Personal Summary

- **15 Years of Experience** in **customer relations**, **network infrastructure implementation**, **configuration**, and **support**, with a focus on process-oriented strategies in a high-tech environment.
- Strong track record of **building and leading teams** to deliver results in complex, high-stakes projects, ensuring seamless **network design, migration**, and **optimization**.
- Skilled in **prioritizing and managing multiple tasks**, maintaining a **positive, results-driven attitude** while consistently meeting deadlines and achieving goals.
- Capable of working both **independently** and as part of a **collaborative team** to effectively resolve challenges and ensure project success.
- Proven **organizing and execution capabilities**, with a focus on **streamlining processes** to enhance efficiency and meet evolving business needs.
- Experienced in **knowledge sharing and team development**, with a strong commitment to **enhancing team competency** through **training** and hands-on support.
- **Strategic leadership** in driving **process improvements**, supporting the **growth and operational excellence** of the organization.

Hands-on Experience

- **Firewall Management**: Experienced with Fortigate 310B, Palo Alto, ASA 5500, PIX, ACS, and ISE for advanced network security and access control.
- **Cloud Azure Migration & Security**: Managed migration of new applications and services to Azure, ensuring virtual device security and seamless integration into cloud infrastructure.
- **Redundancy Protocols**: Proficient in implementing and managing redundancy protocols such as VRRP, HSRP, FRR, F5 BIG-IP, and Silver Peak W-Optimizer for high availability and network optimization.
- **Router & Switch Configuration**: Extensive hands-on experience with a range of routers (1905, 2800, 3800, 4500, ASR-1K, 9K XR/XE/IOS, 6509, 7609, 1209) and switches (3700, 3800, Nexus 2K, 3K, 5K, 7K, 9K TOR, VPC, VDC).
- **Wireless Networking**: Expertise in Wi-Fi solutions, including WLC, RAP, MAP, NCS, and Cisco Prime for network monitoring and management.
- **Protocol Expertise**: In-depth knowledge of network protocols including OSPF, IS-IS, MPLS, BGP, L3VPN, L2VPN, VPC, VDC, IPSEC, NAT, and DMVPN for secure and efficient network communication.
- **Ticketing & Monitoring Tools**: Proficient with ticketing and monitoring tools like SolarWinds, OpenView, HPSM, HP-NNI, TeMIP, and Infobox to manage and troubleshoot network issues.
- **Additional Technologies**: Experience with FTTX (ONT, OLT), HSI (DRA), and LTE (ENodeB) for deploying modern communication and broadband solutions.

Competencies:

- **People/Project Management**: Experienced in managing teams and driving successful project outcomes.
- **Excellent Coordination & Communication**: Strong at managing team collaboration and conveying ideas clearly.
- **Mentoring & Presentation**: Skilled in mentoring teams and delivering impactful presentations.
- **Problem-Solving**: Effective in diagnosing and resolving complex issues.

► Technical Experience

Accenture Solution Pvt Ltd (Feb-21– Till date) Cloud Migration & Imp Associate Manager

Roles & Responsibility

- **Lead Security Architecture Design**: Spearheaded the development and implementation of robust security architectures for enterprise-wide systems, applications, and networks, ensuring alignment with organizational goals and compliance requirements.
- **Risk Management & Vulnerability Mitigation:** Directed comprehensive threat assessments and vulnerability analysis, identifying critical security risks, and implementing strategic solutions to mitigate threats and enhance the organization's overall security posture.
- **Team Leadership & Development:** Managed and mentored a team of security architects and engineers, fostering collaboration, skill development, and continuous improvement to drive the execution of complex security projects across multiple business units.
- **Cross-Functional Collaboration:** Partnered with key stakeholders, including IT, development, and compliance teams, to integrate security principles into the SDLC and ensure alignment with regulatory requirements (e.g., NIST, ISO 27001, GDPR).
- **Strategic Security Planning & Incident Response:** Led the development of security strategies, including incident response and disaster recovery plans, and oversaw the successful resolution of security incidents, ensuring minimal impact on business operations and system integrity.

Infinite Computer Solutions Ltd (Aug-20 – Feb-21) Sr. Lead Consultant

Roles & Responsibility

- **5G Network Deployment & Management**: Led the implementation and deployment of 5G network solutions, focusing on the management of IP/MPLS transport networks based on ring architecture, ensuring high availability and scalability.
- **Advanced Router & Switch Configuration**: Configured and troubleshooted high-end routers (Cisco, Nokia) and switches (Nexus, IOS) with protocols like OSPF, ISIS, MPLS, LDP, RSVP, BGP, VDC, and VPC, optimizing performance and connectivity across complex network infrastructures.
- **Migration & MOP Documentation**: Prepared and executed Method of Procedure (MOP) documents in accordance with network migration plans, ensuring smooth transitions during upgrades and network changes with minimal disruption.
- **Network ATP Testing & Troubleshooting**: Conducted Acceptance Test Procedures (ATP) for network deployments, providing troubleshooting documentation and ensuring network functionality was thoroughly tested before final deployment.
- **Proactive Network Monitoring & SNMP Logging**: Set up proactive monitoring tools and SNMP logging for all network devices to ensure real-time status updates.

CompuCom Pvt Ltd (Dec-19 – July-20) Network III

Roles & Responsibility

- **Feasible Design Solutions**: Derived and delivered design solutions based on product development requirements, ensuring technical feasibility and alignment with business objectives.
- **Network & Data Center Design**: Developed and documented High-Level and Low-Level

Designs (HLD/LLD) for networks and Data Center solutions, ensuring scalability and performance.

- **Migration Planning & Execution**: Prepared MOPs for network migration plans and executed successful migrations with minimal disruption.
- **Network Testing & Monitoring**: Led network testing (system, integration, UAT) and setup proactive monitoring, SNMP logging, and troubleshooting documentation for network devices.
- **Strategic Planning & Impact Assessment**: Directed strategic network planning, impact assessments, and risk management for network upgrades, expansions, and new deployments.

Infosys Limited (JUN-17 – Dec-19) - Sr. Consultant

Roles & Responsibility

- **Data Center Implementation & NOC Operations**: Managed the implementation and operations of Data Centers, handling Nexus, routers, switches, and migrations.
- **Hands-on Experience**: Worked directly with F5 load balancers, Silver Peak, and Palo Alto firewalls for various network optimization and security tasks.
- **P1 & P2 Ticket Handling**: Acted as a Subject Matter Expert (SME), managing critical P1/P2 tickets, collaborating with OEMs, and providing customer solutions on Network Management Systems (NMS).
- **ITIL Process Adherence**: Followed ITIL processes for incident, change, and problem management to ensure smooth operations and quick resolutions.
- **LAB Setup & Customer Demos**: Led lab setups, simulations, testing of new features, and customer demos/POCs for network solutions.

Wipro infotech (Apr-16– Jun-2017) Sr. Network administrator

Roles & Responsibility

- **Troubleshoot Critical Network Incidents**: Managed and resolved major network incidents, ensuring minimal disruption and quick recovery.
- **Major Change Management**: Reviewed and executed major network changes, ensuring smooth transitions and minimal impact on operations.
- **L2 & L1 Team Support**: Assisted L2 and L1 teams, handling escalated cases and providing advanced troubleshooting expertise.
- **LAN/WAN Configuration & Maintenance**: Configured, tested, and maintained LAN/WAN equipment and associated services for optimal performance.
- **Wireless Network Support**: Addressed wireless network issues and identified areas for improvement to enhance performance and reliability.

Reliance Jio Infocomm Pvt Ltd. (Sep-12-Apr 2016) - IP- FM-L2

Roles & Responsibility

- **4G Network Implementation & Deployment**: Managed the deployment and implementation of 4G network solutions, focusing on IP/MPLS transport networks and Cisco's Unified MPLS Metro Transport Architecture. Worked with LTE, IMS, FTTX, and Wi-Fi-based architectures.
- **High-End Router & Switch Troubleshooting**: Provided expert troubleshooting on high-end routers and switches, working with protocols like OSPF, ISIS, BGP, VDC, and VPC to ensure optimal network

performance.

- **Root Cause Analysis (RCA)**: Led root cause analysis of network failures, addressing protocol and hardware issues in the core network, including Cisco, Juniper, and other devices, to minimize downtime and maintain service continuity.
- **ITIL Change & Incident Management**: Followed ITIL processes for change management, incident management, and problem management. Conducted planned outages for tasks like IOS upgrades, hardware replacements, and service migrations.
- **Vendor Coordination & Troubleshooting**: Coordinated with vendors such as Juniper and Cisco for critical faults, following up with TAC for joint troubleshooting to quickly resolve customer issues and reduce service disruptions.
- **Network Monitoring & Fault Management**: Monitored network performance using NMS tools like IP/MPLS, Cisco Prime, HP NNMi, and TeMIP Portal, managing real-time network alarms, faults, and ticketing via HPSM.
- **LTE, DRA, IMS, FTTX & Wi-Fi Expertise**: Applied in-depth knowledge of LTE, DRA, IMS, FTTX, and Wi-Fi services to ensure the deployment and maintenance of modern communication networks.

CMS Info Systems Pvt Ltd. (Nov 10 – Sep-12) Network Administrator

Roles & Responsibility

- **Configuration & Setup**: Configured customer equipment (routers, switches, IP addressing, VPNs, ISDN) based on network requirements.
- **Access Control & Traffic Management**: Configured access lists, queuing, and traffic shaping on customer routers.
- **Network Monitoring**: Performed real-time network monitoring using tools like What's Up Gold and IP monitoring software.
- **Wireless Equipment Maintenance**: Installed, maintained, and troubleshot wireless equipment.
- **Technical Support**: Coordinated with Jr. RF Engineers to provide technical assistance.
- **Customer Satisfaction**: Delivered optimal network performance to ensure customer satisfaction.
- **Network Planning & Design**: Designed customer networks, considering existing devices, infrastructure, and IP schemes.

3i-infotech (Nov 2008 – Jan 2010) Network Engineer"

Roles & Responsibility

- **NOC Network Infrastructure Maintenance**: Maintained network infrastructure and established WAN connectivity to remote sites.
- **Device Setup & Configuration**: Configured and set up switches (2960, 3650) and routers (Cisco 1800, 2800, 7609, 1209).
- **Network Monitoring & Troubleshooting**: Used HP TeMIP and other NMS tools for site integration and troubleshooting.
- **Client & Provider Coordination**: Coordinated with clients and providers to resolve network queries and issues.
- **Video Conferencing Setup**: Set up video conferencing systems using POLYCOM, TV, and ISDN lines.

Academic Profile

- **Bachelor of Engineering (Computer Science)**: 65.89%
- **CCIE (R&S)**: Cleared written exam and attempted lab
- **CCNP Training**: Completed through ACIT
- **Certifications**: ITIL, Azure, Firewall expertise

Personal Dossier

- **Date of Birth:** 1st May 1984
- **Passport No:** M3913961
- **Languages:** English, Hindi
- **Marital Status:** Married
- **Permanent Address**: Plat-G-703, Sonigara Park, Near Dange Chowk, Pune – 411033

Declaration:

" I hereby declare that the above-mentioned particulars are true to the best of my knowledge and belief."

Please: - Pune **Saurabh Dubey**
