Education

CGC Technical Campus — Jhanjeri, Mohali
Bachelor of Technology in Computer Science — *Aug. 2019 – June 2023*

- CGPA-7.68

Experience

Graduate Engineer Trainee — January 2024 – June 2025
HCLTech — *Noida, India*

* Ensured consistent and reliable backups using enterprise-level tools, supporting business continuity and disaster recovery goals.
* Managed incident and change requests using ServiceNow, contributing to efficient ITSM practices in alignment with ITIL framework.
* Collaborated with infrastructure teams to coordinate system upgrades, patch deployments, and configuration changes across storage and backup environments.
* Managed daily backup jobs, monitored alerts, and ensured data protection using enterprise tools integrated with ServiceNow ITSM.
* Created and maintained internal documentation for troubleshooting procedures and knowledge base articles to support team efficiency.

Python Developer Intern — January 2023 – June 2023
PG-Tech Pvt. Ltd. — *Chandigarh, India*

* Developed and maintained web applications using Django framework, enhancing project modularity and scalability.
* Implemented backend business logic and integrated database models to support dynamic content and user interactions.

Projects

Blog Application | *Django, Python, HTML/CSS*

* Developed a Django-based blogging platform with SEO-friendly URLs, comment system, and tagging for related posts.
* Implemented queryset-based topic recommendations to enhance user engagement and content discoverability.

IMDB Movie Review Sentiment Analysis | *Python, PyTorch, Hugging Face Transformers*

* Fine-tuned the DistilBERT transformer model on the IMDB movie review dataset to classify sentiment (positive/negative) with high accuracy.
* Implemented data preprocessing and tokenization using Hugging Face Tokenizers for standardized input format.

RAG-based Financial News Chatbot | *LangChain, Google Gemini, Python*

* Developed an interactive chatbot for real-time financial news summarization using LangChain and Google Gemini LLM.
* Enabled retrieval-augmented generation for accurate, context-aware responses based on recent financial news.

Technical Skills

Languages: Python, C/C++, SQL
Frameworks: Django, Langchain, Pytorch, Numpy, Pandas, Scikit-Learn
Databases: PostgreSQL, SQLite
Tools: Git, Docker, Postman, VS Code
Practices and Concepts: Agile, Scrum, SDLC, CI/CD, Transformers,RAG, Fine Tuning , Embeddings, Vector Databases, LLM
