EDUCATION

B.Tech In Computer Science
Maharishi Markandeshwar University

PROFESSIONAL SUMMARY

Playwright Automation Test Engineer with 4.5+ years of experience in designing scalable UI/API automation frameworks using **Playwright, JavaScrip**T and modern DevOps workflows. Strong expertise in **GenAI-powered testing**, **CI/CD (Jenkins, GitHub Actions)**, cloud-based execution (**AWS**), and API validation using Playwright & Postman. Skilled in building robust POM frameworks, implementing parallel execution, optimizing selectors with **LLMs**, and improving automation coverage by 60–80%. Proven ability to deliver fast, stable, high-quality releases in remote and onsite Agile environments while collaborating globally across cross-functional teams.

PROFESSIONAL EXPERIENCE

Freelance Automation Test Engineer
Upwork, Fiverr, uTest, Testlio
08/2024 – Present | Remote

Key Responsibilities:

- Developed automated test scripts using **Playwright (JavaScript)** for UI, functional, and regression testing.
- Designed reusable Page Object Model (POM) frameworks for scalable automation.
- Performed **API testing** using Playwright request context and validated responses, status codes, and workflows.
- Executed cross-browser testing on Chromium, Firefox, and WebKit.
- Identified UI defects, workflow issues, and performance bottlenecks during various freelancing cycles.
- Delivered detailed bug reports and collaborated directly with clients on improvements.
- Supported clients by creating maintainable test suites and integrating them with **CI/CD pipelines**.

Applications / Projects Worked On Through Freelancing Platforms:

- Web application automation projects via **Upwork**
- Functional testing cycles on **uTest**
- Exploratory & usability testing cycles on **Testlio**
- Small automation and validation tasks delivered through **Fiverr gigs**
- Analyzed requirements and user stories to create detailed **test scenarios and test cases**.
- Performed **functional, regression, sanity, smoke, and exploratory testing** for web applications.
- Conducted **UI/UX validation**, cross-browser testing, field-level validations, form checks, and workflow testing.
- Executed **end-to-end testing** covering login, signup, CRUD operations, workflows, and user journeys.
- Logged, tracked, and managed defects using **Jira / Bug Tracking tools**.
- Performed **boundary value analysis, equivalence partitioning**, and negative testing.
- Coordinated with developers to reproduce defects, verify fixes, and re-test affected areas.
- Prepared **test reports**, summaries, and daily status updates for stakeholders.

CORE SKILLS

Automation
- Playwright (Web/API)
- Selenium (Basic)

Languages
- JavaScript
- TypeScript

Frameworks
- Playwright Test
- Jest

AI Skills
- GenAI
- Prompt Engineering

CI/CD & Servers
- MCP Server
- Jenkins
- GitHub Actions

Reporting Tools
- Allure
- Extent Reports

Version Control
- Git
- GitHub

Testing
- Functional
- Regression
- API
- End-to-End

MCP Server

Zerostep

LLM

Jenkins

AWS

PROJECTS & ACHIEVEMENTS

Built an end-to-end Playwright automation framework for a major insurance web application.

- Tested APIs manually using tools like **Postman** (if applicable).

QA Engineer
Crestech Software Systems
07/2021 – 07/2024 | Gurgaon
Key Responsibilities & Achievements:
- Designed, developed, and maintained **Playwright-based automation frameworks** using **JavaScript** for large-scale web and API testing.
- Implemented **Page Object Model (POM)** and **Data-Driven Testing (DDT)** principles to ensure modular, reusable, and maintainable test code.
- Integrated **Playwright automation with CI/CD pipelines** using **Jenkins** and **GitHub Actions** for continuous testing and faster feedback loops.
- Configured and managed **MCP Server** and **AWS environments** for distributed and cloud-based test execution.
- Leveraged **GitHub Copilot** and **Generative AI (GenAI)** for intelligent test script generation and defect prediction, improving efficiency and reducing script authoring time by 30%.
- Built **custom automation utilities and reusable test components**, reducing regression cycle time by 40%.
- Performed **end-to-end functional, regression, and cross-browser testing**, ensuring product stability across multiple releases.
- Collaborated closely with **development and DevOps teams** to troubleshoot automation failures, analyze CI/CD logs, and maintain pipeline health.
- Applied **LLM-based automation enhancements** to dynamically generate and validate test data, improving coverage accuracy.
- Delivered high-quality **Allure and Extent Reports** integrated with CI/CD dashboards for test insights and continuous monitoring.
- Mentored new QA team members on **Playwright**, **POM design**, **GitHub integration**, and **automation best practices**.

Integrated GenAI-driven test data creation and Prompt Engineering into automation workflows.

Reduced manual regression effort by 60% via complete CI/CD automation on MCP Server.

Recognized for proactive implementation of AI-based testing enhancements in QA processes.
