Technical Skills

Languages/ Technologies: Python, PySpark, SQL, C#, Apache Iceberg, Hive Metastore, Trino, Docker, Kubernetes (K8s), Microservices, REST/gRPC APIs, FAST API, OpenTelemetry, Shell Scripting
Data Platforms & Storage: SQL Server, Oracle, PostgreSQL, MongoDB, ClickHouse, Hive Metastore, Databricks, Snowflake, AWS (S3, Glue, Lambda, Athena), MinIO (S3-compatible)
Development Tools: PyCharm, Visual Studio Code, Visual Studio, Postman, BloomRPC, Rancher, Grafana, SonarQube, APM, pgAdmin, Studio 3T, Oracle SQL Developer, DBeaver
Version Control & CI/CD: Git, GitHub, Azure DevOps, Jenkins, Jira
Monitoring & Observability: OpenTelemetry, Grafana, APM

Experience

Acidaes Solutions Pvt. Ltd. (CRMNEXT) Jan 2022 – Present
Data Engineer *Noida, India*

- Led the end-to-end design, development, and deployment of scalable **data engineering solutions** integrated within the **CRMNEXT platform**, ensuring seamless functionality from **UI to data pipelines** in an **Agile environment**.
- Worked extensively in the **Banking and Financial Services (BFSI)** domain, leading multiple client implementations and delivering high-impact data projects.
- Applied strong **software engineering principles** across **Microservices, gRPC/REST APIs, Docker, logging,** and **observability** to build reliable, containerized data pipelines.
- Managed multiple **Python**-based **data engineering and development projects**, driving scalability, reliability, and team productivity through effective **multitasking** and **cross-team collaboration**.
- Worked with diverse data sources including **relational databases, data warehouses, and data lakehouses** (e.g., **Databricks, Snowflake, MongoDB, ClickHouse DB**) for data ingestion and transformation, optimizing performance across projects.
- Integrated **Trino** and **MinIO** for high-performance querying, validation, and benchmarking in data archival and migration processes.
- Utilized **Docker** for image building and deployment, and **Rancher** for **Kubernetes-based orchestration** and **environment management**.
- Collaborated with **Business Analysts, DevOps, Product Owners, and Quality Assurance** teams to ensure smooth delivery across all project stages.

DXC Technology June 2021 – Jan 2022
Associate Professional Software Engineer *Noida, India*

- Acquired strong proficiency in **Git** and **Agile methodologies** while managing repositories and using **Jira** to track and streamline project progress throughout the development lifecycle.
- Mastered backend debugging in **Visual Studio** for **.NET Core** applications and in **PyCharm** for **Python** modules, ensuring seamless **full-stack integration**, performance, and stability across environments.
- Gained hands-on experience in **C#, Python, Angular.js, and SQL Server**, with a solid understanding of **Microservices** and **MVC** architectures.
- Built a strong foundation in **backend systems, database handling, and process optimization**, which later supported advanced **data engineering** and **ETL development**.

Projects and Achievements

Data Archival Tool | *PySpark, Apache Iceberg, Hive Metastore, AWS S3*

- Engineered a **policy-driven Data Archival Tool** that automated archival, validation, and purging of enterprise data based on configurable retention rules. Designed the framework to support JDBC reads from all major RDBMS (Oracle, SQL Server, MySQL, etc.), process data in micro-batches, perform checksum-based validation, and purge sources only after successful archival verification — migrating **10B+ records across 3,000+ columns** with zero data loss and full lifecycle management.

Data Migration Tool | *PySpark, PostgreSQL, MongoDB, Oracle, SQL Server, MySQL*

- Designed and implemented a **fault-tolerant PySpark-based Data Migration Tool** supporting auto-recovery, micro-batching, and pause/resume workflows. Integrated reconciliation logic and real-time dashboards for monitoring large-scale transfers, enabling seamless migration of **10B+ records** across heterogeneous databases.

DataNext Dataflow Engine | *PySpark, Python, REST APIs, gRPC APIs*

- **DataNext** is an in-house **data workflow service** that enables end-to-end data processing, transformation, and movement at scale. It allows users to design, schedule, and orchestrate workflows through a visual drag-and-drop UI, supporting data retrieval, transformation, and delivery for analytics and AI model training.
- Developed and optimized **30+ reusable data transformation operators** that powered high-throughput ETL pipelines within the DataNext engine, enabling scalable and modular workflow design for enterprise-grade data processing.

Audit Service | *Python, gRPC APIs, ClickHouse DB*

- Developed a **Python-based Audit Microservice** integrated with the CRMNEXT platform and multiple .NET microservices to enable **analytics-driven** and **traceable** auditing with dynamic schema management and configuration. Automated the creation and CRUD operations of audit tables (PromptAudit, CrhAudit, EmailBotAudit, AgentAudit) in **ClickHouse DB** through gRPC APIs, ensuring complete observability, data consistency, and seamless **cross-service integration**.

Development Projects | *Python, .NET Core, Microservices Ecosystem, gRPC, Docker*

- Previously led delivery of enterprise-grade modules such as **Social 360, Workflow, NewsFeed, ML.Net, and Multitenancy** within a microservices-based ecosystem, ensuring successful release of high-quality features across multiple agile sprints.
- Implemented **Docker-based containerization and Kubernetes deployments using Rancher** for scalable, environment-consistent delivery of services across development, staging, and production environments.

Achievement

- Successfully qualified the **Graduate Aptitude Test in Engineering (GATE) – Computer Science (CS) 2021**, demonstrating strong computer science fundamentals and analytical problem-solving skills.

Education

Amity University — July 2017 – June 2021
Bachelor of Technology in Information Technology (GPA: 7.53) — *Noida, India*

Modern School — April 2016 – May 2017
Class XII CBSE (Aggregate: 91.4%) — *Noida, India*
