DESCRIPTION

Recent AI graduate seeking a dynamic Data Science role to apply theoretical knowledge and gain practical experience in a fast-paced, growth-oriented environment. Strong academic background and passion for leveraging modern technology. Ready for a fulfilling career in the field of AI.

TECHNICAL SKILLS

Programming Languages: Python, C, C++

Libraries and Tools: OpenCV, TensorFlow, scikit-learn, MediaPipe, YOLOv8, Tesseract OCR, Power BI, Excel

Frameworks: Flask , Django , FastApi

ML Architectures: Machine Learning, Deep Learning, Statistics, Computer Vision, Object Detection, Pose Estimation, OCR

Databases APIs: SQL, REST APIs

WORK EXPERIENCE

Associate Data Scientist
AlgoForge Studios
Nov 2024 – Present

- **JD:** Responsible for building and deploying end-to-end AI solutions in computer vision and natural language processing domains. Worked with deep learning architectures and contributed to product-oriented machine learning systems.
- **Project: Skin Disease Prediction System** – Built and trained a multi-class CNN model to classify various skin diseases from dermoscopic images with high accuracy.
- **Contribution:** Handled data preprocessing, model architecture design, hyperparameter tuning, and deployment using FastAPI.
- **Project: Automated Driving System (Prototype)** – Developed a vision-based system using CNN and NLP to assist in autonomous navigation decisions.
- **Contribution:** Designed the image processing pipeline, implemented object detection and lane detection models, and integrated voice command processing using NLP.
- **Project: Face Detection System** – Implemented a real-time face detection and recognition system for access control and surveillance.
- **Contribution:** Utilized OpenCV and deep learning models, improved detection speed, and deployed via a web interface.

Python Developer Intern
Versai Technology
May 2024 – Nov 2024

- **JD:** Worked on backend development using Python frameworks to support automation and AI model deployment. Created and maintained scalable APIs for internal tools and machine learning services.
- **Project: AI Model Deployment Platform** – Created a backend system to host and manage AI models through APIs.
- **Contribution:** Built scalable REST APIs using Flask, Django, and FastAPI to serve ML models; implemented endpoints for predictions and model monitoring.
- **Project: Automation and Analytics Dashboard** – Backend infrastructure for a dashboard providing business insights.
- **Contribution:** Wrote Python scripts to automate data collection and reporting; integrated APIs with frontend and optimized query performance.

EDUCATION

Chitkara University
Rajpura, Punjab, India
B.E. in Computer Science (AI Specialization)
8.25 CGPA 2021 – 2025

Mata Gujri Public School
Punjab, India
12th CBSE
81.8% 2020 – 2021

Kaintal School
Punjab, India
10th CBSE
82% 2018 – 2019

Projects

- **Face Detection:** Real-time face detection using OpenCV, Haar Cascades, and CNNs with optimization for lighting and occlusion.
- **Gym Posture Detection:** MediaPipe Pose-based joint tracking system for gym form correction and injury prevention.
- **Rust, Scratch, and Fabric Defect Detection:** YOLOv8-powered real-time image/video defect detection for industrial quality control.
- **Skin Cancer Prediction:** CNN-based skin lesion classifier for early diagnosis of malignant vs. benign skin conditions using TensorFlow.

Certifications

- Python – Coding Ninjas
- C/C++ – Coding Ninjas
- Generative AI – Google Cloud
- Data Analysis – SQL, Power BI, Excel with real-world projects

Extracurricular Activities

- State Level Basketball Player at Kaintal School
- Executive Member – Happiness Club, Chitkara University
- Organizing Team – Bits Bytes Tech Event, Chitkara University
