Virendra Narayan Bihari

Noida Sector 15
bvirendra1995@gmail.com Virendra Narayan

SUMMARY

- Detail-oriented professional with knowledge of Python, SQL, and Machine Learning. Skilled in data analysis, visualization, and building predictive models. Passionate about solving real-world problems using data-driven approaches.

SKILLS

- Mysql Workbench
- Python
- Numpy
- Pandas
- Machine Learning
- Deep Learning
- Excel
- Power BI
- RAG
- MLOps

EDUCATION

Bachelor of Technology(B.Tech) ***Electronic And Communication - 2020*** *DR.MGR University*

EXPERIENCE

Gvcloud Secure **Aug-2024 -Sept-2025**

Role - Data Scientist *Noida sector 1, Uttar Pradesh*

- Handle missing values, outliers, and inconsistencies to prepare clean datasets.
- Developed and optimized machine learning models (Regression, Classification, and Deep Learning) to solve business problems and improve decision-making.
- Built and fine-tuned LLMs (Large Language Models) for generating insights and automating text-based tasks.
- Designed data preprocessing pipelines for structured and unstructured datasets to enhance model accuracy.
-
- Develop statistical models, machine learning algorithms, and **predictive analytics solutions to address business challenges.**

PROJECTS

House Price Prediction | Python,Machine Learning SQL **2024**

- We are doing supervised learning here and our aim is to do predictive analysis
- Our model will help us in predicting future housing prices.
- We'll validate it against our test dataset
- Visualize the data to understand it better and develop our intuition.

HR Analytics | SQL **2024**

- Majority of active employees fall within the 21–30 and 31–40 age groups.
- Cross-analysis reveals that younger employees dominate tech roles, while older groups are more present in leadership/HR.
- A noticeable portion of employees fall in the 50+ age group—indicating potential upcoming retirements and the need for succession planning.

CERTIFICATIONS

- Data Scientist - Uncodemy
-
