EDUCATION

Master of Computer Application
Amrita Vishwa Vidyapeetham • 7.93 CGPA • Kerala, INDIA • 2021-23

Bachelor of Computer Applications
Guru Gobind Singh Indraprastha University • 8.34 CGPA • Delhi, INDIA • 2018-21

PROFESSIONAL EXPERIENCE

AI Data Specialist
SoftAge AI **Jan 2025 – Jun 2025, Gurugram, India**

• Created, recorded, and audited 19,000+ adaptive prompts and multi-step task executions (atomic, supervised, unsupervised) across agentic and generative AI models, utilizing tools like Google Suite, Unity, Claude AI, MS Azure, Google Colab, and Jupyter Notebook.

• Mapped and labelled UI components for workflow automation, and captured detailed user interactions with proprietary tools (Flux, SROT), improving structured dataset quality and contributing to enhanced AI model understanding and validation.

• Conducted quality audits on 2,000+ AI-generated prompts, refining context, logic, and language maturity while balancing high-volume, target-driven workflows across multi-client projects.

Graduate Engineering Trainee
Société Internationale de Télécommunications Aéronautiques **Feb 2024 – Oct 2024, Gurugram, India**

• Validated 500+ network service orders for airlines and airports across MEA & APAC, ensuring compliance, documentation accuracy, and timely deployment. Collaborated cross-functionally with engineers, billing, and delivery teams to resolve deployment bottlenecks, accelerating service activation.

• Analysed network infrastructure (bandwidth, VLAN, hardware, VPN) and resolved 15+ monthly discrepancies, improving deployment efficiency by 20%. Optimized ISP coordination, reducing project delays by 30% through precise service requirement documentation and proactive troubleshooting.

Cloud Security Associate Intern
Virtually Testing Foundation **Jun 2021 - Oct 2021, Delhi, India**

• Supported the deployment and management of cloud-based infrastructure, configuring resources for weekly project requirements while ensuring 100% security compliance and optimizing resource utilization.

• Documented cloud procedures and operational workflows, reducing troubleshooting time by 15% and enabling more efficient team processes.

PROJECTS

SMRZ 10K Report Summarizer *FastAPI, React, LangChain, Ollama*

• Developed a local end-to-end summarization system that processes SEC 10-K annual reports using offline LLMs (LLaMA 3.1:8b & Mistral-Nemo:12b) via Ollama, ensuring complete data privacy and zero cloud dependency.
• Engineered a FastAPI backend with document parsing, vector embeddings, and multi-stage summarization pipeline, optimized for GPU-based inference and local model execution. Summarized documents of 100s of pages to just 2-3 pages.
• Built a minimal React + Vite frontend for interactive uploads, real-time progress tracking, and summarized report generation, achieving a seamless user-to-model workflow on local hardware.

F1 Race Podium Prediction *FastF1, Pandas, Numpy, Matplotlib, Scikit-Learn, XGBoost*

• Built a pipeline that ingests session telemetry and qualifying data, sector times, clean-air pace, team performance, weather, and predicts race finishing times.
• Trained and compared Gradient Boosting, Random Forest, and XGBoost regressors. Measured performance with MAE and produced per-model top-3 podium predictions and visual comparisons.
• Delivered reproducible Colab notebook with plots of feature importance, MAE comparison, and a heatmap showing which models captured the actual podium.

Credit Card Approval Analysis *Pandas, Numpy, Matplotlib, Scikit-Learn*

• Conducted exploratory data analysis (EDA) on credit card application datasets, identifying key trends and cleaning data to prepare for model development.
• Built multiple classification models using algorithms such as Random Forest, Decision Tree, and k-Nearest Neighbors (kNN) to predict credit card approval likelihood. Tuned hyperparameters and evaluated model performance using metrics like accuracy, precision, and recall, achieving a 78% accuracy rate with kNN.
• Applied Principal Component Analysis (PCA) to reduce dataset dimensions, improving computational efficiency and model accuracy.

TECHNICAL SKILLS

Languages: Python, SQL

Tools/Frameworks: Pandas, Numpy, Flask, FastAPI, NLP, ML, Gen AI, PowerBI, Tableau, TensorFlow, Ollama, LangChain, Neo4j, n8n
