SUMMARY

Experienced Data Engineer and Quantitative Technology Analyst with over 6.5 years of industry exposure across quantitative finance, large-scale data engineering, and software development. Proven track record in designing and scaling mission-critical HFT infrastructure, from real-time market data onboarding to high-throughput execution shells. Proven expertise in building robust ETL pipelines, real-time data onboarding, and high-frequency data systems using Python, SQL, Kafka, AWS, and ClickHouse. Skilled in collaborating with research and trading teams to deliver scalable, production-grade data solutions.

SKILLS

Languages	Python, JavaScript, HTML, C++, C#, SQL, Bash, CSS, YAML, XML
Frameworks	Django, Flask, Bootstrap
ETL Tools	PySpark, Kafka, AWS Glue, Pandas, Polars
Scraping	Scrapy, Selenium, Scrapyd, Tor, Privoxy
Data Science	Keras, TensorFlow, PyTorch, NLTK
Databases	SQLite, MySQL, PostgreSQL, ClickHouse
Dev Tools	Git, AWS, VS-Code, Splunk, Jenkins, MS-Office, Jira, Notion

EDUCATION

6/2021 - 6/2023 **Master of Technology, Computer Science** — **IIT Bombay**
Post Graduation, Major in Data Science, CPA- **9.44/10**

6/2015 - 5/2019 **Bachelor of Technology, Computer Science** — **IIT Jodhpur**
Graduation, CPA- **8.32/10**

EXPERIENCE (6+ YEARS)

7/2023 – ongoing **Quantitative Technology Analyst** — **Qube Research and Technologies LLP**

- Architected and deployed a high-availability data onboarding infrastructure to facilitate real-time source integration for research and trading teams. Led data source facilitation for research team using **ETL** tools, ensuring seamless integration, and concurrently developed monitoring tools and internal software applications to optimize workflow for the development team.

`C++ / SQL / C# / Git / Python / Postgres / AWS / Kafka / Click House`

10/2019 – 6/2023 **Team Lead | Project Manager | Software Developer | Scraping Expert** — **SMS DataTech Co., Tokyo**

- Developed sophisticated software systems using the **Django** framework for **Sony Japan**, **Maruhan Corporation**, etc. Designed and implemented web scraping modules for **30+** social networking, entertainment, gaming, comic and e-commerce websites.

`Web Scraping / Web Development / Project Management`

5/2022 – 8/2022 **Research and Development Intern** — **IBM Research, India**

- Worked on a problem titled *Detecting and Debunking Fake News and Half-truth in News Articles* using **BERT**, **NLTK**, and **T5** models.

`NLP / Deep Learning / Machine Learning`

5/2018 – 7/2018 **AI Intern** — **SMS DataTech Co., Tokyo**

- Worked on a problem titled *Manga Comic Colorization* using cyclic GANs. Implemented the project using **Tensorflow** and **Keras** and achieved an accuracy of **90%** in colouring grayscale and line-art images.

`Image Processing / Deep Learning / Machine Learning`

IMPACTFUL PROJECTS

Web Scraping, Web Development — **Sony Japan- Influencer Tracking Project** — **SMS DataTech Co., Tokyo**
Developed a sophisticated end-end software system to scrape social media, news, and entertainment websites to track influencers. Implemented **20+** scraping modules using **Scrapy** and back-end systems using **Django**, generating around **$1 million USD** in revenue.

Data Science, Web Development — **AI-ops** — **SMS DataTech Co., Tokyo**
Designed and developed an **AI** based monitoring and operations framework integrating various monitoring tools like **Zabbix** and **Nagios**. Implemented the frontend and the API modules of the project using *Bootstrap*, *HTML*, *Java Script* and *Django*.

SCHOLASTIC ACHIEVEMENTS

- Secured a rank of 1428 in JEE Advanced 2015 and a rank of 3336 in JEE Main 2015 among 1.5+ Million participants.
- Secured 10/10 CGPA in class X SSC exam in 2013 and 98.1% in BIEAP Exam 2015 in class XII.
