Digitalization of PACS

Digitization of PACS (Primary Agricultural Credit Societies) is the process of converting their manual records and operations to digital form. This includes digitizing their ledgers, accounts, loan records, and other data. It also includes implementing digital systems for their financial transactions, customer service, and other business processes. The digitization of PACS is a major initiative in India, with the government having allocated Rs. 2,516 crore for the project. The goal is to digitize all 63,000 functional PACS in the country over a period of five years. Benifits 1. Faster and more efficient loan processing 2. Improved customer service 3. Increased transparency and accountability 4. New opportunities for diversification
