Professional Summary

Instrumentation Engineer with **2+ years** of hands-on experience in Electrical & Instrumentation (E&I) maintenance and field instrumentation across industrial environments. **Proficient in PLC, DCS, SCADA, HMI, VFDs,** and pneumatic automation systems. Adept at reading **P&ID** diagrams and performing efficient troubleshooting under pressure, including in hazardous areas. Strong commitment to **safety, reliability,** and continuous improvement. **Open to relocation** and eager to contribute technical expertise to dynamic engineering teams.

Work Experience

E&I Executive | ***Solar Industries India Ltd, Nagpur*** March 2024 - March 2025

- **Led field instrumentation** operations in an explosive manufacturing facility, achieving **98% equipment uptime** through strong **team coordination**, effective **cross-departmental communication**, and hands-on technical leadership.
- **Proactively streamlined calibration** schedules and replacing outdated flameproof sensors in **ATEX Zone 1 to reduce failure rates by 20%**
- **Minimized PLC/DCS downtime by 25%** through structured troubleshooting and real-time diagnostics, balancing technical precision with clear communication across operations and maintenance teams.

E&I Engineer | ***Evonith Metallics Ltd, Wardha*** Aug 2022 - Nov 2023

- **Reduced unplanned maintenance by 30%** by implementing predictive maintenance strategies for sensors, actuators, and control valves, while coordinating closely with operations teams in **high-temperature blast furnace environments**.
- **Improved system reliability by 20%** through precise calibration and tuning of field instrumentation, demonstrating **attention to detail, process discipline**, and adaptability in extreme industrial conditions.
- **Maintained strict compliance** with safety protocols, contributing to a **zero-incident record** over 12 months, driven by a **safety-first mindset** and commitment to documentation and standard operating procedures.

Team Leader | ***Mahindra and Mahindra Ltd, Pune*** Dec 2018 - Jun 2019

- **Increased fixture uptime by 20%** by executing preventive and corrective maintenance on welding and clamping fixtures for SUV and truck assembly lines, demonstrating **responsibility and technical precision**.

Diploma Trainee Engineer | ***Bajaj Auto Ltd, Aurangabad*** Jun 2017 - Jun 2018

- **Assisted in reducing assembly errors by 10%** by ensuring accurate setup and alignment of motorcycle components, demonstrating strong **attention to detail** and a commitment to **quality assurance**.

Education

Bachelor of Engineering (B.E.) in Instrumentation Engineering - 81.60% Aug 2019 - July 2022
Government college of engineering, Chandrapur

- Participated in the "**Ek Bharat Shrestha Bharat**" initiative under **NYKS**, promoting national integration and cultural awareness.

Diploma in Mechanical Engineering - 81.50% July 2014 - June 2017
Government Polytechnic Nagpur

Technical Skills & Tools

PLC - SCADA & Industrial Automation (PGDIA)

- **Experienced with PLCs** (Siemens S7-300/1200, Allen Bradley, Delta, ABB, Mitsubishi, Schneider, Fatek), SCADA (WinCC, Wonderware InTouch), and HMI tools (TIA Portal, RSLogix). **Skilled in VFDs** (ABB, Delta), control panel wiring, and relay logic.

NI - LabVIEW for VI development.
CAD/CAM (Creo Parametric)
CNC Machine Operation & Programming

Certifications

Post Graduate Diploma in Industrial Automation (PGDIA), IPCS (May 2025)
LabVIEW Industrial Automation, National Instruments (2021)

Projects

Automatic Loading and Unloading on a Belt Conveyor Jan 2017

- **Improved efficiency** by reducing **manual effort** and increasing throughput by **approximately 25%** during lab-scale testing.

Automatic Railway Gate Crossing Control Mar 2022

- **Enhanced safety** by eliminating manual intervention, reducing response time, and simulating **accident risk reduction by over 80%** in controlled test scenarios.
