Objective

Lead as a Salesforce Architect & Enterprise Solutions Leader, leveraging extensive experience in ***designing, implementing, and optimizing Salesforce ecosystems. Expert in architecting scalable solutions, driving digital transformation, and ensuring seamless enterprise integration.*** *Seeking opportunities to drive innovative technology solutions and enhance business processes*.

Areas of Expertise

- Enterprise Architecture
- Solution Design
- Salesforce Ecosystem Customization & Optimization
- Salesforce Integration & API Management
- Data Architecture & Governance
- Identity & Access Management (IAM)
- Multi-Cloud Strategy & Digital Transformation
- DevOps, CI/CD, and Release Management
- Security & Compliance
- Lightning Web Components (LWC) Development
- Agile Project Leadership & Stakeholder Engagement

Certifications

- Salesforce Certified Integration Architect **(Earn - Jan 2024)**
- Salesforce Certified Identity and Access Management Architect **(Earn - Jan 2024)**
- Salesforce Certified Data Architecture & Management Designer **(Jul 2019, Renew -Feb 2024)**

PROFILE SUMMARY

- **Seasoned Salesforce Architect** with over **15 years of expertise** in designing and implementing scalable, high-impact solutions. Currently serving as **Manager – Salesforce Architect** at **Full Potential Solution**, spearheading the development of **customized platforms** using **Mobile Publisher, Experience Cloud, and Service Cloud** to drive business transformation.
- **Provide strategic technical leadership**, translating complex business challenges into **robust, scalable technology solutions** that enhance operational efficiency and drive superior business outcomes.
- Designing and implementing scalable, high-performance Salesforce solutions that seamlessly integrate with enterprise systems, ensuring streamlined workflows and data consistency across business functions.
- **Expertise in Pre-Sales & Solution Consulting**, driving business growth by developing tailored proposals, conducting product demonstrations, and aligning solutions with client needs to enhance sales effectiveness.
- **Security, Compliance & Scalability** – Architecting robust Salesforce environments with a strong focus on security, compliance, and governance, optimizing system performance while aligning with industry best practices and regulatory requirements.
- **Digital Transformation & Automation** – Driving enterprise-wide digital transformation by leveraging automation, data-driven insights, and user-centric design to enhance operational efficiency, customer engagement, and business agility.
- Led the **end-to-end RFI and RFP processes**, gathering critical vendor insights, defining requirements, assessing proposals, and negotiating contracts to drive informed decision-making, optimal business solutions, and cost efficiency.
- **Expert in strategic planning, technology solution architecture, automation, data analytics, and continuous process improvement**, ensuring business agility and sustained innovation.
- **Salesforce Certified Integration Architect and Data Architecture & Management Designer**, among multiple advanced certifications, reflecting a deep technical acumen and expertise in enterprise architecture.
- **Trusted advisor to leadership and stakeholders**, ensuring **technology aligns with business objectives**, maximizes ROI, and drives digital transformation at scale.

TECHNICAL SKILLS

- **Programming Languages:** Apex, Visualforce, LWC, Java, Python, .Net (C# & VB)
- **Web Technologies:** HTML, CSS, JavaScript, XML, VisualStudio
- **Databases:** Oracle, MS SQL Server, MySQL
- **Salesforce Ecosystem:** Experience Cloud, Service Cloud, Sales Cloud, CPQ, Lightning, LWC
- **Tools & Platforms:** Selenium WebDriver, TestNG, Eclipse, VSCode, Force.com IDE, MuleSoft
- **Cd / CI tools :** Autorabit, Copado, BitBucket, Gearset
- **ETL Tools** : MuleSoft , Informatica, Talend
- **Technical Dept tools** : PDM, SonarQube, Checkmarx
-

- Salesforce Certified Application Architect **(Apr 2019, Renew - Feb 2024)**
- Salesforce Certified Sharing and Visibility Designer **(Apr 2019, Renew -Jan 2024)**
- Salesforce Certified Sales Cloud Consultant **(Nov 2018-– Till Active)**
- Salesforce Certified Service Cloud Consultant **(Jul 2018 – Till Active)**
- Salesforce Certified Platform App Builder **(Oct 2017, Renew Jan 2024)**
- Salesforce Certified Administrator **(Sept 2016 – Till Active)**
- Salesforce Certified Platform Developer I **(Sept 2016, Renew Jan 2024)**

Soft Skills

- Analytical
- Communication
- Problem-solving
- Team Player
- Time Management

WORK EXPERIENCE

May'2025 to Present: Manager – Salesforce Architect at Full Potential Solution, Pune

Role:

- Work with Product Owners, Business Analysts, and Stakeholders to translate business requirements into Salesforce capabilities.
- Conduct solutioning workshops and document architectural decisions
- Design custom and standard object models, relationship mappings, and field structures.
- Salesforce to salesforce Bylateral sync
- UUID implementation to connect with external systems
- Five9 Integration
- Define role hierarchy, sharing models, object- and field-level security, and data access strategy.
- Design and guide integration patterns with external systems via REST/SOAP APIs, Middleware (MuleSoft), Platform Events.
- Define and enforce development and deployment standards.
- Recommend tools for CI/CD, test automation, and code quality (e.g., Gearset, Copado, SFDX).
- Set naming conventions, org strategy, and modular architecture practices.
- Ensure data consistency, synchronization, and performance.
- Provide technical guidance to Salesforce developers, admins, and QA teams.
- Review solution designs, Apex code, Flows, and LWC for compliance with architectural patterns.
- Act as an escalation point for technical blockers.
- Evaluate and resolve performance issues (e.g., query optimization, governor limits, page load time).
- Recommend use of caching, asynchronous processing (Queueables, Batch Apex), and lightweight UI (LWC, lazy loading).
- Ensure the platform adheres to compliance frameworks (e.g., GDPR, HIPAA).
- Manage data encryption, OAuth scopes, connected apps, and auditing policies.
- Present solutions to executives, architects, and business leads.
- Communicate trade-offs, risks, and timelines clearly to both technical and non-technical stakeholders.
- Manage multi-org strategy, sandbox management, and data migrations.
- Participate in Salesforce vendor assessments, licensing discussions, and AppExchange evaluations.
- Contribute to release planning, sprint grooming, and UAT strategy.

- **Orchestrating enterprise solution architecture**, aligning technical solutions with business objectives while leading cross-functional teams to drive seamless execution.
- **Architecting scalable and secure Salesforce solutions**, ensuring seamless integration with enterprise applications to enhance operational efficiency and customer engagement.
- **Collaborating with stakeholders across business, product, and development teams**, translating client needs into tailored Salesforce solutions that drive measurable business value.
- **Designing and optimizing Salesforce implementations**, leveraging automation, user experience enhancements, and best practices to maximize ROI and system performance.
- **Leading innovation in analytics integration**, enabling real-time insights for data-driven decision-making and enhancing business agility.
- **Developing structured training programs**, fostering a high-performance culture and increasing team efficiency in Salesforce best practices.

Key Achievements

- **Optimized Salesforce solutions** through rigorous code reviews, adherence to best practices, and performance tuning, enhancing system reliability.
- **Elevated user experience and customer satisfaction** by implementing advanced Experience Cloud components and customized workflow solutions.
- **Led the architecture and execution of innovative Salesforce strategies**, driving measurable improvements in productivity, operational efficiency, and customer engagement.

Oct'2023 to April 25: Executive Project Manager (SF Architect) at Intellect Design Arena, Pune

Role:

- Work with Product Owners, Business Analysts, and Stakeholders to translate business requirements into Salesforce capabilities
- Design and guide integration patterns with external systems via REST/SOAP APIs, Middleware (MuleSoft), Platform Events.
- Recommend tools for CI/CD, test automation, and code quality (e.g., Gearset, Copado, SFDX).
- Recommend use of caching, asynchronous processing (Queueables, Batch Apex), and lightweight UI (LWC, lazy loading).
- Ensure the platform adheres to compliance frameworks (e.g., GDPR, HIPAA).
- Work with Salesforce Industries to define OmniStudio Flax Cards, Data raptor and integration procedures.

Nov'2021 to Oct'2023: Principal Architect at LTIMindtree, Pune

Role:

- Led **Salesforce digital transformation** projects, driving strategic **cloud migrations & integrations**.
- Architected solutions for **Adidas B2B Order Management, Everside Health Service Desk**, and **City National Bank**.
- Developed scalable **API-driven architectures** and **process automation strategies**.
- Enhanced **user experience** by implementing **optimized Lightning Web Components (LWC)**.

Jun'2019 to Oct'2021: Technical Specialist at Zensar Technology Pvt. Ltd., Pune

Role:

- Designed and deployed **Salesforce automation workflows**, reducing **ticket resolution time by 40%**.
- Provided **technical leadership** for enterprise **Salesforce implementation** projects.
- Streamlined **process efficiency**, improving Salesforce adoption across **global teams**.

Nov 2012 – June 2019: Sailfin Technologies, Surat

Growth Path: Sr. Software Developer (2012-2016) → Team Lead (2016-2018) → Project Lead (2018-2019)

Role:

- Designed, developed, and maintained **Salesforce managed packages**, ensuring compliance with **AppExchange security review guidelines** and seamless upgrades.
- Led migration from **Salesforce Classic to Lightning**, developing custom **Lightning components** to enhance UX and system performance.
- Implemented **third-party integrations** using **REST & SOAP APIs**, ensuring smooth data exchange and system interoperability.
- Established **CI/CD pipelines** for Salesforce deployments, optimizing **version control, automated testing, and release management**.

July 2010 – Oct 2012: Software Engineer

Role:

- Developed and optimized **enterprise applications**, focusing on **.NET & database management**.
- Conducted **system performance testing** to enhance **scalability and efficiency**.

Area	Skills
Platform	Sales Cloud, Service Cloud, Experience Cloud, OmniStudio, Financial Service Cloud , CPQ, B2B Commerce Cloud, HealthCloud
Technical	Apex, LWC, Flows, REST/SOAP APIs, SOQL, CDC, Platform Events
Tools	SFDX, VS Code, Git, Jira, Copado, Gearset, AutoRabit
Architecture	Integration Patterns, Data Modeling, Event-Driven Architecture
Soft Skills	Communication, Leadership, Stakeholder Management, Problem Solving

Sales Cloud : 4 Years Experience

Service Cloud : 6 Years Experience

Experience Cloud : 6 Years Experience

Financial Service Cloud : 2 Years Experience

CPQ : 3 Years Experience

Health Cloud : 2 Years Experience

B2B Commerce Cloud : 2 Years Experience

Omni studio: 2 Years Experience

Annexure

Intellect Design Arena

SJP Project
Technologies: LWC, Service Cloud, Community Cloud, Mobile Publisher,Integration, Platform Events, Flow Publisher
Key Skills: Salesforce, Service Cloud, Experience Cloud & Salesforce Customization, Financial Service Cloud

LTIMindtree

Adidas B2B Project – Work Order Management
Technologies: API, LWC, Order Management

Everside Health Servicedesk Project
Technologies: LWC, Service Cloud, Community Cloud, Support Process, Console View, LWC, Flow, Amazon Connect, SSO
Key Skills: Salesforce, Sales Cloud, Service Cloud, Experience Cloud & Salesforce Customization

Honeywell RQ
Technologies: LWC, CPQ, Integration, Quote Custom Development
Key Skills: Salesforce, CPQ, Salesforce Customization, Flow

CNB (City National Bank,US)
Technologies: LWC, Service Cloud, Flow
Key Skills: Salesforce, CodeScan, Copado, Bitbucket, Financial Service Cloud
Key Result Areas:

- Configured Experience Cloud components such as communities, templates, themes, pages, and navigation, to optimize user interaction
- Leveraged Salesforce architecture knowledge to enhance the Experience Cloud functionality, focusing on Sales Cloud, Service Cloud, Health Cloud, and CPQ customization
- Implemented and integrated APIs and Lightning Web Components (LWC) for seamless data exchange and enhanced user experience within the Salesforce ecosystem
- Designed a streamlined support process, leveraging Console View and Amazon Connect integration to improve customer service
- Employed Salesforce Flows to automate critical business processes, enhancing the efficiency of the custom-developed quote system
- Utilized CodeScan to ensure high-quality code and adherence to coding standards, contributing to a robust and reliable application
- Employed version control systems like Bitbucket to manage and track code changes effectively, promoting collaboration and code quality

Zensar Technology Pvt. Ltd.

Denher (Beckman Coulter)
Technologies: Apex Classes, Apex Triggers, Visual Force, Component, Force.com API JavaScript, Views, Public Group and Queue, ServiceMax, Sales Cloud, Service Cloud, Selenium Web Development with Salesforce
Description: Application Support Development Servicemax, SFM Wizard, SFM Transaction, Checklist, SFM Search, Dispatch Console, FSA App, SFM Action

Sailfin Technology Pvt. Ltd., Surat (Nov'12 – Jun'19)

Project Title: AP Flow, PLM (Helpdesk), Sysco, Westcon, KONE (Genpact)
Technologies: Apex Classes, Apex Triggers, Visualforce, Component, Force.com API, JavaScript, Views, Public Group, Queue
Key Result Areas:

- Developed a **dual-layout PDF viewer**, enabling side-by-side PDF display and data entry for users with **custom profile-based data segregation**.
- Led **package development** for **40+ clients**, creating customized product features.
- Migrated **two major products** to **Lightning**, leveraging enhanced Salesforce capabilities.
- Configured Salesforce components, including **Roles, Profiles, Groups, Views, and Queues**.
- Built **custom logic using Apex & Token classes**, utilizing interface-based architecture.
- Automated workflows using **Process Builder** and **invocable classes**.
- Managed **custom setting data**, documentation, and **code coverage activities**.

Aditi Infotech

Office Automation Software | **Client:** Tusher Hoses Pvt. Ltd.
Technologies: Visual Studio 2008 (Vb), Crystal Report & MS Access
Multimedia Web Application Technologies
Technologies: JavaScript, jQuery, SQL Server 2005 & Visual Studio 2008 (C#, VB)
