- Risk, issue, and dependency management
- Requirements gathering, BRDs, FRDs, and solution design
- Budgeting, resource optimization, vendor governance

Experience

04/2023 - Current
IDFC First Bank

Process Lead – Program Management

- Defined enterprise-wide transformation roadmaps and governed the execution of multiple regulatory, compliance, and digital automation programs across pan-India banking operations.
- Led AI/ML-powered OCR automation initiatives for KYC, onboarding, and document verification, significantly reducing manual dependency and turnaround time.
- Directed a 5M+ customer master data remediation and governance engagement to improve data quality, regulatory compliance, and audit readiness.
- Established end-to-end governance frameworks covering scope control, milestone tracking, risk and issue management, financial oversight, and benefit realization.
- Acted as a strategic advisor to CXOs and business heads, presenting program KPIs, risk exposure, delivery health, and transformation outcomes.
- Partnered with Product, Engineering, Operations, Risk, Compliance, and external vendors to drive coordinated enterprise program delivery.

10/2020 - 03/2023
IDFC First Bank

Manager – Digital Transformation & Projects

- Led multiple digital transformation initiatives, covering onboarding modernization, operations automation, and outsourcing transitions.
- Facilitated stakeholder workshops for current-state assessment, requirement gathering, gap analysis, and target operating model (TOM) design.
- Converted business requirements into detailed BRDs, functional specifications, user stories, and UAT scenarios for technology delivery.
- Guided solution design in collaboration with enterprise architecture, product management, and engineering leadership.
