OBJECTIVE

A seasoned software engineer, with 17 years of expertise in design, develop and high-quality products delivery, wants an association with growth and value-oriented organization to deliver great value to their customers and partners.

EDUCATION

Maharaja Sayajiorao University
MBA IN FINANCE
2015 | Vadodara, India
CGPI – 4.7 / 6.0

Dharmsinh Desai University
B.E. IN INFORMATION TECHNOLOGY
2007 | Nadiad, India
First Class – 64%

SKILLS

PROGRAMMING
Agentic AI | MCP | Java | SpringBoot
Microservices | Restful Api
TDD | .Net | VC++ | Vb.Net
PL-SQL | Html | JavaScript | CSS
PowerShell | VBScript | Vb6
MVC | WCF | WPF | AWS

TOOLS
Github Copilot | Claude code | Claude Cursor | VS Code | IntelliJ Idea
Git | Jenkins | MS Visio

DATABASES
PG Vector | Oracle | Ms SQL Server | PostgreSQL | MySQL

INTERESTS
Cooking | Spirituality | Equity Market | Generative AI Applications

INSPIRATION

Life is no brief candle to me. It is a sort of splendid torch which I have got a hold of for the moment, and I want to make it burn as brightly as possible before handing it on to future generations.
By BERNARD SHAW

EXPERIENCE

REDWOOD SOFTWARE | AI / JAVA CONSULTANT
Oct, 2023 - Present | Remote

- Architected and led delivery of Redwood RangerAI, an enterprise AI automation and orchestration platform from concept to production.
- Designed AI architecture leveraging MCP, RAG, fine-tuning, and vector databases to enable secure, context-aware LLM-driven automation.
- Built scalable retrieval and grounding pipelines using vector search to improve accuracy, reliability, and explainability of AI outputs.
- Integrated LLMs into enterprise orchestration workflows, balancing performance, security, and operational robustness.
- Led and mentored a team of 2 senior engineers, driving architectural decisions, code quality, and timely delivery.
- Partnered with product and platform teams to align AI capabilities with real-world automation use cases and business goals.

AUTOMATION ANYWHERE | LEAD SOFTWARE ENGINEER
2012 - Aug, 2023 | Vadodara

- Owned end-to-end design and delivery of core RPA platform features, driving architecture, development, testing, and production readiness.
- Architected highly available, scalable, and resilient systems, applying proven design patterns and performance optimization techniques.
- Led feature ownership and technical decision-making, ensuring long-term platform evolution and maintainability.
- Enforced engineering excellence through code reviews, TDD, and high unit test coverage, improving code quality and reliability.
- Implemented CI/CD pipelines using Jenkins, enabling continuous integration and automated deployments.
- Served as Subject Matter Expert (SME) for production support, resolving complex customer issues and improving system stability.
- Delivered using Agile/Scrum methodologies, collaborating cross-functionally to accelerate product innovation.

PRODUCT EXPOSURE

REDWOOD SOFTWARE | AI / JAVA CONSULTANT
2023 - PRESENT

- **Architecting and delivering AI-driven product capabilities** using **RAG, fine-tuning, vector databases, and LLM orchestration**, enabling intelligent automation use cases.
- **Designed a scalable, platform-agnostic AI architecture**, allowing seamless integration with multiple AI/LLM providers.
- **Leading and mentoring a team of 2 Senior Software Engineers**, providing architectural guidance, reviews, and delivery oversight.
- **Integrated AWS services (EC2, S3)** to enable cloud-native features, scalability, and resource management.
- **Drove shift-left engineering practices** by integrating **SonarQube, Control Freak (Jira), Black Duck, Veracode, and Bamboo CI**, improving code quality, security, and release velocity.

AUTOMATION ANYWHERE | LEAD SOFTWARE ENGINEER
2012 - 2023 | Vadodara

- **Designed and built Java-based automation frameworks and libraries** for Automation Anywhere A360, supporting actions across **Database, Active Directory, JSON, Windows, Document AI, and system integrations**.
- **Developed migration libraries** to seamlessly convert legacy bots to the A360 platform, accelerating customer upgrades.
- **Delivered features with ~90% unit test coverage using TDD**, achieving near-zero regression without dedicated QA/SDET involvement.
- **Architected and led development of a microservices-based product (IQ Bot)** for intelligent document processing; led a team of 3 engineers and integrated the solution with the core platform.
- **Built RESTful microservices using Java and SparkJava**, orchestrated via **RabbitMQ** for reliable inter-service communication.
- **Leveraged AWS S3 extensively** for artifact versioning, storage, and resource management.
- **Packaged multi-technology stacks into a unified on-prem installer** using InstallShield, enabling enterprise-grade deployments.
- **Contributed to multiple major releases of Automation Anywhere (v8.x, v9.x, v11.x)**, developing core RPA client features using **C#/.NET**.
- **Designed and implemented RPA actions** across domains including **Database, Active Directory, Windows, FTP, PDF, REST, XML, Web Automation, and Object Cloning**.
- **Developed a multi-threaded web crawler** for URL discovery and health analysis.
- **Built security-critical components** for secure communication with the Control Room (web platform).
- **Created a dynamic theming framework** (CSS-like) for Windows desktop applications.
- **Contributed to a proprietary load-testing framework** and remote machine automation tooling.
- **Developed bot migration tools** to upgrade automations to newer platform versions.

CMC Limited | IT PROFESSIONAL
2011- 2012 | Mumbai

Access Computech Pvt Ltd | SOFTWARE DEVELOPER
2008- 2011 | Vadodara
