Summary

Results-driven Data analyst with 4+ years of experience delivering data solutions that increased business performance by 30%. Expert in developing interactive dashboards and building ETL workflows that reduced manual reporting time by 30%. Proven track record in translating complex datasets into actionable business insights using Power BI, SQL, Python, VBA and Azure Data Factory.

Experience

Tytan Tech | Data Analyst 03/2025 – Present Remote

A data analytics and tech consulting company that provides BI, analytics, and data-driven solutions to businesses.

- Developed **interactive Power BI dashboards** for **financial and hedge fund analytics**, tracking **portfolio performance, investment exposure, and financial KPIs**.
- Designed **data models (Star Schema)** and built **advanced DAX measures** for KPI calculations, improving dashboard performance and analytical insights.
- Built ETL pipelines using Azure Data Factory, SQL Server, and Power Query to integrate and transform data from multiple sources.
- Applying SQL and Python to clean, transform, and analyse datasets for performance metrics.
- Implemented **Row-Level Security (RLS)** and governance policies to ensure **secure and role-based data access**.
- Designed and optimized Power BI dashboards for mobile and tablet view using responsive layouts and mobile-friendly visual configurations.
- Delivered **financial, insurance, and operational dashboards** with **drill-through analysis, dynamic filters, and KPI visuals** for business stakeholders.
- Automated manual reporting processes in Excel using **VBA**, improving efficiency and accuracy in weekly data refresh cycles.
- Collaborated with stakeholders to **gather requirements, perform data validation, and deliver data-driven insights** for strategic decision-making.
- Developed and maintained **interactive Power BI and Tableau dashboards** for market, recruitment, insurance, and financial performance reporting.
- Designed and developed user-friendly Power BI dashboards by translating **Figma and Canva** prototypes into interactive reporting solutions with modern UI/UX design standards.

Acuity KP | Associate (Short-term project) 11/2024 – 03/2025 Bangalore

A company focused on delivering credit reporting and finance dashboard development

- Supported development and maintenance of **Power BI dashboards** for **financial reporting and credit bureau analytics**, analysing **Bloomberg market data and financial KPIs**.
- Extracted and transformed financial datasets using **SQL Server (SSMS), Power Query, and APIs**, ensuring accurate **data integration and reporting**.
- Built **DAX measures, calculated columns, and KPI visuals** for **credit risk, portfolio exposure, and financial performance analysis**.
- Performed **data validation and reconciliation using Python (Pandas) and SQL** to ensure consistency between **source systems and BI reports**.
- Assisted in **data modelling, dataset refresh optimization, and ad-hoc financial reporting** for business stakeholders.

Insource Software – BI Developer 11/2021 – 10/2024 Pune

A technology company specializing in data-driven solution and reporting analytics

- Collected, cleaned, and analysed large datasets using Python-pandas and NumPy to derive actionable business insights.

- Developed interactive dashboards in Power BI to track portfolio performance, cost analysis, and broker interactions, improving data visibility for hedge fund portfolio managers.
- Automated data transformation and reporting using Power Query and Python, reducing manual effort by 30% and increasing reporting accuracy.
- Performed internal vs. external data comparison analysis to assess portfolio performance against market trends.
- Coordinated with U.S.-based clients, attending late-night meetings to align analytical insights with their business needs.
- Extracted and analysed coverage information from top brokers, creating detailed quarterly reports to support financial decision-making.

Projects

Financial Performance & Portfolio Analytics Dashboard

- Developed an end-to-end Power BI dashboard solution for financial portfolio and investment performance analysis, enabling leadership teams to monitor KPIs, portfolio exposure, ROI trends, and risk metrics.
- Published and maintained dashboards in Power BI Service with Row-Level Security (RLS), scheduled refresh, and governance controls.
- Developed dashboard wireframes and UI prototypes using Figma to align business requirements with modern UI/UX standards.
- Created mobile-optimized Power BI dashboards with responsive layouts for business users accessing reports through mobile devices.
- Wrote optimized SQL queries using joins, CTEs, and window functions for data extraction, transformation, and validation.
- Built advanced DAX measures including rolling averages, YTD calculations, variance analysis, dynamic KPIs, and time intelligence functions.
- Developed an end-to-end Power BI dashboard solution for financial portfolio and investment performance analysis, enabling leadership teams to monitor KPIs, portfolio exposure, ROI trends, and risk metrics.

Executive KPI Dashboard with Mobile Reporting

- Developed executive-level KPI dashboards for sales, operations, and financial reporting with mobile-first responsive design.
- Created interactive visualizations, drill-through navigation, bookmarks, and tooltip-based storytelling dashboards.
- Designed dashboard prototypes in Figma and converted high-fidelity UI designs into pixel-perfect Power BI reports.
- Optimized report performance using efficient DAX calculations, data reduction techniques, and star schema modeling.

Education

MBA – Finance – Deogiri Institute of Engineering and management studies 07/2017 – 08/2019 Aurangabad

B.com – Banking and finance – Deogiri commerce and science College 06/2013 – 05/2016 Aurangabad

Certification

PL-300 Microsoft Power BI Data Analyst Associate – Microsoft – May 2025
Data Science and Machine Learning using R and Python – IIM Raipur – Dec 2020
Data Analysis with MS Power BI – Nulearn – Mar 2021
Mahindra Master Class Training – Jun 2019

Skills

Power BI / Tableau DAX, Power Query, Data Modelling, Dashboards, MS Fabric

SQL Joins, Views, Stored Procedures

Advanced Excel PivotTables, Power Pivot, VBA

Python Pandas, Matplotlib – for data analysis

ETL & Data Cleaning, Data Visualization & Reporting, Statistical Analysis & Forecasting, Strong Business Understanding (Finance)
