Work Experience

Currently Worked Jan 2025 – Aug 2025

Value Labs (Associate Manager)

Project/Client Name: Optima Tax Relief
Project Duration: (Jan2025- till Aug 25)
Technical Domain: Salesforce Platform
Synopsis: Group Manager for four critical deliverable projects for client Optima Tax Relief. All the four projects are in Salesforce – Sales Cloud and Service Cloud.

Roles and Responsibilities:

- Define the overall vision, roadmap, and delivery strategy for the Salesforce implementation tailored to tax relief operations.
- Align Salesforce capabilities with business goals for improving case resolution, citizen engagement, compliance, and audit.
- Act as the primary liaison between business stakeholders (e.g., tax authorities, finance departments) and technical teams.
- Oversee end-to-end project delivery from requirement gathering to deployment and post-implementation support
- Manage multiple Salesforce project teams (development, QA, support) and ensure delivery within scope, time, and budget.

Previous Work History -I
Feb 2015 – Jan 2025 [10 YEARS]
Tavant Technologies [Project Manager]

Project/Client Name: Land O' Lakes.
Project Duration: (Feb 2015 – till Jan2025)
Technical Domain: Salesforce Platform, RPA UI PATH and GPT-4 ,Generative AI
Synopsis: Worked 10 years for the Client Land O Lakes with multiple project accounts like Purina, DataSilo and R7.
All of these projects were involved in the Insurance, Warranty on Demand and Agritech domains.

Roles and Responsibilities:
1. Project Leadership & Delivery

- Managed end-to-end implementation and optimization of Salesforce Warranty on Demand Solutions.
- Translate warranty business requirements into Salesforce architecture across Sales, Service, and Marketing Clouds.
- Managing Agile Framework in the Project and maintaining Agile Ceremonies.
- Managed all Project Management artifacts – Project Plan, Risk Registers, Sprint Tracker.
- Ensure timely and quality delivery using agile or hybrid methodologies.

2. Sales Cloud Responsibilities

- Streamline lead-to-case lifecycle for warranty registrations and claims.
- Manage opportunity tracking, quote generation, and field sales enablement for warranty product sales.
- Oversee custom workflows and approval processes for warranty upgrades or sales renewals.

3. Service Cloud Responsibilities

- Architect and supervise case management flows for warranty claims, status tracking, replacements, and escalations.
- Ensure integration with field service modules (if used) for on-site service and repair tracking.

4. Marketing Cloud Responsibilities

- Develop automated journeys for customer onboarding, warranty expiration reminders, and upsell campaigns.
- Use Email Studio, Journey Builder, and Mobile Studio to drive customer engagement and satisfaction.
- Align marketing automation with service events and customer interactions.

5. DocuSign Integration

- Oversee configuration of DocuSign for electronic signature of warranty registrations, renewals, and service agreements.
- Ensure compliance with digital contract regulations, document storage policies, and secure workflows.
- Automate and track document workflows linked to case or opportunity records.

6. RPA UI PATH Implementation

- Implementing Bots for batch process for the multiple loan processing in the project

7. Data & Integration Management

- Manage data flow between Salesforce Clouds and third-party systems (e.g., ERP, warranty databases).
- Ensure data consistency, deduplication, and cleansing across systems.

8. Team & Stakeholder Collaboration

- Lead cross-functional teams including Salesforce developers, admins, QA, marketers, and customer service reps.
- Liaise with business stakeholders, product owners, and vendors to gather requirements and provide updates.
- Conduct regular project status reviews and UAT sessions.

9. User Enablement & Support

- Conduct user training, documentation, and support for warranty-related Salesforce modules.
- Set up dashboards and reports for performance tracking, case resolution SLAs, and marketing KPIs.
- Foster change management and adoption across departments.

10. Compliance & Quality Assurance

- Implement rigorous QA, regression testing, and audit mechanisms before go-live and during updates.

11. Continuous Improvement & Innovation

- Monitor and adopt relevant Salesforce releases and features to enhance warranty operations.
- Use feedback loops and analytics to refine customer experiences and streamline processes.

12. Other HRMS Projects in Tavant:

- Worked for HRMS Tools Management like Darwin Box and Success Factor for almost years.
- Also Managed Company's inhouse HR Resource Allocation tool Cranium which briefs about how resources are onboarded, Earmarked and Allocated to the projects. End to End Resource Cycle from onboarding to releasing project/organization.

Previous Work History -II
August 2012 -Aug 2014
MAKEPOSTIVE SOFTWARE SOLUTIONS (Project Lead)
Project/Client Name: PROVAR

Synopsis: PROVAR is the Automation tool for Salesforce using Selenium Web driver on the Backend. PROVAR supports no code automation testing for Salesforce.
Platform & Tools Used were Salesforce, Selenium Web Driver

Roles and Responsibilities:
1. Project Planning & Governance

- Develop and manage project plans, timelines, and milestones for Provar automation initiatives.
- Define project scope, success criteria, risk management strategies, and resource allocation.
- Set up governance frameworks, communication plans, and sprint planning routines (Agile/Scrum/Kanban).

2. Stakeholder & Client Management

- Act as the primary point of contact for business stakeholders, QA leads, and Salesforce delivery teams.
- Gather automation requirements from stakeholders and align them with Provar testing capabilities.
- Facilitate regular status meetings, executive briefings, and reporting dashboards.

3. Team Coordination & Resource Management

- Manage cross-functional teams including Provar automation engineers, Salesforce developers, manual QA testers, and DevOps resources.
- Oversee resource planning, skill alignment, and training enablement for Provar tool usage.

Previous Work History -III
JUL 2011 -JUN 2012
CVENT (Application Support Engineer)
Project/Client Name: CSN- Cvent Supplier Network.
Technical Domain: Salesforce Platform
Synopsis: Cvent Supplier Network (CSN) is a platform for both the event planners as well as for the Suppliers (Venues and Services) to work mutually to conduct an event. The process involves the management of sending RFP from planners to Supplier's and then the response of Supplier's in the form of Proposals back to the Event Planners.

Roles and Responsibilities
1. Salesforce CSN Solution Ownership

- Lead the end-to-end implementation and enhancement of the Customer Success Network (CSN) module within Salesforce.
- Align CSN capabilities with Cvent's customer lifecycle workflows—support tickets, onboarding, health scoring, renewal tracking, and escalations.

- Customize Salesforce Service Cloud and Experience Cloud to support CSN-specific use cases.

2. Stakeholder Collaboration

- Work closely with Customer Success, Account Management, Support, and Product teams to gather requirements and optimize CSN flows.
- Act as a bridge between business teams and technical resources, translating business needs into scalable Salesforce solutions.

3. Project Management & Delivery

- Own project planning, sprint execution, backlog grooming, and delivery timelines for CSN projects.
- Ensure agile project execution, including sprint planning, daily stand-ups, UAT cycles, and retrospectives.
- Track and report project health, risks, dependencies, and delivery status to leadership and stakeholders.

Previous Work History -IV
JUN 2008 -NOV 2010
WIPRO LTD. (Technical Associate)
Project/Client Name: HP Products.
Synopsis: Worked in HP process which is a U.S. based process.

EXTRACURRICULAR ACTIVITIES

- Active participation in Cultural Building TEAM in Tavant Technologies
- Active Participant in CSR activities
- Volunteer and Anchoring in TAVANT EXCELENCE AWARDS [Award and Recognition ceremony of 300+ audience]
- Active Participant of Culture Building Team in TAVANT and sports team member of cricket.

INTERPERSONAL SKILLS

- Active Listening: Ensuring that team members feel heard and understood.
- Clarity and Conciseness: Conveying information clearly and succinctly.
- Identifying the root causes of conflicts and addressing them constructively.
- Encouraging collaboration and cooperation among team members.
- Being open to new ideas and approaches.
