Personal Summary

Seasoned technology leader with over 16 years of experience aligning people, processes, and technology to drive organizational performance. Recognized for shaping strategy, leading high-performing teams, and fostering a culture of continuous improvement and innovation.

Proven track record in leading enterprise-scale initiatives and managing cross-functional teams to optimize technology environments. Expertise in infrastructure, crisis and vendor management with hands-on leadership in infrastructure security modules to strengthen threat detection, automate risk mitigation, and continuous improvement in cybersecurity frameworks.

Professional Experience

MSCI Inc. (Morgan Stanley Capital International) **Jan 2022 to Present**

Vice President – Technology

Roles & Responsibilities

- Led and mentored a high-performing team responsible for continuous coverage and smooth, secure operations across MSCI's global sites in India, Budapest, London, and the U.S.
- Successfully upheld SLA commitments by directing timely response and resolution of data, email, and infrastructure security incidents across MSCI's security landscape.
- Successfully transitioned the external certificate authority landscape from Entrust to GlobalSign, ensuring seamless service continuity, stakeholder satisfaction, and completion within agreed timelines.
- Effectively collaborated with business users, developers, and infrastructure teams to design and deliver cloud-based solutions that met business SLAs while optimizing cost.
- Contributed to creation and ongoing maintenance of organizational standards, policies, and procedures to ensure adherence to SOX, SOC Type I/II, and EU-BMR compliance frameworks.
- Reduced critical and high-severity cybersecurity findings across platforms including BitSight, ISS, and IONIX, strengthening the organization's overall security rating and competitive posture.
- Demonstrated ability to make sound decisions and lead incident management teams in resolving critical and high-priority issues impacting business-critical applications.
- Established and enforced a FIPS 140-2 compliant framework governing all code-signing certificates used for internal purposes and external software distribution.
- Built an enhanced, structured record producer to collect high-quality data inputs, supporting future expansion into data-driven modules, including ChatGPT.
- Enhanced operational efficiency for internal certificate notifications by implementing RPA to streamline processes and improve scalability.
- Integrated AKV with GlobalSign to automate certificate lifecycle workflows, achieving zero-touch provisioning and seamless renewals.
- Partnered with C-level executives and senior stakeholders to align security initiatives with business objectives and drive strategic outcomes.
- Defined and implemented a robust security onboarding process to support the deployment of Enterprise SSO into production.

Areas of expertise

- Technology Integration
- Solution Design
- Digital Transformation
- Vendor Management
- Costing & Budgeting
- Team Building & Mentoring
- Infrastructure & Cloud Security
- Cloud – Azure & GCP
- Audit & Compliance – RBI & SEBI
- PKI Management
- Project Management
- Regulatory and Industry Benchmarking - NIST

Technical Skills

- Perimeter security - Akamai, AzureFD & AppGw, GCP - Cloud armor
- External security - BitSight, ISS and IONIX
- Certificate - Internal CA, Step CA, GlobalSign (SSL & Code Signing)
- PAM - CyberArk
- Cloud Security - WiZ
- Cloud – Azure & GCP
- Virtualization – Vmware
- Storage - EMC, NetApp
- Firewalls - Juniper, Palo Alto, Azure Native
- Email DLP – MSFT and Proof Point
- Incidents - iRespond
- Backup – TSM & NetBackup
- Engineered SYS – Oracle® SC
- Network - Cisco, Citrix LB
- Middleware - IBM® IHS, IIB, DataPower, Oracle® OHS
- Database – Oracle 12C & SQL

CyberRim Inc. | Infotek Inc. | HAYS plc. **June 2019 to Aug 2021**

Technology Consultant - IT Infrastructure & Security Services

Client: Grant Thornton LLP (Canada) – on-site

Roles & Responsibilities

- Redesigned client portfolio and CRM platforms, integrating advanced security controls and reducing operational overhead.
- Deployed a Public Key Infrastructure (PKI) framework, replacing wildcard certificates with OV-validated certificates across all external websites.
- Authored and standardized security procedures for server provisioning on both on-premises and Azure cloud environments.
- Implemented security best practices across high-risk systems identified in the Rapid7 penetration testing report, mitigating critical vulnerabilities.

YES BANK LTD. **Oct 2016 to May 2019**

Assistant Vice President | Technology Solution Group

Roles & Responsibilities

- Migrated Bank's reporting platform from legacy to modern infrastructure, enhancing availability, resiliency, and disaster recovery.
- Implemented NetApp modular hybrid storage for centralized document management and high I/O applications.
- Led migration of Credit Card services (First Data) with secure MPLS connectivity, HSM integration, and API enablement.
- Deployed Oracle® SuperCluster for database consolidation, achieving cost savings and performance optimization.
- Executed migration of corporate, retail, and API websites behind Akamai WAF, strengthening perimeter security.
- Launched YES4YOU, a digital HCM mobile platform, driving employee engagement and digital transformation.
- Designed and implemented infrastructure for Retail Net Banking upgrade to OBDX, delivering a modern, scalable digital banking platform.
- Migrated IBM® Integration Bus and DataPower to new infrastructure, enabling flexible and secure data exchange.
- Implemented CKYC (CERSAI) across the Bank, ensuring regulatory compliance and streamlined KYC operations.
- Planned and successfully executed the migration of the FinnOne Application (Customer Acquisition System) from a legacy platform to the bank's standardized infrastructure.
- Prepared and presented recurring dashboard insights to management, covering program progress and potential future initiatives within TSG.

Emkay Global Financial Services Ltd **Mar 2016 to Sep 2016**

Manager - IT | Information Technology

Roles & Responsibilities

- Evaluated HPE HCI part of server consolidation an initiative to reduce physical footprint.
- Blueprint formulated for redesigning VMware infrastructure part of consolidation project.
- Formulated SOP's for implementing infrastructure components as per industry best practice.
- Planned & Evaluated Infrastructure / Application / Security Monitoring tool from ManageEngine.
- Controlling program budget and individual project budgets across all projects.

Education

Post Graduation in Information Technology – Welingkar's Institute

Bachelor of Commerce – University of Mumbai

IT Certifications

Masters in Networking & Data

MSFT Certified Professional®

CCNA - ID # CSCO11486899

ITIL® V3 Foundation

Professional Scrum Master® - I

PMP Trained - ME ID: 2535130*

CISM®

Pursuing CISSP*

Trainings

MSCI's Leader SHIFT Program

EMC VMAX Symmetric, Celerra, Centera

Server Virtualization, Network & Storage Workshop

Symantec Veritas Cluster

VMware vSphere: Install, Configure, Manage & Design Workshop

Microsoft Azure Architect & Design and Security engineer Associate Trained - AZ-304 & 500*

DBS Bank Ltd | Development Bank of Singapore **May 2011 to Feb 2016**

Technical Analyst - IT | Information Technology Group

Roles & Responsibilities

- Designed and deployed the Bank's EMC VMAX storage infrastructure to support VMware ESXi clusters and Tier-1/Tier-2 high IOPS applications.
- Implemented VMware virtualization in collaboration with the VMware Professional Services team, migrating 200 physical servers across two data centers and reducing physical footprint significantly.
- Configured and deployed Symantec VCS for business-critical applications, enabling automated failover within and across data centers and improving RTO/RPO metrics.
- Led the rollout of IPC Unigy and NICE Unified Communications platform for Treasury & Markets, enhancing trading communication security and reliability.
- Implemented key RBI regulatory applications (NG-RTGS, NEFT, RBI-ADF, CCIL CTS/CHI) across the Bank's network, ensuring regulatory compliance and operational continuity.
- Executed multiple infrastructure enhancement projects, including backup restructuring (IBM TSM), file server consolidation (EMC Celerra), infrastructure monitoring (IBM ITM), and SMS/email alerting (SendQuick).
- Periodic dashboard reports to management on current program & future opportunities under TSG.

L&T Infotech Ltd | Polaris Lab Ltd **Oct 2010 till May 2011**

Consultant – IT, Client: Condé Nast, Fidelity Investments, US

Roles & Responsibilities

- Identified and analyzed OS/IOS bugs on network devices; provided recommendations on appropriate software versions and upgrades.
- Planned, scheduled, and implemented global firewall policy changes across U.S. regions in compliance with change management protocols.
- Validated and tested post-implementation changes with clients, ensuring successful deployment and minimal service disruption.

Siro Clinpharm Pvt Ltd **Oct 2008 to Sep 2010**

Sr Executive - Information Technology

Roles & Responsibilities

- Installed, configured, and maintained network infrastructure and devices, including internet services and VPN solutions, to ensure optimal performance and minimal latency.
- Managed and supported a wide range of security and network appliances, including NOKIA IP 390, Juniper SSG 520 / SSL SA 4000, PineApp Anti-Spam, Symantec HIDS/IPS, Radware LinkProof, and Bluecoat PacketShaper.
- Conducted end-user training sessions covering new technologies, information security, 21 CFR Part 11 compliance, and IT onboarding/induction programs.
- Served as the primary IT point of contact for key enterprise clients such as Pfizer, Johnson & Johnson, Baxter, and Merck, ensuring seamless support and service delivery.
- Planned and executed large-scale infrastructure initiatives, including visitor wireless solutions, Exchange SCR implementation, network teaming, and backup modernization using Symantec and Citrix platforms.

Rewards

DBS Connect Award

Server Virtualization – Breakthrough in utilization of resource – Year 2013

EMC VMAX - Bank's Open System SAN standard – Year 2014

Successful completion of IPC Unigy Project – Year 2015

YES Pulse & Shining star award

CKYC roll-out Pan bank – Year 2017

HCM Mobile APP Project – Year 2018
