GOURAV A

REACT NATIVE DEVELOPER

REACTJS || REACT NATIVE || JAVASCRIPT

CONTACT

gourava0556@gmail.com

Indore, India

https://www.linkedin.com/in/gourav-a-a003b4287/

SKILLS

- **Mobile & Front-End Technologies:** React Native, React.js, JavaScript, TypeScript, jQuery, HTML5, CSS3, Bootstrap, XML, AJAX, JSON
- **Mobile App Development:** Cross-platform mobile development (iOS & Android), React Navigation, Hooks, Context API, Redux , Native modules integration (iOS/Android bridges), Handling push notifications, deep linking, app permissions
- **Backend & API Integration:** RESTful APIs, GraphQL, Payment systems integration & third-party APIs
- **Databases & Storage:** SQLite, PostgreSQL, MySQL, Oracle MongoDB, InfluxDB Redis, Elasticsearch, Secure storage (AsyncStorage, Keychain/Keystore)
- **Cloud & Deployment :** AWS (EC2, S3, Cloud services), Heroku, App Store & Play Store deployment, OTA updates (CodePush)
- **Testing & Debugging:** Jest, React Native Testing Library, RSpec, JUnit, MiniTest, Capybara , Logging & debugging with Flipper, Chrome DevTools, Observability & monitoring: Prometheus, Grafana, Sentry
- **DevOps & CI/CD :** Docker, Kubernetes
- **Tools & Version Control:** Git, SVN
- **Others**

PROFILE

React Native Developer with 6+ years of hands-on experience in building high-performance, scalable, and user-centric mobile applications for Android and iOS. Proficient in React Native, Redux, TypeScript, and modern mobile architectures. Experienced in building complex application flows, implementing robust security practices, and maintaining CI/CD pipelines for mobile apps. Known for improving performance, reducing crash rates, and delivering stable releases to both Play Store and App Store. Passionate about adopting new technologies and enhancing user experience through innovative solutions.

WORK EXPERIENCE

StrivePool Webtech Pvt Ltd JAN 2023- PRESENT

React Native || ReactJS

- Develop, maintain, and optimize cross-platform mobile applications for iOS and Android using React Native, ensuring high performance and seamless user experience.
- Build reusable components, custom UI widgets, and responsive layouts following modern mobile design principles.
- Integrate mobile applications with RESTful APIs, GraphQL, and third-party services (Firebase, Google APIs, Maps, Payment Gateways, etc.).
- Implemented scalable and maintainable Ruby-based solutions tailored to client needs.
- Implement app navigation using React Navigation, deep linking, and routing for complex flows
- Collaborate with product managers, designers, backend developers, and QA teams to deliver robust and scalable features.
- Optimize application performance by profiling, debugging, and troubleshooting using tools like Flipper, Chrome DevTools, and Xcode/Android Studio.

Software Developer JULY 2018 - DEC. 2022

Kapil Services

- Implement native modules and bridge communication between React Native and native Android (Java/Kotlin) / iOS (Swift/Objective-C) when required.
- Ensure code quality through unit testing, integration testing, and tools like Jest, Detox, etc.
- Manage app builds, deployment, and release processes to Google Play Store and Apple App Store, including certificates, provisioning profiles, and OTA updates (CodePush).
- Follow Agile/Scrum methodologies—participate in sprint planning, daily standups, code reviews, and retrospectives.
- Maintain proper documentation, adhere to industry best practices, and ensure compliance with security and performance guidelines.
- Continuously research and adopt emerging technologies, libraries, tools, and trends in the React Native ecosystem.

RECENT PORTFOLIO

Project: Satocci app
App Link: https://play.google.com/store/apps/details?id=nrt.satocci.com
Tech Stack: React Native, TypeScript, JavaScript, Fireabase, Map

Role & Responsibilities:

- Developed a feature-rich shopping app enabling users to browse and purchase products from 100+ stores, resulting in a 30% increase in product discoverability and offering a scalable retail experience.
- Integrated secure user authentication, real-time product updates, and category-based filtering, which reduced user search time by 40% and improved navigation efficiency.
- Designed and implemented a 100% responsive user interface with a 3-step seamless checkout flow, leading to a 25% increase in user retention and positive user reviews.

Project: Authenticator app
App Link: https://play.google.com/store/apps/details?id=com.anonymous.authenticator
Tech Stack: React Native, TypeScript, JavaScript, Fireabase, Map

Role & Responsibilities:

- This React Native authenticator app generates 6 digit TOTP codes for secure multi-platform logins.
- It ensures strong protection with encrypted key storage, instant code generation, and smooth integration with standard authentication flows.

Project: Bottle spin (gaming project)
App Link : https://play.google.com/store/apps/details?id=com.bestpeers.bottleSpin
Tech Stack: React Native, TypeScript, JavaScript, Fireabase, Map

Role & Responsibilities:

- A simple multiplayer gaming app where players take turns rotating a virtual bottle.
- Each spin randomly selects a winner, offering a fun, fast, and interactive way to play with friends.

All of my shared projects are a reflection of my Strivepool journey.

I am a React Native developer based in India, available to work across any global timezone and open to immediate joining.

Please feel free to reach out using the contact details in my resume to schedule a quick interview.

Thanks,
Gourav
