SUMMARY

- Results-driven **Python Developer** with **1+ years** of experience in **Django** framework, building scalable web applications, **RESTful APIs**, and robust database systems using **PostgreSQL.**
- Proficient in **Backend Development**, API integration, and database optimization to ensure high performance, reliability, and maintainable code architecture.
- Experienced in developing AI-powered voicebot using **SST, TTS & LLMs** and Python to deliver intelligent.

SKILLS

Python | AI \ ML | NLP, LLMs | RAG | LangChain | Django | Fast API | REST API | MySQL

PostgreSQL | SQLite | Django ORM | Postman | Git & GitHub | Docker | Redis | AWS

PROFESSIONAL EXPERIENCE

Keyanna Tech Pyt. Ltd. **Sep 2025 - Present**

- Develope **Voicebot** from scratch use ML model for **STT, TTS, Noise Cancellation**.
- Project developed using fully **open-source resources** and for data storage use **Redis & PostgreSQL.**
- **Lead team** to develope voicebot and guide them through owning system design, code review & developed workflow.

Tsyn Pvt. Ltd. **Aug 2024 - Aug 2025**

- Developing and maintaining Django-based backend systems with a focus on REST API optimization and scalability.
- Use MySQL for store data so write code to maintain data also use Djando ORM for getting data from database

EDUCATION

Aug 2021 - July 2024

Bachelor of Science (Mathematics (Hons))
Keshav Mahavidyalaya **(University of Delhi)**

PROJECTS

- **AI Resume Analyzer | GitHub :** https://github.com/digambarsingh8696/resume-analyzer
  - Extract key skills, experience, education and compare them to job requirements
  - Generate a match score (0–100) and Give suggestions for improvement
  - Tech - Python , **NLP**, **LLM** integration, **FastAPI**, Streamlit, Docker
- **Django Music App | Live:** digambar22.pythonanywhere.com **| GitHub:** github.com/digambarsingh8696/musicapp
  - Built a full-stack web application using Django for managing music tracks and playlists.
  - Implemented user authentication, playlist management, and artist addition features.
  - Integrated third party APIs for fetching track data and displayed them using responsive templates.
  - Tech - **Django**, HTML, CSS, JAVASCRIPTS
