SUMMARY

Results-driven BI Developer with 4.5 years of experience in Business Intelligence, Data Analysis, and Data Visualization, delivering actionable insights to support strategic business decisions. Proficient in Microsoft Power BI, SQL Server, Azure, DAX, and ETL processes for analyzing complex datasets and developing interactive dashboards and analytical reports. Experienced in designing scalable data models, optimizing report performance, and delivering high-quality BI solutions across cross-functional environments. Strong expertise in stakeholder collaboration, requirement gathering, and transforming business needs into data-driven solutions.

SKILLS

Power BI | SQL | DAX | Data Analytics | Azure | Power BI Service | Gateways | ETL | Power Query | Dataflow | Power BI Embed | Data Warehouse | Data Modelling | Power Automate /Apps

EXPERIENCE

Power BI Developer

Celebal Technologies

10/2021 - 12/2023 Pune, India

- Delivered end-to-end business intelligence solutions across sales and marketing, BFSI, mining and metals, mechanical, HR, finance, telecom, and e-commerce domains using Microsoft Power BI.
- Gathered business requirements, prepared BRD documentation, identified KPIs, and designed dashboard solutions with stakeholders.
- Performed ETL processes and data integration from SQL Server, Oracle, PostgreSQL, Redshift, Big-Query, Amazon S3, SharePoint, Azure Blob Storage, GCP, Web APIs, Excel/CSV, and CRM platforms.
- Developed scalable Power BI data models using fact tables, dimension tables, star schema, hierarchies, DAX measures, and calculated columns.
- Built interactive dashboards and analytical reports for sales, inventory, production, manufacturing, finance, HR, executive reporting, subscription, payment, profitability, and chargeback analysis with ETHOCA and RDR alerts.
- Implemented row-level security (RLS), on-premises gateway configuration, scheduled refresh, and data access management in Power BI Service.
- Developed complex DAX measures, SQL queries, KPIs, and optimized reports for business analytics and reporting.
- Published and managed reports in Power BI Service (Premium Capacity & Embedded) and Power BI Report Server for enterprise-scale reporting.
- Implemented incremental refresh, data model optimization, and Performance Analyzer tuning to improve report performance and reduce refresh time.
- Applied advanced visualizations, conditional formatting, KPI indicators, drill-through functionality, and interactive reporting features.
- Integrated Power Apps and Power Automate Platform solutions for workflow automation and business process enhancement.

Power BI Developer

SR analytics

03/2024 - 02/2025 Pune, India

Developed interactive dashboards and analytical reports across BFSI, Manufacturing, Finance, and E-Commerce domains. Implemented DAX, Power Query, RLS, Incremental Refresh, and data integration from multiple enterprise data sources.

EXPERIENCE

Power BI Developer

Infosys

04/2025 - 12/2025 Pune, India

Designed and developed enterprise Power BI dashboards, analytical reports, and data models for business intelligence solutions.
Worked on ETL processes, SQL development, performance optimization, and Power BI Service deployment for enterprise reporting.

Power BI Developer

Tenneco

12/2025 - 03/2026 Pune, India

Developed Power BI dashboards and financial analytics reports for KPI tracking, profitability analysis, and executive reporting.
Performed data modeling, DAX development, SQL analysis, and report optimization to support finance and business decision

KEY IMPROVEMENTS

Enhanced Dashboard Performance

Reduced HR report refresh time from 5 hours to 2 minutes by optimizing data models and improving hierarchy transformations in Power BI.

Power BI & PowerShell Automation Expertise

Developed PowerShell automation scripts for Power BI report copying, renaming, publishing, parameter updates, and parallel dataset refresh, reducing manual effort and improving reporting efficiency. Automated the deployment of 100+ Power BI reports within 30 minutes using PowerShell scripting, increasing deployment efficiency by 90% and significantly enhancing productivity.

Implemented Security Measures

Successfully implemented RLS for 1000+ users, ensuring data security.

PROJECTS

Enterprise Power BI Project Experience Across all Domain

- **Vedanta – Sales & Marketing (CEO Dashboard)**: Executive Power BI dashboard for KPI tracking, revenue analysis, and business performance
- **Vedanta – Aluminum Division:** Production and inventory dashboards for manufacturing analytics and operational monitoring.
- **HDFC Wholesale MIS (BFSI):** MIS dashboards for wholesale banking operations and financial reporting.
- **ICICI Bank – UPI Lite Transactions:** Transaction analytics dashboards for payment monitoring and operational insights.
- **Ashok Leyland:** Clutch & brake failure analysis dashboards for defect tracking and root cause analysis.
- **Agility Health (US client):** Healthcare analytics dashboards for operational reporting and performance monitoring.
- **Beast Insights E-Commerce (US client):** E-commerce dashboards for sales analytics and customer insights.
- **Air Liquide – Site Infrastructure:** Network and teleocom monitoring dashboard reporting
- **Tenneco Finance:** Finance dashboards and performance analysis.

EDUCATION

Bachelor of Engineering

Walchand Institute of Technology, Solapur

2016 - 2020

CERTIFICATIONS

Microsoft certified data Analyst Associate
