Jashanjot singh

Jashanjotdhiman@gmail.com 6239907775

PROFILE

Aspiring Software Developer with expertise in Python, Django, AI/ML, and Web Automation. Passionate about building efficient, scalable solutions and leveraging AI for automation. Seeking an opportunity to apply technical skills in a dynamic environment.

SKILLS

Programming: Python, C++, Prompt Engineering

Database: MySQL, MongoDB, ChromaDB, Qdrant

Web Frameworks: Django, Playwright,streamlit

AI/ML: LLM, Scikit-learn, Pandas, NumPy, ollama ,openAi , RAG , NLP

PROFESSIONAL EXPERIENCE

AI Agent Framework for Web Automation | AI Developer 02/2025 – 05/2025
Jio Platform Limited Gurugram

- Built an LLM-powered agentic web automation framework using **Microsoft AutoGen** and **Granite3-8B (Ollama)**.
- Developed a **RAG Q&A system** with **LangChain**, **Qdrant/ChromaDB**, and **LLaMA** over uploaded documents.
- Integrated **FastAPI** to expose agent workflows as scalable automation services.

AIML Developer 05/2025 – 09/2025
Xpedicr Pvt LTD Remote, India

- Developed a medical chatbot for symptom detection and disease prediction.
- Suggested precautions, home remedies, and nutrition plans via chatbot.
- Used LLaMA 3.2, Granite, Meditron, Bio_ClinicalBERT for medical Q&A.
- Integrated XrayGPT for X-ray/MRI image analysis.
- Fine-tuned TrOCR on IAM dataset to read handwritten prescriptions.

AI Engineer 10/2025 – Present
Future Tech IT Global (Equiax) Hyderabad,India

- Built AI agents for business workflows using **CrewAI**.
- Implemented a **RAG agent** over **10,000+ company documents** for fast, accurate retrieval.
- Fine-tuned **custom LLMs** for domain-specific performance improvements.

PROJECTS

Real-Time Email Spam Detection System
Developed a real-time email spam detection system using machine learning models (Naïve Bayes, SVM) with TF-IDF feature extraction for accurate classification. Integrated Google API to fetch emails dynamically and implemented Watchdog for real-time monitoring along with Plyer for instant spam alerts. Built a Streamlit-based interactive UI to visualize email classification and manage spam detection efficiently.

Agentic RAG Chatbot with Multi-Agent Architecture
Developed an advanced Retrieval-Augmented Generation (RAG) chatbot leveraging a multi-agent architecture and a custom Model Context Protocol (MCP) for seamless inter-agent communication. Implemented robust document processing across diverse formats, efficient vector storage (Qdrant), and contextual response generation using local Large Language Models (Ollama).

CERTIFICATES

Python
Training with Netsmartz Infotech India Pvt. Ltd. in Python Technology and MySQL Duration:-45 days

C++
Training in Office Automation , C++ , Web Development at Baba Banda Singh Bahadur Engineering College

CCNA
Training in CCNA Networking at GN Infotech Authorised Training Centre of C-DAC

EDUCATION

Bachelor of Technology 08/2021 – 05/2025
Baba Banda Singh Bahadur Engineering College Punjab, India
