PROFILE

Experienced Flutter Developer with a strong track record of building scalable, user-centric mobile applications across Android and iOS platforms. Specialized in developing real-time, AI-integrated systems including video analytics and law enforcement solutions. Proven ability to architect, optimize, and deliver high-impact apps in fast-paced, collaborative environments. Passionate about solving complex problems, driving innovation, and turning ambitious ideas into robust digital products.

PROFESSIONAL EXPERIENCE

08/2024 – Present
Gurugram, Haryana

Staqu Technologies, Software Developer

- Lead Flutter development for **Jarvis**, an AI-powered video analytics platform designed for real-time surveillance, behavioural analysis, and intelligent alerting.
- Built and maintained the **Jarvis Streamer App**, which converts smartphones into secure mobile surveillance units, effectively replacing traditional CCTV systems.
- Played a key role in the development of **state-level police tech solutions**, delivering scalable, secure, and user-friendly mobile applications:
- Integrated **AI/ML-driven features** such as face recognition, license plate detection, and event tracking directly into mobile workflows.
- Collaborated with cross-functional teams, including law enforcement tech officers, AI researchers, and backend engineers to ensure robustness, compliance, and scalability.
- Ensured strict adherence to **security, data privacy**, and **government compliance standards** during deployment and testing phases.

02/2022 – 08/2024
Mohali, Punjab

ChicMic Studios, Associate Software Developer

- Developed and maintained cross-platform mobile applications for Android and iOS using the **Flutter framework** for international clients.
- Collaborated with foreign stakeholders to understand app requirements, design UI/UX, and deliver scalable mobile solutions.

- Integrated third-party APIs and native modules to extend app functionality across platforms.
- Managed app deployment to the Play Store and App Store with a strong focus on performance optimisation.
- Followed **Agile methodologies** and contributed to sprint planning, code reviews, and feature estimations.
- Mentored junior team members on Flutter best practices and modular architecture.

EDUCATION

2018 – 2022
Mathura, India

Hindustan College of Science & Technology, Mathura,
Bachelor of Technology (B.Tech) – Computer Science & Engineering

SKILLS

Technical Skills — 🔹 **Languages & Frameworks** | Dart | Flutter | Android | FlutterFire (Firebase SDK for Flutter) | 🔹 **Mobile App Development** | Cross-platform development (Android & iOS) | App architecture & modular codebase design | Custom UI/UX implementation | State Management: **Riverpod**, **Provider**, **GetX** | 🔹 **Backend & APIs** | Firebase Services (Firestore, Auth, Storage, Cloud Functions) | RESTful API Integration | Real-time communication using **SSE** / WebSockets | 🔹 **AI & Video Integration** | Mobile integration of **AI/ML models** | Live video streaming & mobile surveillance (Jarvis Streamer) | Video analytics and tracking overlays | 🔹 **DevOps & Tools** | App deployment to the Play Store & App Store | Amplitude, Razorpay, Sendbird SDK | Git, CI/CD (GitHub Actions preferred) | 🔹 **Development Methodologies** | Agile/Scrum | Feature estimation & sprint planning | Project lifecycle ownership | 🔹 **Additional Skills** | Project Estimation | Database Management (Firestore, SQLite, Hive) | Mentoring & team support (Flutter Trainer experience)

PROJECTS

Jarvis App, (AI-Powered Video Analytics Platform)
- Developed core features for **Jarvis**, an AI-powered mobile surveillance and video analytics platform.
- POI management and Audit Alerts.
- Ticket Management System and DVR recordings.
- Enabled seamless communication with backend services for event reporting, camera control, and alert management.

Jarvis Streamer App
- Built a mobile app that transforms smartphones into 24/7 live surveillance devices using **low-latency streaming** protocols.
- Used Larix Broadcaster SDK.

- Designed for rapid deployment in remote and sensitive locations without traditional CCTV infrastructure.

PAIS – Punjab Police, (Punjab Artificial Intelligence System)
- Contributed to PAIS, a mobile-first solution for **criminal data access, suspect tracking**, and **AI-based face and audio search** for the Punjab Police.
- Handled mobile access to **criminal database**, enabling **text-based search**, **FIR viewing**, and **seizure record management**.

Trinetra – UP Police, AI powered Big Data Analysis & Criminal search technology for UP Police
- Developed secure modules for **AI-powered face recognition** and **audio-based suspect identification**.
- Integrated **"Crime GPT"**, an AI assistant for **instant criminal record queries**, FIR summaries, and suspect lookup via natural language input.

SIMBA – Nagpur Police, System Integrated for Monitoring and Big Data Analytics
- Streamlined access to live criminal profiles and case metadata in the field.
- Designed seizure detail modules for field officers to quickly log and update evidence records.

Eagle – Haryana Police, Electronic & Analytic Gateway For Law Enforcement
- Delivered components for crime pattern tracking, integrated facial recognition API, and suspect behaviour analysis.
- Criminal data access, suspect tracking, and AI-based surveillance

Chakra – Bihar Police
- Delivered components for crime pattern tracking, integrated facial recognition API, and suspect behaviour analysis.
- Customised UI/UX for fast in-field usage by officers.

Firolauss Ai App
- AI assistant that allows users to interact via voice commands and chat.
- Utilise the Particle Network SDK for secure logins.

MyLegacyApp
- In this app, you can store your memories, images, private messages, email passwords, and bank information.
- Another unique feature is that you can generate our will for friends, family, and relatives.

Old Delhi Food App
- Online food ordering app built from scratch using Getx.
- Seamless integration of Razorpay payment gateway.

Splito App
- Splito is a payment application for managing shared expenses and payments within groups.
- Razorpay integration as a payment gateway.

VibelistApp
- Seamless Spotify Integration that enables users to play their favourite songs directly within the app.
- AI-powered song Generation and fetched data using SSE events.

Stud Finder App

- Utilise device sensors for real-time stud detection and use Riverpod as state management.
- Designed and executed complex UI featuring multiple sections for sensor-based, graphical, digital meter and in-depth stud detection.

ChicMic CafeApp

- Multi-Category Menu: A user-friendly app offering a diverse menu, categorised for easy navigation.
- Wallet Integration: Allows users to top up their wallet within the app, simplifying payment processes.

AWARDS

2025

The Bug Slayer, Staqu Technologies
*Awarded for exceptional debugging and problem-solving skills during mobile app development.*Recognized for swiftly identifying and resolving critical issues in production-level Flutter applications, significantly improving system stability and performance.
