: 7416624672 **Email**: ashishahuja124@gmail.com **GitHub**: https://github.com/AshishAhuja124

TECHNICAL SKILLS

Languages	: JavaScript, TypeScript, Java, Python
Frontend Technologies	: React, Redux, Angular (JS & 13+), HTML5, CSS3, Tailwind, Single SPA (Micro frontend)
Backend Technologies	: Node.js, Express.js, RESTful APIs, GraphQL, System Design, Microservices
Databases	: MongoDB, MySQL, Oracle
Version Control	: Git, GitHub, Bitbucket, Gitlab, SVN
Cloud & DevOps	: AWS (EC2, S3, CloudFront, API Gateway, IAM, RDS), Docker, Jenkins, GitHub Actions, CI/CD
Project Management	: Agile, Scrum, Jira, Azure DevOps, Sprint Planning, Code Reviews
Testing Frameworks	: Jest, Mocha, Jasmine, Cypress

PROFESSIONAL EXPERIENCE

ValueLabs Solutions *Hyderabad, India*

Title: Module Lead *Mar 2024 – Present*

Technology Stack: **React.js, Redux, Node.js, AWS, JavaScript, Material UI, Tailwind CSS, Java, Jest, Webpack**

Responsibilities:

- **Led UI development** for **Ethiqly**, an AI-powered SaaS platform transforming writing instruction through real-time AI-driven feedback, AWS-based data processing, and scalable cloud infrastructure.
- Developed scalable, reusable React components for a real-time feedback system, improving student engagement by 30%.
- Integrated **Stripe payment gateway & SSO authentication**, enabling secure transactions, user subscription management, and seamless account access.
- Implemented Google Drive API for document storage, retrieval, and AI-powered assignment reviews, enhancing collaboration efficiency.
- Built multiple NPM packages **(@sfly/martech-pop-up, @sfly/apply-promos**) for marketing automation & financial transactions, increasing promo code accuracy by **30%** and enhancing user engagement by 25%.
- Optimized Webpack configurations, reducing app load time by **30%** and improving performance at scale.
- Authored developer documentation & onboarding guides, enhancing knowledge transfer and internal adoption of engineering best practices.

CitiusTech Healthcare Technology Pvt Ltd. *Hyderabad, India*

Title: Senior Software Engineer *Dec 2022 – Apr 2024*

Technology Stack: **React, Redux, Node.js, AWS, JavaScript, JSX, Tailwind, Babel**

Responsibilities:

- Developed a **healthcare analytics platform** with **real-time data visualization**, improving **diagnostic accuracy by 40%.**
- Integrated **AWS-based HIPAA-compliant cloud storage**, ensuring secure and scalable patient data management.
- Engineered API interactions between frontend and backend financial-grade data repositories, ensuring regulatory compliance and data security.
- Implemented **performance optimizations** using **React Suspense & Memoization**, improving rendering efficiency.

Berkadia Services India *Hyderabad, India*

Title: Software Engineer *Apr 2022 – Dec 2022*

Technology Stack: **Angular 13, React, Node.js, Express.js, AWS, JavaScript, Angular Material**

Responsibilities:

- Developed an **automated financial document processing system**, improving mortgage & investment data validation by **40%**, reducing manual processing time.

- Built a **financial data normalization** module, ensuring compliance with capital markets risk management standards, and enhancing data integrity by **25%**.
- Designed & implemented React-based UI dashboards for real-time investment tracking, providing data-driven insights for financial decision-making.
- Optimized AWS-based mortgage processing pipelines, reducing system downtime by 20%, and ensuring secure and scalable data transactions.
- Implemented Jest testing framework, achieving **85%+** test coverage, reducing post-deployment defects by **30%**.
- Followed the **Software Development Life Cycle** (SDLC) from requirement gathering and system design to development, testing, and deployment, ensuring high-quality and secure software delivery.
- Collaborated with architects and business stakeholders, contributing to solution design discussions for scalable financial applications.

Capgemini Technology Services India Limited *Hyderabad, India*

Title: Associate Consultant *May 2021 – Mar 2022*

Technology Stack: **Angular12, Node.js, Express.js, AWS, JavaScript, Single SPA (Micro frontend), Chart.js, Babel**

Responsibilities:

- Developed a **financial trading platform** for real-time **market data visualization**, integrating live stock price tracking & trend analysis, improving trade execution efficiency by **35%**.
- Engineered financial data accuracy dashboards, ensuring **20%+** improvement in trade reconciliation and investment tracking.
- Optimized real-time financial data visualization using Chart.js, reducing UI latency by 30% in high-volume trading scenarios.
- Designed a **Micro Frontend architecture**, improving performance and reducing page load times by **25%** across trading applications.
- Led technical redesign initiatives, improving application navigation and boosting user engagement by **20%** in high-frequency trading applications.
- Designed an internal styling library using Angular, improving UI consistency across internal applications.

Locusnine Innovations *Pune, India*

Title: Software Engineer *Mar 2020 – Sep 2020*

Technology Stack: **Angular8, Node.js, Express.js, AWS, MongoDB, JavaScript, HTML5, CSS3**

Responsibilities:

- Developed a KPI-based quality management dashboard, enabling real-time performance tracking for enterprise clients, improving reporting efficiency by **30%**.
- Translated **Figma designs** into responsive and accessible React components, ensuring **pixel-perfect UI implementation.**
- Implemented AWS-based backend services (Lambda, API Gateway, S3) to support scalable data processing, reducing API response time by **20%**.
- Optimized Angular UI components, enhancing dashboard performance and reducing page load time by **25%**.
- Integrated **EnjoyHint, and Joyride** libraries, enhancing user guidance and experience.

Cognizant Technology Solutions *Chennai, India*

Title: Full Stack Developer *Aug 2018 – Feb 2020*

Technology Stack: **Angular, JavaScript, HTML5, CSS3**

Responsibilities:

- Developed a **claims data dashboard** for MetLife insurers, improving claims processing efficiency by **20%**, and reducing manual workload for underwriters.
- Implemented AWS CI/CD pipelines, automating deployment & reducing manual intervention by **50%**.
