TECHNICAL SKILLS

Core DBA Skills	Oracle Architecture, database creation using DBCA and silent method, database administration, monitoring, troubleshooting, health checks, user and role management, tablespace allocation and datafile management
Database Platforms	Oracle 11gR2, 12c, 19c, Linux and Windows environments, AWS exposure, ASM knowledge
Backup, Recovery & Cloning	RMAN backup and recovery, hot and cold backup, Export/Import, expdp, impdp, online and offline cloning, duplicate and no-duplicate RMAN cloning, restore and recovery for missing datafiles and block corruption
High Availability	Data Guard physical standby administration and maintenance, switchover testing, restore points, flashback techniques, basic RAC administration and RAC environment support
Patching & Upgradation	Database patching, patch set application, RAC database patching support, and manual upgradation of single-node databases from 12.1.0.2.0 to 19.3.0.0
Performance & Utilities	AWR report generation, statistics gathering, index rebuild activities, pfile, spfile and parameter management, SQL*Plus, DBCA, NETCA, Putty, WinSCP, PL/SQL Developer, TDE
Scripting & Support	SQL, basic Unix shell scripting, 24x7 production support, alert log and trace monitoring, backup scheduling based on business strategy, ticket handling and permanent issue resolution

WORK EXPERIENCE

Company	Role	Duration
Simple Logic Pvt Ltd	Associate Technical Consultant / Oracle DBA	02 Feb 2023 - 21 Jul 2025
Sysnet Technology Pvt Ltd	Oracle Database Administrator	14 Aug 2025 - Present

PROJECT EXPERIENCE

Client	Company	Duration
Godrej / Multiple Clients	Simple Logic Pvt Ltd	Feb 2023 - Jul 2025
DBS Bank	Sysnet Technology Pvt Ltd	Aug 2025 - Present

PROJECT ENVIRONMENT

Simple Logic Pvt Ltd: Linux, Oracle 11gR2, 12c, 19c
Sysnet Technology Pvt Ltd / DBS Bank: Linux, Windows, Oracle 11gR2, 12c, 19c

ROLES AND RESPONSIBILITIES

- Oracle software installations and database creations.
- Multiplexing of control files and redo log files.
- Provided support to production and test databases on Linux servers.
- Data Guard physical standby implementation and maintenance.
- Creating and adding tablespaces and datafiles.
- Creating users, granting privileges and roles.
- Looking into action requests (tickets), resolving issues, and providing permanent fixes.
- Schema and table-level refreshes using Data Pump.
- Configured tnsnames.ora and listener.ora files manually and using Net Manager.
- Performed database cloning from production to test environment.
- Restored and recovered databases for missing datafiles and block corruption using RMAN.
- Took RMAN backups on a daily basis and monitored backup job schedules.
- Performed logical backups when required.
- Successfully implemented TDE on UAT and Production.
- Monitored daily health check reports and troubleshot database problems.
- Configured pfile, spfile, and parameter management as required.
- Generated AWR reports, gathered statistics, and performed index rebuild activities for performance tuning.
- Worked on RAC environments and supported RAC database patching activities.
- Configured Data Guard and tested switchover operations.
- Worked in 24x7 production support environment.
