PARMJEET SINGH

Software Engineer – Team Lead

Software Development | Web Application Engineering | Full-Stack Development | Team Leadership | Cloud Deployment (AWS)

+91 8076949086
parmjeetsingh22@gmail.com

PROFILE SUMMARY

- **Seasoned Software Engineer and Team Lead** with over 13 years of expertise in **PHP and full-stack web application development**, adept at building **scalable, robust solutions** using frameworks like Laravel, CakePHP and node.js, complemented by front-end technologies such as React.js and JavaScript.
- **Insightful Project Management professional** with extensive experience in directing cross-functional teams and managing all project phases—planning, design, scope definition, estimation, and resource administration—while consistently delivering high-quality results within strict **time and budgetary constraints**.
- **Skilled in leading end-to-end software development lifecycle (SDLC)** for multiple projects, including requirements gathering, design, development, testing, deployment, and maintenance, ensuring high-quality deliverables and timely project completion.
- **Proficient in database architecture and optimization**, leveraging both **relational (MySQL, MariaDB, MS SQL Server)** and **NoSQL (MongoDB)** technologies to ensure high performance, data integrity, and seamless application integration.
- **Experienced in cloud infrastructure management and deployment**, utilizing AWS services—including EC2, RDS, S3, and SNS—to develop **secure, scalable SaaS platforms** that enhance operational efficiency and reliability.
- **Dynamic team leader and problem solver** with a strong focus on **mentorship, task allocation, and progress monitoring**, driving collaborative work environments that enhance productivity, while continuously adapting to emerging technologies and evolving project requirements to maximize business impact.

TECHNICAL SKILLS

Programming Languages	C, C#, Core Java, C++
Web Technologies	PHP, HTML, XML, ColdFusion, Node.js, React.js
Scripting Languages	JavaScript, jQuery
Databases (RDBMS & NoSQL)	MS SQL Server, MS Access, MySQL, SQLite, MongoDB, MariaDB
Operating Systems	Windows (95/98/NT/2000/XP/7), Ubuntu (Linux)
CMS Platforms	WordPress, Joomla, Shopify, MODX
Frameworks	CodeIgniter, CakePHP, Laravel, Zend

CORE COMPETENCIES

- Project Management
- Software Development Life Cycle (SDLC)
- PHP & Laravel Framework
- React.js Development (MERN)
- Database Design & Management
- Cloud Deployment (AWS)
- Requirement Gathering & Analysis
- Agile & Scrum Methodologies
- Code Review & Quality Assurance
- Client Relationship Management
- Mentorship & Training
- Cross-functional Collaboration
- Performance Optimization
- Technical Documentation
- Troubleshooting & Debugging

WORK EXPERIENCE

Aug 2017 – Oct 2025(LWD: 31/10/2025) | Software Engineer – Team Lead | Headerlabs InfoTech Pvt. Ltd., Gurugram

ROLES AND RESPONSIBILITES

- **Leading a team of software developers**, managing task allocation, mentoring, and monitoring progress to ensure timely project delivery.
- **Designing and maintaining storage systems**, including database architecture, to support efficient data management.
- **Executing end-to-end project lifecycle activities** such as requirement gathering, analysis, and implementation for client applications using PHP, React.js, Node.js and related technologies.
- **Coordinating with stakeholders** to align project goals with business requirements and ensure successful project outcomes.
- **Implementing and enforcing software development processes** including version control, testing, and deployment strategies.
- **Troubleshooting and resolving complex technical issues** related to backend and frontend components to maintain system reliability.

Feb 2012 – Jun 2017 | Senior Web Developer – Team Leader | New Media Guru(I) Pvt. Ltd., New Delhi

ROLES AND RESPONSIBILITES

- **Led a team of developers** by assigning tasks, providing technical mentorship, and ensuring smooth collaboration across backend and frontend teams. **Designing and maintaining storage systems**, including database architecture, to support efficient data management.

- **Improved code quality by** conducting structured code reviews, enforcing coding standards, and implementing best practices for scalability and security. Coordinating with stakeholders to align project goals with business requirements and ensure successful project outcomes.
- **Created comprehensive Functional Specification Documents** (FSDs) that translated business requirements into clear technical workflows, reducing development rework and improving delivery accuracy.
- **Communicated directly with clients** to gather requirements, clarify technical queries, and provide regular updates, resulting in stronger client satisfaction and trust.
- **Delivered multiple project** modules on time by planning sprints, tracking progress, removing blockers, and coordinating across cross-functional teams.

PREVIOUS EXPERIENCE

Mar 2005 – Jun 2011 | Billing Section (Software Operations) | BSES Rajdhani Power Ltd., New Delhi

PROJECTS ANNEXURE

HRaspirin Enrollment | Duration: 24 Months | Team Size: 3

Technologies: PHP, MySQL, XHTML, JavaScript, Vue.js, Node.js, Laravel, Git, Twilio, AWS (EC2, RDS, SES)

Description: Developed a billing, enrollment, and account management platform for customers, businesses, and agents. Enabled multi-portal access for agents, employees (mobile benefits), and employers for premium tracking.
