMA-McGriff App Migration - LTIMindtree

Tech Stack: .NET, React, Azure, GitGuardian, Snyk, Black Duck

- A critical enterprise application migration project from **on-prem Azure** to **Azure Bubble** cloud setup.
- Involved in analyzing legacy architecture, preparing detailed **runbooks and Smartsheet workflows**
- Auditing Azure resources for misconfiguration, ensuring infrastructure readiness for redeployment
- Resolving vulnerabilities flagged by security tools like **GitGuardian** and **Snyk**, enhancing application integrity

DL-FMB-MMA-McGriff Application Support - LTIMindtree

Tech Stack: .NET, React, Angular, Azure, SQL Server

- Providing ongoing support for **OUNet** and **CCDM** applications built on .NET and SQL Server, ensuring reliable performance and issue-free operations
- Working on new client requirements and enhancement requests by analyzing business needs, updating backend logic, UI components, and database objects
- Troubleshooting and fixing bugs across modules by reviewing logs, SQL queries, API responses, and code flows to maintain application stability

PROJECTS

PlanetTravelHolidays

https://www.planetkitesurfholidays.com/, https://www.planetdiveholidays.com/, https://www.planetwindsurfholidays.com/, https://www.planetwingfoilholidays.com/

A group of online platforms designed for booking windsurfing holidays across global destinations.

- Built the entire front-end and admin functionality from scratch and delivered the project live.
- Designed a flexible module for managing dynamic content such as holiday packages, destinations, and activity types.
- Created an admin dashboard to manage bookings, view analytics, and maintain package listings.
- Integrated third-party services for real-time availability, pricing, and confirmation of bookings
- Worked directly with the client to handle enhancements, performance improvements, and production issues.
- Integrated Redis for optimizing booking data access and improving application responsiveness.
- Maintained long-term support and iterative upgrades based on business feedback and user behavior analytics.

Planet Travel Online

https://www.planettravelonline.com/

An online booking platform designed to facilitate sports activity reservations and related travel services.

- Developed and maintained a modular booking engine tailored for various sports activity providers.
- Integrated Redis to cache frequently accessed data and enhance system performance under load.
- Worked closely with stakeholders to define booking rules, seasonal availability, and cancellation policies
- Streamlined the admin interface for managing listings, pricing models, and real-time availability.
- Ensured integration of payment processing, confirmation flows, and post-booking communication.
- Optimized data handling processes for seamless activity search, filtering, and checkout experience.
- Assisted in deployment, monitoring, and debugging across production and staging environments.

Babylon Booking

https://babylon-booking.com/en/

A B2B flight booking platform designed for travel agencies and business partners.

- Independently developed the initial version of the platform, including both the user-facing front end and the admin control panel.
- Delivered the complete project from development to live deployment with minimal supervision.
- Implemented a flexible admin interface for managing flights, bookings, pricing, and agents.
- Led ongoing enhancements post-launch, introducing new business workflows and booking logic as per client needs.
- Collaborated with stakeholders to improve B2B booking efficiency and streamline operations for corporate users.

Go Escapio

https://goescapio.in/

- Led the front-end development of a user-friendly travel booking site, focusing on UI/UX and dynamic search flows. Integrated B2C APIs based on company-specific logic to handle real-time bookings and manage data interactions.

Monarch Click

https://www.monarchclick.com/

- Managed the React-based front-end for hotel and flight bookings, ensuring seamless user interaction. Collaborated on shared API usage and customization driven by company code, enhancing maintainability across platforms.

Almaknoon Travels

https://www.almaknoontravels.com/

- Took charge of the complete React interface and coordinated with backend teams to implement B2C API integrations. Focused on performance, usability, and code reuse for a consistent user experience across the application.

Tredmed

https://tredmed.com/

A specialized medical travel booking platform for patients seeking treatment across different locations.

- Designed and developed the complete front-end and admin panel, delivering a seamless experience for both users and administrators.
- Implemented a secure and reliable payment gateway for processing treatment and travel bookings.
- Worked closely with the client to incorporate feedback, streamline workflows, and improve user engagement.

Naac Portal

https://development.d1zd535vymg956.amplifyapp.com/

A web application developed for a government college to manage student activity data across various academic and non-academic categories.

PROJECTS

Edu Hub Institute

https://www.eduhubinstitute.com/

A site for managing educational courses and student information.

- An online platform for managing educational courses and student data. Developed using Laravel, PHP, and MySQL, featuring a comprehensive admin panel for seamless course management and student administration.

Loan One

https://loanone.in/

A platform for applying and managing loan applications.

- Designed and developed the front end using modern frameworks, with a comprehensive admin panel to manage loan requests.
- Implemented SMS-based login, integrated secure payment gateways, and enabled Aadhaar and PAN verification for user onboarding and compliance.
- Ensured a smooth application flow and user-friendly experience across devices.

Elevates

https://elevates.in/

An e-commerce platform for selling clothing and fashion products.

- Independently designed and developed the complete front end and back end, including an admin panel for inventory and order management.
- Integrated payment gateways, shipping solutions like Shiprocket, and other e-commerce essentials.
- Focused on delivering a seamless and scalable shopping experience for both users and administrators.

Other Projects

- **School &Examination Management Systems** – Developed robust modules for student information, exam scheduling, and result processing to streamline academic administration.
- **E-Commerce Site** – Built a feature-rich online shopping platform with order management, product catalogs, and secure user experiences.
- **Garage Management System** – Designed a system to manage vehicle service records, customer interactions, and invoicing for auto repair businesses.
- **EV Charging Exchange** – Created an online platform for booking EV charging slots and managing charging station availability.
- **Custom B2B and B2C Booking Solutions** – Delivered flight and hotel booking systems for multiple clients with customized features and business-specific workflows.
- **Additional Work** – Over the past 5 years, I have worked on numerous projects from scratch, gaining valuable experience across various domains. While some of these projects were not launched or made live, they contributed significantly to my growth, problem-solving skills, and technical expertise.

KEY ACHIEVEMENTS

Project Leadership and User Satisfaction

Successfully led the development of several high-traffic web applications that significantly improved user experience and engaged a broader audience.

STRENGTHS

Strengths

Adaptability: Quickly learn and apply new technologies and frameworks to meet project demands.
Problem-Solving: Strong analytical skills to identify issues and implement effective solutions.
Team Leadership: Experience in leading development teams, fostering collaboration, and ensuring project success.
