Objective

Dynamic Senior Network Engineer with 9+ years of experience in network infrastructure, firewall security, wireless networking, and IT operations. Skilled in managing enterprise networks, routing & switching, VPNs, monitoring tools, and infrastructure deployments. Experienced in handling large-scale network environments, security administration, and cross-functional IT operations.

Professional Summary

Experienced Network Engineer with strong expertise in enterprise network management, firewall security, routing & switching, wireless infrastructure, and network monitoring. Hands-on experience with Cisco, Sophos, HP, Netgear, TP-Link, and D-Link devices. Skilled in troubleshooting, IT asset management, VPN configuration, and infrastructure deployment. Proven ability to manage critical network environments with minimal downtime and improved operational efficiency.

Education

- Bachelor of Technology in Electronics Engineering.
- Diploma in Industrial Electronics.

Experience

Senior Network Engineer – Maitri Lab Grown Diamonds

(22-08-22 to Present)

- Managed Sophos firewall security operations including policy creation, user access management, VPN configuration, web filtering, and network security administration for 600+ users while designing and implementing enterprise network infrastructure to improve operational efficiency.
- Designed and implemented network infrastructures for over 600+ users, utilizing advanced routing and switching techniques to improve operational efficiency.

- Configured and optimized Cisco, Netgear, TP-Link, and HP switches, integrated routing protocols and implemented Sophos firewalls, enhancing network performance and security.
- Performed comprehensive network assessments, identifying critical vulnerabilities, and implemented strategic recommendations to strengthen system security.
- Led cross-functional teams in planning and executing network IOS upgrades to improve system performance and reduce downtime.
- Monitored network performance using SolarWinds Orion, WhatsUp Gold, and Zabbix while actively managing network elements and resolving issues promptly to improve uptime.
- Established point-to-point network connectivity across different locations to ensure optimal traffic flow and seamless communication between sites.
- Handled IT asset management, NAS storage administration, and cloud-based Seqrite Endpoint Security. Led new site IT infrastructure installations.
- Coordinated and guided a team of 6 members for network operations, troubleshooting, and IT infrastructure support activities.

Senior Engineer – CPS Technologies

(01-01-22 to 20-08-22)

- Managed and maintained network infrastructure for multiple clients, ensuring high availability and reliability.
- Implemented security measures such as enterprise endpoint security and VPNs.
- Resolved network issues and outages in a timely manner, minimizing downtime and business impact.
- Coordinated with multiple vendors for device failure and replacement.

Network Engineer – Reliance Industries, Hazira, Surat

(Payroll – Harryson Infotech) (13-10-20 to 31-12-21)

- Managed and optimized 600+ network switches and 250+ access points, improving connectivity and performance for over 1,000+ users in a high-traffic corporate environment.
- Utilized SolarWinds and WhatsUp Gold to monitor network performance, achieving minimal downtime through proactive traffic analysis.
- Upgraded IOS systems and replaced malfunctioning switches to improve network stability and reduce downtime.
- Assisted in planning and execution of network projects and initiatives to improve efficiency and performance.

- Prepared daily reports to maintain and improve network performance.
- Oversaw asset tracking and created detailed failure reports, reducing response time to technical issues.

Urban Jio Point Manager – Reliance Jio Infocomm Limited

(13-11-18 to 10-07-20)

- Designed and implemented GPON underground fiber networks to deliver high-speed broadband services to residential and business customers across Surat, supporting over 1000+ active connections.
- Performed route selection from OLT locations to societies/buildings in an efficient manner.
- Managed fiber optic installations including cabling and splicing for underground and aerial fiber networks.
- Conducted joint visits with construction teams for fiber route planning.
- Ensured fiber optic infrastructure operated efficiently and met service-level agreements (SLAs).

Junior Engineer – Airlink Communications Pvt Ltd

(19-03-2015 to 18-04-2018)

- Performed network configuration, troubleshooting, and maintenance tasks.
- Learned and applied networking concepts and technologies in a real-world environment.
- Configured and installed wireless routers, switches, and access points.

Skills

- SolarWinds Orion, Zabbix, WhatsUp Gold
- Network Monitoring & Troubleshooting
- IT Asset Management & NAS Administration
- Seqrite Endpoint Security Management
- Vendor Coordination & Infrastructure Deployment
- Access Point & Switch Configuration

Certifications

- Cisco Certified Network Associate (CCNA)
