MADAN CHAWLA

Senior Manager - Analytics

+91 7060334110 madanchawla.iitr@gmail.com Noida, India

Senior Analytics leader with ~7 years of experience driving **data-driven product and business decisions** in fintech. Proven track record of owning analytics charters, defining KPI frameworks, and enabling **experimentation-led product development** that drives growth and customer experience.

Experienced in partnering with **Product, Business, Engineering, Risk, and Data Science** teams to translate complex data into scalable analytical frameworks and strategic insights supporting product and business decisions.

Strong technical foundation in **SQL, BI tools, and statistical analysis**, combined with structured problem solving, stakeholder leadership, and analytics roadmap development.

EDUCATION

- **Indian Institute of Management Calcutta (IIMC)**- Executive General Management (2026)
- **Indian Institute of Technology Roorkee (IITR)**- B.Tech (2019)

EXPERIENCE

Paytm | Senior Analytics Manager - Product

Noida, India | Apr 2023 – Present

- Lead analytics for large-scale payments products, driving **data-driven product strategy and business decision-making** across product, business, and engineering teams.
- Act as analytics partner to leadership, embedding experimentation culture across product strategy and operational initiatives.
- Own analytics for key product and business charters within the UPI Vertical, defining KPI frameworks and **diagnostic metrics** to **monitor funnel performance, transaction health, and user behaviour.**
- Partner with product and business leadership to translate growth and customer experience goals into **structured analytics roadmaps and experimentation frameworks**.
- **Lead end-to-end experimentation (A/B testing)** across user acquisition, engagement, retention, and payment success funnels – **including hypothesis design, metric definition, sample sizing, and inference validation.**
- Design and evaluate experiments ensuring **statistical rigor, correct metric design, and decision frameworks for product rollouts.**
- Build **scalable dashboards** and **reporting layers** using **SQL** and **BI tools**, improving visibility of product performance across stakeholders.
- Partner with Data Engineering, Product, and Risk teams to improve **data instrumentation, metric definitions**, and data reliability.
- Translate analytical insights into **strategic recommendations influencing product roadmap and operational decisions.**

Meesho | Senior Product Analyst

Bengaluru, India | May 2021 – Apr 2023

- Led product analytics and experimentation across Growth, Trust, and Seller Experience
- Managed and mentored a team of 3 analysts supporting multiple product verticals
- Built self-serve dashboards and analytical frameworks linking seller experience, NPS drivers, and funnel retention metrics
- Conducted hypothesis testing and experimentation to evaluate growth and monetization initiatives
- Led monetization analytics covering seller Ads ROI, festive campaigns, deal performance, and pricing competitiveness
- Built and scaled the "Graded Views" framework across 100% of catalog to improve product quality and buyer conversion
- Defined trust markers and feature thresholds on product detail pages to strengthen buyer confidence and improve conversion rates

EXL | Consultant II – Analytics

Gurgaon, India | Oct 2020 – May 2021

- Worked on retail lending analytics and risk strategy initiatives for a large US financial institution.
- Supported retail lending strategy and portfolio analytics through structured data analysis and reporting
- Contributed to CCAR reporting and model validation initiatives for regulatory compliance
- Performed fraud and risk analytics deep dives to identify patterns and operational insights
- Collaborated with cross-functional teams to translate analytical findings into actionable risk strategy inputs

Mfine | Business Analyst – Growth

Bengaluru, India | Jun 2019 – Oct 2020

- Owned analytics for growth experiments and new product initiatives in a digital healthcare platform
- Built dashboards, forecasts, and business metrics frameworks to support leadership decision-making
- Partnered with Technology, Operations, Doctors, and Supply Chain teams to scale growth initiatives and product adoption
