napo123@rediffmail.com

Summary:

- Android Developer with 8+ years of experience in designing and developing scalable mobile applications using Java and Kotlin.
- Proficient in Android SDK, Jetpack components, and MVVM architecture, ensuring robust, maintainable, and high-performing applications.
- Skilled in integrating third-party APIs, Bluetooth, Aadhaar services, and biometric authentication, delivering secure and feature-rich mobile solutions.
- Hands-on expertise in Room Database, Retrofit, Coroutines Flow, Dagger, Hilt, and Jetpack Compose, with a strong focus on clean code and performance optimization.
- Proven track record of delivering user-friendly, multilingual, and client-centric apps across domains such as e-commerce, mobility, and government services.

Skills:

Git	JSON	Dagger
Retrofit	Rest APIs	Hilt
Android SDK	Kotlin	Jetpack Compos
SQLite	Coroutines Flow	Aadhaar integration in Android
Room Database	MVVM	React Native

Experience:

Mooving Smart Mobility Pvt Ltd **Aug 2022 – Dec 2024**
Software Developer
Project: Driver App

- Designed and developed an Android application using Java, enabling drivers to manage leave, track earnings, and view the status of company-lent assets.
- Implemented features for driver onboarding and deboarding under a franchise model, ensuring seamless management of driver hierarchies within the app.
- Delivered a bilingual interface (Hindi/English) to improve accessibility and usability for a diverse driver base.

Project: Livserv App
https://play.google.com/store/apps/details?id=com.sar.livserv

- Developed a Bluetooth-based Android application using Java for testing batteries with SBJT, enabling accurate device communication and data handling.
- Implemented core functionalities such as engineer attendance marking, leave application management, and complaint creation, improving workflow efficiency.
- Enhanced app stability and performance in the Android ecosystem, ensuring a smooth and reliable user experience across devices.

Project: My Livserv App
https://play.google.com/store/apps/details?id=com.sar.mylivserv

- Developed an Android application using Java and Kotlin, like Livserv but with user-based customization to meet client-specific requirements.
- Implemented features for product warranty registration, enabling clients to easily register and manage product warranties through the app.
- Enhanced UI/UX and optimized performance within the Android ecosystem, ensuring seamless client engagement and usability.

Phoneme Solutions Pvt Ltd **Oct 2019 – Aug 2022**
Software Developer (Android Developer)

Project: Bihar Panchayat Election App

- Developed an Android application using Java to prevent voter duplication by capturing and verifying voter data with secure Aadhaar integration.
- Implemented biometric fingerprint capture and comparison features to detect and prevent fraudulent or duplicate voting.
- Optimized data handling and app performance in the Android ecosystem, ensuring accuracy, reliability, and secure voter verification.

Pavitra Retail Pvt ltd **Dec 2015 – Aug 2019**
Software Developer (Android Developer)
Project: Joybynature/Blozzom Android App

- Designed and developed an e-commerce Android application using Java for selling organic products, integrating secure product browsing and checkout features.
- Implemented interactive modules such as Q&A, comments, and an articles section, enhancing customer engagement and knowledge sharing.
- Optimized app performance and UI within the Android ecosystem, ensuring a smooth and user-friendly shopping experience.

Education:
B. Tech/B.E. in Computers from Indian Institute of Technology, Guwahati 2013
