SKILLS & EXPERTISE

- **Programming & Data Analysis:** Python, SQL (MySQL), Advanced Excel (Pivot Tables, VLOOKUP, Power Query), Statistics & Probability, Data Cleaning & Wrangling, Exploratory Data Analysis (EDA)

OBJECTIVE

Entry-level Data Scientist with a strong foundation in statistics, Python, SQL, machine learning, and data visualization. Hands-on experience in data cleaning, exploratory data analysis (EDA), feature engineering, and developing predictive models through academic and capstone projects. Seeking an opportunity to apply analytical thinking, machine learning techniques, and business problem-solving skills to support data-driven decision-making while continuously developing technical expertise.

CERTIFICATIONS

1. Masters Program - Data Scientist : Simplilearn Certified in collaboration with IBM - 2025

- Data Science with Python, R
- Advance Machine Learning
- Tableau 10
- Big Data Hadoop & Spark Developer
- SQL Training
- Data Science Capstone

2. AWS Certified Cloud Practitioner - AWS
3. Microsoft Data Analyst Associate (DA-100) - Microsoft
4. Python Data Structures - Coursera
5. DS and Management with MySQL - Coursera

EXPERIENCE

Digital Blinc - Artificial Intelligence (AI) and Machine Learning ,
Duration: 2 Months | Issue Date: 2025-09-26

- Gained hands-on exposure to Data Processing, Model Training, and Advanced AI Techniques.
- Contributed to the development of an AI Chatbot designed for educational applications.

PROJECTS

1. Healthcare Insurance Cost Analysis | Python, ML, SQL, Tableau.

- Integrated multi-source healthcare datasets, performed feature engineering, and conducted EDA and hypothesis testing to identify key cost drivers.
- Built Linear, Ridge, and Gradient Boosting models with cross-validation and presented insights via SQL analysis and a Tableau dashboard.

2. US Airlines Delay Analysis | Python, ML, SQL, Tableau.

- Combined flight, airport, and runway data with external sources to analyze factors contributing to avoidable delays.
- Developed classification models and delivered delay insights through SQL queries and an interactive Tableau dashboard.

3. Credit Card Fraud Detection System | Python, ML, Scikit-learn.

- Built a Logistic Regression–based fraud detection model for highly

- **Machine Learning & NLP:** Regression, Classification, Logistic Regression, Decision Trees, Random Forest, Gradient Boosting, Model Evaluation, Cross-Validation, Feature Engineering, Imbalanced Data Handling, Natural Language Processing (Basics)
- **Libraries & Frameworks:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, SciPy, NLTK (VADER)
- **Databases & ETL:** MySQL, SQL Joins, Subqueries, Aggregations, Indexing, Data Modeling, ETL Concepts
- **Visualization & BI Tools:** Tableau, Power BI (Basics)
- **Cloud & Development Tools:** AWS (Cloud Practitioner - Fundamentals), Jupyter Notebook, VS Code, Git, GitHub

imbalanced data, focusing on maximizing recall.

- Achieved ~90% recall on fraudulent transactions through effective preprocessing and imbalance handling.

4. E-commerce Product Review Sentiment Analysis | Python, NLP.

- Developed NLP pipelines using VADER and Transformer-based models to classify customer sentiment.
- Analyzed sentiment distribution and review patterns to generate customer insight reports.

EDUCATION

MCA, Data Science
MIT ADT University, CGPA: 7.3/10
May 2025

B.Sc., Information Technology
Vidyalankar School of Information Technology, CGPA: 7.5/10
May 2023

ADDITIONAL INFORMATION

- **Languages:** English, Hindi, Marathi, Telugu.
- **Soft Skills:** Communication, Problem Solving, Critical Thinking, Stakeholder Communication, Team Collaboration, Data Storytelling, Adaptability, Presentation Skills.
- **Relevant Coursework:** Machine Learning, Data Structures & Algorithms, OOPs, Operating Systems, Computer Networks, Python Programming.
- **Interests:** Data Visualization, Business Analytics, Competitive Programming, Learning New ML Techniques.
- **Availability:** Immediate.
