Extra curricular

Profile Summary

MSc-qualified Quality Engineer with expertise in manufacturing quality, inspection, root cause analysis, and continuous improvement within automotive and regulated industries. Proficient in ISO 9001, IATF 16949, and skilled in APQP, PPAP, FMEA, MSA, 8D, and CAPA methodologies. Experienced in incoming, in-process, and final inspections, defect analysis, quality documentation, KPI monitoring, and audit support. Strong shop-floor exposure in automotive Tier-1 manufacturing and advanced Excel skills for data analysis and reporting. Seeking a Quality Engineer / Quality Executive role in Mumbai or Pune to drive defect reduction, process optimization, audit compliance, and continuous improvement initiatives in manufacturing environments.

Education

MS/M.Sc(Science), 2023

Coventry University, United Kingdom

Bachelor of Technology / Bachelor of Engineering (B.Tech/B.E.), 2020

MH Saboo Siddik College of Engineering, Mumbai

Work Experience

Mar 2024 - Jan 2026

Process and Quality Analyst

Scottish and Southern Energy - Business Operations

• Analysed operational quality data to ensure 100% compliance with internal invoicing standards and audit requirements.
• Applied RCA to resolve 50+ process discrepancies weekly, improving efficiency by 30% across the team.
• Tracked KPIs, achieving a 95% first-time resolution rate and multiple five-star customer reviews.

Feb 2024 - Mar 2024

Machine Operator - Production Quality Support

Brose Limited (Automotive Tier 1 Supplier)

• Supported production quality through daily inspections, risk assessments and preventive maintenance checks.
• Identified and corrected minor process and equipment deviations, ensuring zero unplanned downtime.
• Assisted in scrap reduction and waste minimization initiatives aligned with lean manufacturing principles.

Freelance Designer

Delivered 20+ commissioned sketches worldwide, managing client requirements and quality standards.

Nov 2022 - Dec 2023

Warehouse Operative - Process Compliance Support

The Range

• Maintained process accuracy and quality in high-volume order fulfilment sections.
• Used inventory systems to manage 500+ SKUs, ensuring data accuracy and compliance.

Nov 2021 - Apr 2022

Quality Intern

Adarsh Surgical Works (Certified ISO 9001 manufacturer)

• Conducted inspections of 500+ precision surgical components monthly, ensuring full compliance with ISO 9001 standards.
• Identified defects, performed root cause analysis using 5 Whys, and supported CAPA implementation.
• Assisted supplier quality checks, helping maintain supplier conformance and reduce defect rates.

Projects

6 Months

CPS Integration in Manufacturing Quality Management Systems

• Researched integration of Cyber-Physical Systems (CPS) into Manufacturing Quality Management Systems for real-time process monitoring.
• Conducted process mapping, quality gap analysis, and defect trend evaluation.
• Applied FMEA concepts and proposed SPC-based monitoring, traceability, and preventive CAPA.
• Focused on defect reduction, process stability, productivity improvement, and cost efficiency.

2 Months

Automated Electric Motor Assembly Line Design

• Designed an automated electric motor assembly line using robots and collaborative robots.
• Integrated multiple workstation designs into a balanced production layout.
• Applied DFA/DFM, line balancing, and lean manufacturing principles.
• Reduced process variation and assembly defects, achieving ~25% cost reduction and ~30% productivity improvement.

12 Months

Design and Validation of Shock Damping Seat System

• Proposed and led development of a vibration-damping seat system for improved product quality and reliability.
• Collected and analyzed road-induced vibration data to identify root causes.
• Defined CTQs, performed engineering calculations, and finalized fabrication dimensions.
• Conducted testing and validation to confirm performance improvement and durability.
