Profile Summary

Data Scientist and MIS Executive with 3 years of professional experience in building and deploying machine learning, deep learning, NLP, and time series models, along with 2 years of MIS and Excel reporting expertise. I am passionately looking to contribute as a Data Scientist or Data Analyst at your organization, leveraging my skills to solve complex business problems and drive data-driven decision-making.

Soft Skills:

- Excellent problem-solving and analytical thinking
- Strong communication and presentation skills
- Adaptability and quick learning ability
- Team collaboration and interpersonal skills
- Time management and multitasking efficiency

Skills

- Programming: Python, SQL
- Libraries: Pandas, NumPy, Scikit-learn, TensorFlow, Keras, NLTK, SpaCy, Matplotlib, Seaborn
- Tools: Jupyter, Git, Flask, Docker
- Techniques: Supervised & Unsupervised Learning, CNN, RNN, LSTM, NLP, Time Series Forecasting
- Deployment: Flask, REST APIs, Heroku, AWS EC2

Professional Experience

Data Scientist | Cloud Detox, Noida | Sept 2024 – Present

• Built and optimized machine learning models for classification and regression problems.
• Developed NLP pipelines for text classification, sentiment analysis, and entity recognition.
• Worked on time series forecasting for sales and demand prediction.
• Deployed models using Flask to build REST APIs for integration with applications.
• Collaborated with cross-functional teams to deliver actionable insights.
• Conducted EDA (Exploratory Data Analysis) to identify trends, anomalies, and patterns in raw datasets.
• Automated end-to-end machine learning workflows, from preprocessing to deployment.
• Applied deep learning models (CNN, RNN, LSTM) for text, image, and sequential data problems.
• Integrated APIs and third-party datasets to enrich business insights and improve model accuracy.
• Deployed machine learning models on AWS EC2 for scalable and reliable production use.
• Designed and monitored model performance dashboards for continuous evaluation and retraining.
• Mentored interns and junior analysts on Python programming, machine learning, and best practices.

MIS Executive (Excel) | Cloud Detox, Noida | Sept 2022 – Aug 2024

• Managed and automated reports and dashboards using advanced Excel functions (PivotTables, VLOOKUP, macros).
• Analyzed large datasets to support decision-making and business operations.
• Streamlined data collection processes to enhance

reporting efficiency.

Projects

- **Sentiment Analysis on Product Reviews**

  - Used NLP techniques to analyze and classify customer reviews from e-commerce websites.
  - Achieved 90% accuracy using an LSTM-based deep learning model.
  - Deployed model using Flask and created a REST API for live sentiment predictions.

- **Sales Forecasting using Time Series**

  - Forecasted sales for a retail company using ARIMA and LSTM models.
  - Improved forecast accuracy by 20% over baseline models.
  - Built a dashboard to visualize forecasts and performance metrics.

- **Text-to-Speech NLP App (Flask, Hugging Face Transformers, gTTS)**

  - Created a web app using Flask that translates English input to French and converts text to spoken audio.
  - Improved accessibility and language learning with real-time audio playback.

Certificates

• Data Science Certification – Uncodemy (Jan 2024 – June 2024)

Education

• B. Tech – Maharashtra Institute of Technology, Pune University | Graduated 2024 | 6.2 SGPA

- 12th (Science) – Kendriya Vidyalaya | Score: 67%
- 10th (CBSE) – Kendriya Vidyalaya | CGPA: 8.2
