Professional Summary

Data Analyst / Power BI Developer with 5+ years of experience delivering enterprise-grade business intelligence, advanced analytics, and data visualization solutions. Proven expertise in designing high-impact **Power BI dashboards**, developing complex **DAX-driven analytical models**, and transforming large-scale datasets into actionable business insights. Strong background in **SQL optimization, data modeling, AI-assisted analytics, and reporting automation**, with a demonstrated ability to identify data inconsistencies, improve data quality, and optimize reporting performance. Adaptive to working with cross-functional stakeholders to build scalable, intuitive, and business-centric analytical solutions that drive operational efficiency and strategic decision-making.

Technical Skills

Business Intelligence & Visualization: Power BI & Tableau(Desktop & Service), DAX, Advanced Data Visualizations, Data Mining, Data Cleaning, Mobile Dashboard Development, Time Intelligence, Business Analysis Insights, VLOOKUP, KPI Scorecards & Dashboard, Developing Visual Reports, Data Automation, Six Sigma - DMAIC Methodologies, Process Mapping, Root Cause Analysis, AI-Assisted Analytics & Automated Insights **Data Engineering**: ETL Processes, CTEs, Data Modeling(Star Schema), Data Warehousing, Azure Data Factory, Azure Logic Apps, Azure Functions, Azure Data Lake, Power Apps, Power Automate, Rest APIs, MS-365, Tableau Server, Tableau Public
AI & Intelligent Reporting: Microsoft Fabric AI Integration, Generative AI Tools, AI-Powered Insights, Automated Narrative Summaries, Copilot-Assisted Analytics
Cloud Platforms: Microsoft Azure (ADF, ADLS, Synapse), AWS, Snowflake, Pyspark.
Programming & Scripting: Python, SQL, Power Query
Database Management: SQL Server, Database Performance Tuning, Query Optimization, Airflow, Terraform, a host of AWS services including EMR, EKS, Lambda
Interpersonal Skills:Teamwork and Team Leadership, Client Engagement, Communication Skills, Time Management, Analytic Skills, Problem- Solving, Stakeholder Communication
Microsoft Stack:Excel (Advanced), Power Query, Office 365 Suite, Team, Word, PPT, Outlook, Visio, WBS, Googlesheet, Spreadsheet, OneNote.

Professional Experience

Data Analyst - BI Developer Feb. 2021 – Present
Tech Encrypter Private Limited *Noida, Uttar Pradesh*
Spearheaded the design and development of **enterprise-scale Power BI dashboards and analytical reporting solutions**, enabling leadership teams to monitor operational, financial, and business KPIs in real time.

- Delivered highly interactive and **mobile-responsive Power BI reporting solutions**, improving accessibility, user adoption, and decision-making efficiency across departments. Engineered advanced **DAX calculations, time intelligence measures, and KPI frameworks** to support complex analytical requirements and executive-level reporting.
- Designed scalable **data models, semantic layers, and optimized schema relationships**, ensuring high-performance analytics and reporting accuracy. Developed and optimized complex **SQL queries using joins, CTEs, window functions, and query tuning techniques** to support high-volume data processing and transformation.
- Conducted in-depth analysis of **data discrepancies, anomalies, and reporting inconsistencies**, identifying root causes and implementing corrective data quality solutions. Collaborated closely with business stakeholders, analysts, and engineering teams to align reporting outputs with business logic, governance standards, and strategic objectives.
- Leveraged **Generative AI and Microsoft Fabric AI capabilities** to automate reporting workflows, generate intelligent insights, and improve analytical productivity. Developed **AI-driven narrative summaries and contextual analytical insights**, enhancing business users' ability to interpret dashboard outputs effectively.
- Optimized report performance through **data model refinement, DAX optimization, and query performance engineering**, significantly reducing dashboard load times.
- Established documentation standards for **metric definitions, transformation logic, reporting assumptions, and governance practices**, improving transparency and maintainability.

- Utilized Snowflake's SQL capabilities to automate ELT processes, manage data ingestion, and execute scheduled data loads to support comprehensive analysis.
- Integrated and transformed data from sources such as Snowflake, SQL Server, Excel, REST APIs, and Azure, ensuring comprehensive data coverage and consistency.
- Built scalable automation solutions using **Power Automate**, **Power Apps**, and **custom scripting (Python, SQL, Power Query)** to orchestrate end-to-end business workflows, enhance data accuracy, and integrate BI outputs with Microsoft 365 and Azure services.

Key Projects

Enterprise Executive KPI & Business Intelligence Platform | *Power BI, DAX, SQL, Snowflake, Figma* 2023

- Architected and delivered a centralized **enterprise business intelligence platform** providing real-time visibility into financial, operational, and executive performance metrics. Developed advanced **DAX-driven analytical models and KPI frameworks**, enabling sophisticated trend analysis, forecasting, and performance measurement. Designed scalable **star schema data models and optimized table relationships**, significantly improving dashboard responsiveness and analytical efficiency.
- Built highly interactive and **mobile-optimized Power BI dashboards** with drill-through analysis, dynamic filtering, and self-service reporting capabilities. Engineered optimized SQL transformation logic and query structures for processing large-scale datasets with improved performance and reliability. Implemented comprehensive **data validation and reconciliation frameworks**, ensuring consistency, accuracy, and trust in reporting outputs. Integrated **AI-powered reporting features and automated business summaries**, improving insight generation and executive decision-making.

AI-Driven Sales Performance & Forecasting Analytics Solution | *Power BI, DAX, SQL, Python, Microsoft Fabric AI*202

- Designed and implemented an advanced **AI-enabled analytics and forecasting solution** to support strategic sales planning and operational performance analysis. Built complex **Power BI dashboards and DAX calculations** to deliver multi-dimensional analytical insights across products, regions, and revenue streams. Leveraged **Generative AI capabilities** to automate narrative insights, anomaly explanations, and contextual business summaries for leadership reporting.
- Developed advanced SQL queries and transformation pipelines to ensure accurate, reliable, and high-performance reporting workflows. Implemented automated data quality validation and reconciliation processes to proactively identify inconsistencies and improve reporting reliability. Delivered responsive and mobile-friendly dashboards, significantly improving accessibility and executive-level analytical consumption.

Education

Rajasthan Technical University Kota, Rajasthan
Bachelor of Technology in Engineering – 6.8 CGPA *Graduated: January 2021*

Certifications & Training

Microsoft Power BI Certification | AWS Certification | Google Data Analytics Professional Certificate | Google Project Management Professional Certificate | Deloitte Australia Data Analytics Job Simulation

Achievements & Leadership

LinkedIn Thought Leader – 21000+ followers, sharing data analytics insights and career guidance
