Data Analyst | Business Analyst | Business Intelligence Analyst | Power BI Developer

EXECUTIVE SUMMARY

Result-driven Data Analyst with cross-functional experience in Business Intelligence, Business Analysis, and Power BI development. and reporting solutions. Proficient in SQL, Power BI, Tableau, Python (Pandas, NumPy, Matplotlib), Advanced Excel, SSIS, Databricks, and Snowflake. Strong background in data visualization, KPI dashboards, reporting, and data modeling to drive data-driven decision-making. Skilled in predictive analytics, statistical analysis, data transformation, and workflow automation, ensuring data integrity and compliance. Adept at requirements gathering, stakeholder collaboration, financial analysis, forecasting, and market trend analysis to optimize business performance and strategic decision-making. Expertise in DAX, Power Query, Power Pivot, JIRA, Agile methodologies, and root cause analysis, delivering business insights and process improvements across enterprise analytics functions.

CORE COMPETENCIES

SQL | Power BI | Tableau | Advanced Excel | Python | SSIS | Data Analysis | Business Analysis | Business Intelligence | Data Visualization | Dashboards | Reporting | ETL Processes | Data Modeling | Predictive Analytics | Statistical Analysis | KPI Reporting |Business Process Optimization | Data Governance | Automation | Data Cleansing | Stakeholder Management | Business Strategy | Strategic Decision-Making | Data-Driven Insights | Requirements Gathering | Cross-Functional Collaboration | Financial Analysis | Data Integrity | Data Integration | Project Management | Agile Methodologies | DAX | Power Query | Power Pivot | JIRA |Agile | Data Extraction | Data Wrangling | Data Transformation | Root Cause Analysis | Performance Metrics | Workflow Automation | Forecasting | Market Trends | Risk Assessment | Revenue Optimization | Process Improvement | Scenario Analysis | Decision Support | Data Storytelling | Data Governance & Compliance

EMPLOYMENT OUTLINE

Teleperformance Global(Data Analyst) | *April 2025 - Present*

- **Business Requirements & Stakeholder Collaboration**: Partnered with finance, operations, and leadership to gather business requirements, KPIs, and reporting objectives. Translated business needs into scalable BI solutions using SQL, Power BI, and Tableau. Conducted gap analysis to align analytics with strategic goals.
- **KPI Dashboard Development & Data Visualization:** Designed and maintained interactive KPI dashboards in Power BI and Tableau for real-time tracking of operational efficiency, financial performance, and resource utilization. Applied Power Query for data transformation, DAX for complex calculations, and Power Pivot for advanced data modeling. Implemented row-level security for leadership consumption.
- **Data Analysis, Forecasting & Scenario Modeling:** Performed end-to-end data analysis using SQL (complex joins, CTEs, window functions) and Python (Pandas, NumPy) for trend analysis, forecasting, and what-if scenario modeling. Leveraged Databricks and Snowflake for large-scale data processing and cloud data warehousing. Delivered insights for cost optimization and strategic decision-making.
- **Data Integration & ETL Optimization:** Managed and automated ETL workflows using SSIS, SQL, and Power Query, integrating data from internal and cloud sources including Snowflake and Databricks. Automated data cleansing and validation, reducing manual effort..
- **Data Governance & Quality Assurance:** Established data validation frameworks, governance practices, and quality checks to ensure data integrity and compliance. Documented data lineage and business logic for audit readiness.
- **Executive Reporting & Data Storytelling:** Created executive-level dashboards, MIS reports, and financial summaries in Power BI and Excel, translating complex datasets into clear, insight-driven narratives for leadership reviews and strategic planning.
- **Agile Project Management & Cross-Functional Collaboration:** Operated within Agile methodologies using JIRA to manage analytics projects, track deliverables, and prioritize enhancements. Collaborated with finance, engineering, and business teams to drive data-driven decision-making.

CGM Aria, Noida (Data Analyst) | *Aug 2022 – April 2025*

- **Advanced Business Requirements Gathering and Strategic Insights:**Collaborated with stakeholders to gather and document business requirements, transforming them into data-driven insights and scalable solutions. Conducted gap analysis to identify process inefficiencies and optimize BI strategies. Utilized SQL, Power BI, Tableau, and Advanced Excel to design customized analytics solutions aligned with operational and financial objectives.

- **KPI Monitoring and Dashboard Development:** Developed and maintained KPI dashboards in Power BI, Tableau, and SQL for real-time tracking of operational efficiency, financial performance, and compliance metrics. Applied Power Query for data transformation, DAX for complex calculations, and Power Pivot for advanced data modeling. Designed interactive dashboards for leadership teams.
- **Data Analysis for Workflow Optimization:** Conducted data analysis, trend forecasting, and statistical modeling using Python (Pandas, NumPy), SQL, and Power BI to identify performance bottlenecks and recommend improvements. Developed predictive models for risk assessment, revenue optimization, and scenario analysis.
- **ETL Processes and Workflow Automation:** Managed and automated ETL pipelines using SSIS, SQL, and Power Query, integrating data from multiple sources. Automated data cleansing, transformation, and validation processes, reducing manual effort and ensuring reporting accuracy**.**
- **Data Visualization and Advanced Reporting:** Designed executive-level reports and data visualizations in Power BI, Tableau, and Excel, leveraging DAX and Power Pivot for in-depth analysis. Translated complex datasets into actionable insights through data storytelling**.**
- **Agile Project Management and Stakeholder** Collaboration: Worked in Agile using JIRA to manage analytics projects and facilitate cross-functional collaboration. Led requirements sessions with business users to define data-driven solutions and ensure alignment with business objectives.
- **Financial and Operational Metrics Analysis:** Conducted financial analysis, forecasting, and KPI reporting using SQL, Power BI, and Advanced Excel. Applied scenario analysis and financial modeling to optimize resource allocation and revenue performances.

Ashoka Autos (MIS-Data Analyst) | Jan *2021 – August 2022*

- **Data Analysis, Business Insights & KPI Reporting:**Conducted data analysis using SQL, Power BI, and Advanced Excel, delivering insights on operational and financial performance. Designed KPI dashboards in Power BI and Tableau tracking operational efficiency, revenue growth, and engagement metrics. Utilized DAX, Power Pivot, and SQL queries for real-time BI insights.
- **Data Integration, ETL Processes & Workflow Optimization:**Managed ETL processes using SSIS, SQL, and Power Query, automating data extraction, transformation, and cleansing across platforms. Ensured data integrity and high-quality reporting, reducing manual efforts through automation.
- **Predictive Analytics, Forecasting & Root Cause Analysis:** Applied Python (Pandas, NumPy) for trend forecasting, risk assessment, and scenario analysis. Conducted root cause analysis to enhance resource allocation and improve financial decision-making.
- **Data Visualization, Reporting & Dashboard Development:** Developed interactive dashboards and executive reports in Power BI and Tableau, leveraging DAX and Power Pivot to represent complex data. Translated datasets into actionable insights for business strategy and decision support.
- **Business Intelligence, Stakeholder Engagement & Strategic Insights:** Partnered with cross-functional teams to develop BI solutions aligned with business goals. Led requirements discussions and translated them into customized analytics solutions using Power BI and Tableau.
- **Automation, Agile Execution & Project Management:** Automated reporting processes using SSIS, Power Query, and SQL. Delivered projects in Agile using JIRA for BI implementation, analytics tracking, and resource allocation.

ACHIEVEMENTS

- **Developed Scalable Dashboards:**Designed 50+ interactive KPI dashboards in Power BI and Tableau, improving decision-making efficiency by 30**%.**
- **Optimized ETL & Data Integration:**Automated ETL workflows using SSIS, SQL, and Power Query, reducing data processing time by 40%.
- **Enhanced Business Insights:** Delivered data-driven insights using SQL, DAX, Python, and Advanced Excel, improving operational efficiency by 20%**.**
- **Streamlined Reporting:**Developed dynamic reports with DAX and Power Pivot, increasing reporting accuracy by 30% and reducing manual effort by 50%**.**
- **Applied Predictive Analytics:** Leveraged Python for trend analysis and predictive modeling, boosting revenue by 15%.
- **Ensured Data Accuracy:** Implemented data validation and governance frameworks, ensuring 100% compliance and data integrity..

ACADEMIC CREDENTIALS

- Bachelor of Commerce | Delhi University, Delhi | 2018
- Accelerator Program in Business Analytics and Data Science - Hero Vired
- AZ-900: Microsoft Azure Fundamentals
- PL-300: Microsoft Power BI Fundamentals
