Javascript	Firebase	Express	Github	MVVM	Offline Sync
MongoDB	Bloc	RestApi	VS Code	MVC	
Sqflite	Getx	Socket.io	Android Studio	Clean Architure	

PROFESSIONAL EXPERIENCE

Software Engineer - SOFTSERV INC , Jaipur (Rajasthan) **2024 - PRESENT**

- Designed and developed feature-rich, cross-platform applications using Flutter and
- Dart.
- Delivered seamless user experiences with pixel-perfect UIs and efficient backend
- integrations.
- Debugged, optimized, and maintained apps to ensure high stability, performance, and
- reliability.
- Took ownership of the entire development lifecycle — from planning to deployment
- and post-launch improvements.
- Recognized for proactive problem-solving, clean code practices, and a strong
- commitment to quality delivery.

Software Engineer - Green Apex Technology , Jaipur (Rajasthan) **2023 Dec - 2024 May**

- Developed and implemented an online Booking Management System for the
- Rajasthan Government, streamlining ticketing across all tourist destinations in
- collaboration with Yatra.
- Integrated operator interfaces for ticket issuance and verification, ensuring smooth
- on-ground operations.
- Built an intuitive admin dashboard for real-time booking management and
- performance tracking.
- Delivered a user-friendly mobile application enabling tourists to seamlessly book
- tickets online with secure payments and instant confirmations.

Jr Flutter Developer - Appentus Technology Pvt. Ltd., Jaipur **May 2022 - Nov 2023**

- Developed and deployed 4+ projects from scratch to production on both Google
- Play Store (Android) and Apple App Store (iOS), following the complete SDLC
- across multiple domains.
- Implemented advanced technologies such as Google Maps, live tracking, route
- creation with Polylines, local databases, Firebase Auth, notifications, deep links,
- and WebSockets.

EDUCATION

MODERN INSTITUTE OF TECHNOLOGY AND RESEARCH CENTER, **2018-2022**

- Bachelor of Technology (Computer Science),

START PUBLIC SCHOOL **2017-2018**

12th (PCM)

PROJECTS

SPS NEXUS Link

- Implemented user authentication, role-based dashboards, and secure login/logout functionality.
- Task assignment, progress tracking, and status updates.
- Push notifications and in-app messaging.
- Offline data caching and sync on network availability.
- Secure data handling with validation and encryption techniques

OBMS Link

- Designed and developed a full-featured online booking application in collaboration with the
- Rajasthan Government's Department of Information Technology (DOIT), enabling digital
- ticketing across major tourist destinations.
- Engineered offline data access using SQLite/Hive, ensuring uninterrupted operations for remote
- dealers and on-site booking counters.
- Integrated secure payment gateways for seamless and reliable ticket transactions with
- enhanced data privacy and financial security.
- Successfully launched the app on the Play Store, achieving 10,000+ downloads and
- significantly improving tourism service efficiency across Rajasthan.

PANASONIC(ANCHOR EMITRA) Link

- Developed key features such as order placement, invoice viewing, account tracking, and report
- generation to streamline business operations.
- Implemented a seamless vendor workflow enabling vendors to easily place, review, and
- manage their orders.
- Added live tracking and real-time updates for dispatch and delivery, enhancing user
- engagement and transparency.
- Integrated secure payment gateways and billing history access for smooth financial
- transactions.
- Connected RESTful APIs to fetch real-time data for orders, invoices, and deliveries — achieving
- 5,000+ downloads on the Play Store with excellent user feedback

Link

HOTBOXCOOKIES

- Collaborated with a cross-functional team to design and develop the complete front-end UI/UX
- using Flutter, ensuring a responsive and visually engaging experience across mobile and tablet
- devices.
- Implemented core e-commerce features such as add-to-cart, custom cookie builder, checkout flow,
- and coupon code validation to enhance user engagement.
- Integrated secure payment gateways like Stripe and Square for smooth and reliable transaction
- processing.
- Developed user-centric modules including profile managemen
