Nikhil Singh

Data Scientist | 5 Years

singhnik789@gmail.com linkedin.com/in/nikhil-singh +91 9161022003

Professional with 5 YOE in designing and implementing data driven solutions. Proficient in SQL, Python, and model building. Skilled in utilizing and building a wide range of machine learning algorithms. Proficient in managing end to end machine learning lifecycle.

Work Experience

TCS

Data Scientist Aug 2021 - Present

Project-4

- Developed **time series forecasting** models for **supply chain management**.
- Implemented various models including **Auto ARIMA**, **Prophet, Linear Regression**, and **XGBoost**.
- Enhanced document management and verification processes through **computer vision**.
- Increased document field identification **accuracy** to **88%**.

Project-3

- Developed a solution to classify new products within a system using **Random Forest classification model**, deployed for internal client use within the ITO group. Achieving **accuracy** of **86%**.
- Simplified the classification process, providing the client with a significant **reduction of effort** and improving accuracy and efficiency in the **trade operations**.

Project-2

- Specialized in **supervised learning** within the IT Service Management (ITSM) domain, focusing on **reducing** human effort and time spent on repetitive tasks.
- Developed a machine learning model for incident **categorization**, achieving an **accuracy** rate of **83%**.
- Utilized techniques such as **tf-idf**, **count vectorizer**, **word2vec**, and **BERT** for embedding generation.
- Leveraged open-source **large language models** (LLMs) for **text classification** by **fine tuning**, enhancing task **accuracy** to **92%**.

Project-1

- **Engineered a "single source of truth"** for facility utilization by reconciling disparate datasets using advanced string matching techniques to overcome inconsistent naming conventions.
- **Optimized global real estate footprint** by providing data-driven insights that enabled the client to decommission 1MM+ sq. ft. of underutilized office space, resulting in a **10% reduction in annual rent payments**.

Technical Skills

- **Programming Languages** - Python, SQL, PySpark
- **AI, Data Science & Cloud** – Azure ML, Machine Learning, Natural Language Processing, Databricks, LLM, Gen AI, Agentic AI Frameworks, Neural Networks, Time Series Analysis, OpenCV, langraph, transformers, Power BI, TensorFlow, Keras, Pytorch, MLFlow

Education

AISSMS Institute of Information Technology, Pune 2017 – 2021
Bachelor of Engineering in Computer Engineering
