

Nilesh Amrutkar

Manager – Service Delivery | Project Management | Operations Consulting & Vendor Management | Enterprise Services & Solutions | Telecom Wired and Wireless | Customer Satisfaction

(+91-7012840712/+91-9657364494 ; Nilesh.amrutkar2@gmail.com)

Executive Summary

- **Technical Manager** with over 16 years of experience in directing large engagement including complex Program/Project Management, Delivery Management, People Management, Telecom service delivery, Service assurance Processes SME across wired and wireless telecom deliveries.
- Extensive background in **UC Products (UCaaS) Unified Communications as a Service**, Cisco Hosted Collaboration System (HCS), Cisco Unified Communication IP telephony (IPT), Hosted Contact Center **(CCaaS)** & Microsoft Products (MS TDR, Operator Connect, MS Teams Phone Mobile).
- **Service Delivery & Operations** across several Vodafone Enterprise product suite (**Unified Comms, International Carrier Services, RCS & Mobility** etc.)
- **Global Exposure:** Delivery & Deployment of complex services across regions such as Vodafone India, Vodafone UK Group & Vodafone local operating companies worldwide.
- **Experience in Managing teams** in multiple Telecom domains like 2G,3G, 4G, RCS, and UC
- Responsible overall Network team's **SLA and KPI reporting** to senior management on monthly basis.

Core Competencies

Project Management, Process and Compliance Exp –

- Agile Methodologies: Scrum, Kanban
- Strategic Management: Risk Management, Performance Management
- People Management: Hiring, Team Mgmt.
- Vendor Management, Process Management
- Change Management, Incident Management
- Service Level Management, Service Improvements
- Escalation Management, Problem Management

Technology and Tools Exposure –

- Technology : **2G, 3G, 4G Core, 5G Core Architecture, IMS, VoLTE, Unified Communication, RCS, HSS, NGN**
- Protocols : VOIP, SIP, DIAMETER, MSRP, RTP, SS7, SMPP, TCP, UDP, SCTP,HTTP
- Telecom Cloud : nFV, Docker, Container
- Tools : JIRA, Confluence, BMC Remedy, Putty, Winscp3, Wireshark
- Command level knowledge of LINUX

Education and Professional Development

Education – BE (E&TC), MBA (Telecom Management)

Technology Certifications: PMP Certified, AZ-900-Azure Cloud Fundamentals Certified, Azure Network Security Engineer AZ-500 Certified, SC-900 Security, Compliance & Identity management, CCNA Certified

Process Trainings **:** eTOM Framework, ITIL Methodologies, Agile Methodologies

Awards and Recognition

- Won multiple project awards in the past decade for innovation and excellence
- Appreciated with **Rising Star Award-2010** for outstanding and dedicated performance in completion of MNP testing
- Achieved **Employee of the Year award** for completion of LI testing in LOOP Telecom PAN India Network

→

_VOIS (Vodafone)
Mar 20 Onwards
Technical Manager

Experience Summary

Technical Manager | Vodafone India Services Private Limited, Pune | March 2020 - Present

Led in overall concepts of e2e technical delivery, multiple project planning & implementation viz. scoping, estimation, tracking, resource planning, change management & delivery management. Managing vendors, multiple engineering teams, driving operational excellence.

Project :
Unified Communication : Solution provided to Vodafone local OPCO's & Enterprise Customer Worldwide
Services : Voice Call Connectivity & Quality, Call Recording, IVR, Voicemail, Interactive Voice, TPM, Contact Center, PBX, Global SIP, Skype For Business, Microsoft Teams Direct Routing & FAX
Application used : Palladion – Call Tracing & Traffic analysis Tool, CUCM, VOSS4C, NGIN (Application Server), ScienceLogic, Dubber Recording Portal, Ring Central Portal, IV Portal, IMS Platform Nodes (P-I-S-CSCF, TAS, HSS, ENUM and DNS), Infovista, Kibana, Grafana, Netnumber HSS/DNS ENUM GUI's

Key Contributions and Achievements:

- Managing end-to-end **service delivery & operations** for telecom services viz. Unified Communication :
  - UCaaS Management tools (VOSS4UC), VOSS Migrate to UC
  - Cisco Unified Communication Manager UCM, Migration ongoing to HCS (v14)
  - Microsoft Teams, MS Operator Connect, Direct Routing, Microsoft Team Phone Mobile
  - Oracle SBC, Global SIP trunking (GSIP)
  - Recording solution – Verint , Dubber, Smarsh & Cognia
  - Call Tracking Tools – Palladian, VOIP Future, Wireshark
- Manage & Support operation activities for Cisco UCaaS (Unified Communications as a services) over HCS for global enterprise customers & Microsoft Unified communication products MS teams, Teams direct routing, MS Operator Connect. Currently working as Duty Manager Role to support UC operations, Service Desk and Customer Support teams on high priority issues & driving it by maintaining KPI.
- Work directly with Customers, Solution Architects and build engineers **to deliver the UC solution** offered to customer.
- Supported large **customer migrations during change window** allocated by the customer.
- Responsible for **Project Execution, Risk Management, Problem Management, Schedule Planning** and Prod **Deployment.**
- **Played a lead role** in expansion of various projects & **new onboarding** from Vodafone local markets to _VOIS India.
- Special focus on **automation programs** i.e. **Zero Touch monitoring** for First Level Team. Keep record of existing threshold on KPI Alerts & set a new one in Netcool Tool to run automation script to trigger the alarm.
- **Prepare major incident report** with timelines to discuss further with higher management.
- Handling daily project calls with our Interconnect Partners & Vendors to discuss critical issues.
- **Quality check MOPs** – Responsible to validate MoPs before implement in Network.
- **Network Migration** – Involved in core network traffic migration viz. Ericsson TAS to EDEN Application Server, HP HSS to Netnumber HSS.
- **Managing & supporting Enterprise customer's** issues related to Cisco Call Manager (CUCM), Cisco Unity Connection (CUC), Cisco IP Telephony devices, Jabber and Voice gateways remotely.

TAC Manager | Reliance Jio Infocomm Limited, Mumbai | May 2018 - Feb 2020

Played a **lead role** for **operations and maintenance** of IP Multimedia Subsystem (IMS) /VoLTE solution provided by Nokia.

Key Contributions and Achievements:

- Involving Software upgrade of IMS Core Nodes viz. TAS-16.5 (PCD2.0 To PCD 7.0) & P,I,S CSCF-17.5
- Troubleshoot issue of Volte registration, ONnet/OFFnet Mobile originate and terminate call faults and take appropriate action to resolve.
- Coordinate with Circle Team and internal NOC teams for service testing, troubleshooting and new feature testing for IMS elements.
- Analyse Normal & Emergency call Routing / Configuration bugs in TAS, P-S CSCF Nodes.

Assistant Manager | Vodafone India Private Limited, Pune | May 13 - April 18

Played SME role for maintain Operations, Performance & Quality of National & International Long distance Network.

Key Contributions and Achievements:

- Managing Key **Performance Indicators (KPIs)** of core LD NGN Network viz. ASR, ACD, PDD, TG utilization, ETI, NER etc. indicating Network and Traffic performance.
- Analysis of traffic routing, planning & load balancing for interconnect carrier.
- E2E analysis & troubleshooting of issues like Voice Call, ITFS, NTFS, FAX, Audio conferencing, CRBT, USSD etc.
- **Improvement and recommendations plans** base on abnormal network behaviour viz. **Traffic patterning, Capacity utilization & Load balancing**. Doing Impact analysis for required changes.
- **VoLTE Deployment:** Involve IMS Nodes Deployment & with complete Testing for Vodafone PAN India.

Deputy Manager | Loop Telecom Limited, Mumbai | March 10 - April 13

Responsible for **Planning & Implementation** of Core Network Elements (MSC, MGW, HLR-EIR, SGSN, GGSN).

Key Contributions and Achievements:

- **Database Management, Configuration and Acceptance Testing** for POIs and Network Elements.
- TG Capacity Utilization and Planning.
- **Deployment of Lawful Interception** System in the Network. Integrating present MSC Nodes with LI System.
- Testing all test Scenarios of LI & offering our LI system for Testing to LEAs.
- **Connectivity of POI** with complete Testing of Channels, CICs & Signalling with private Operators.

Network Engineer | Nokia Siemens Networks, Pune | Oct 08 – Feb 10

Played Engineer Role for **Operation and Maintenance of Airtel MH & Goa Circle**

Key Contributions and Achievements:

- GSM Tracing This is most powerful activity, used for tracing location and calls made by black listed number or equipment.
- **Call connectivity, Audio Quality & Call Drop issue's analysis** & troubleshooting.
- Responsible for Operation, handling of Level opening issues with other operators, maintenance and administration of the Switch.
- Working on Nokia switch DX200 by using the UNIX based software Reflection.
- **Value Added Services (VAS) Support** - CRBT, BGM (Background Music),SMS & GPRS

Achievements

- **Driving Engineering Excellence**: Ensured **100% adherence** to release commitments, stabilized velocity, and optimized epic closure times to 2-3 sprints. Maintained ready-to-develop backlogs for seamless sprint planning.
- **Focus on Quality Improvements**: Achieved **100% adherence to CFD OLAs**, limited **regression defects below 5%**, and sustained open defects under 10, delivering defect-free releases.

Personal Information

- Permanent Address– Flat No B-303, Revu Estate, Nr Sitangan Garden, Shastri Nagar, Kasarwadi, Pune-4110034
- Passport Number - H0809371 (Valid till 30.09.2028)
- Gender –Male
- Marital Status – Married
- DOB – 6th November 1985
- Linguistic Status : English, Hindi & Marathi
- Current Location – Pune, India
- Notice Period – 3 Months
