SUMMARY

Enthusiast **BCA graduated** and Detail-oriented Data Scientist, eager to leverage my data science skillsand Visualiuzation, Prediction Techniques to extract meagningful insights from data. Ready to contribute in innovative projects and drive meagningful solutions.

SKILLs

- Programming Language: **Python, SQL**
- Libraries and Framework: **NumPy, Pandas, Matplotlib, Seaborn, Keras, Tensorflow, NLTK, Transformers, Diffusers, Lang Chain, Plotly, Scikit-Learn, Flask, Web Scrapping(Beautiful Soup)**
- Data Science: **Data Collection, Data Mining, Data Visualization, Data Cleaning, Data Wrangling, EDA, Feature Engineering, Feature Selection, Machine Learning and Deep Learning(Regression, Classification, GANs, Transformers, CNN, RNN, RAGs), Model Evaluation, Model Deployment(Flask), Data Analytics, Neural Networks, NLP, GenAI, Generative Modelling, Attention Models, LLMs, Prompt Engineering**

EXPERIENCE

Goanny Technologies: Data Scientist **JUNE 2025 – December 2025**

- **Achieved 95% accuracy in predicting inventory demand using regression-based ML models.**
- **Automated inventory planning, reducing stockouts and overstock by 40%.**
- **Applied data cleaning, feature engineering, and model tuning for scalable inventory forecasting.**

Project: Intelligent Generative AI Assistant

- **Fine-tuned Large Language Models (LLMs) using Hugging Face Transformers, achieving best-in-class accuracy on domain-specific tasks.**
- **Implemented Retrieval Augmented Generation (RAG) with LangChain to deliver context-aware and knowledge-grounded responses.**
- **Deployed the solution using Flask, improving inference speed and ensuring scalable application performance.**

CK and Sons Textiles: Data Scientist APR 2024 – FEB 2025

- Conducted **Data Collection** from various websites to support **Analysis** objectives.
- Utilized web scrapping tools for efficient data extraction.

Freelancer : Data Scientist JAN 2024 - MAR 2024

- **Built scalable, data-driven ML solutions** solving **real business problems** and **enhancing performance**.
- **Designed predictive models** transforming **raw data into actionable insights** for **informed decisions.**

PROJECTs

BOOK RECOMMENDATION SYSTEM:

- Developed a Book Recommendation System **using collaborative** and rating based filtering techniques.
- Utilized Python Libraries like **Python, Numpy, Pandas, and Scikit-Learn** for data manipulation and analysis.
- Craeted a user-friendly interface by **Flask** to allow users to receive tailored book suggestions.

HUMAN VS AI TEXT CLASSIFICATION:

- Differentiate between the Human-written and AI generator content using **the ML (Naïve Bayes)** Algorithm.
- Preprocessed and labelled a dataset of text samples to train and evealuate the model's performance and **using Flask** demonstarte it.

RECOMMENDER CHATBOT (Book Recommendation System):

- Developed a GenAI chatbot with LLMs and collaborative filtering, delivering **personalized book recommendations with 90% accuracy**.
- Fine tuned models to generate **context-aware, highly relevant suggestions**, boosting user engagement and satisfaction.
- Deployed using Flask, providing a **real-time interactive platform** for exploring and discovering top-rated books.

EDUCATION:

- BACHELOR OF COMPUTER APPLICATION [7.8] Apr 2022 – June 2025

ACHIEVEMENTs

- **NATIONAL FINALISTS AT IIM KASHIPUR || DEPARTEMENT TOPPER IN BCA || Silver Badge at Python, SQL in HackerRank**
